

| <u>CAMERA #</u> | <u>CC#</u> | <u>37 OTV CAMERA LOCATIONS</u>                              |
|-----------------|------------|-------------------------------------------------------------|
| 1.              | 1          | Top of blockhouse north side - overall complex observation  |
| 2.              | 2          | Top of blockhouse south side - LOX flow                     |
| 3.              | 14         | RP-1 storage                                                |
| 4.              | 23         | UT 128' level inboard LH <sub>2</sub> & LOX skids           |
| 5.              | 21         | UT 118' level inboard LH <sub>2</sub> flow                  |
| 6.              | 25         | UT pad "A" complex overall                                  |
| 7.              | 26         | UT pad "A" LH <sub>2</sub> Surveillance and burn pond       |
| 8.              | 20         | UT 108' S. E. corner. LH <sub>2</sub> flow and RP-1 tanking |
| 9.              | 27         | 35' level launcher                                          |
| 9a.             | 27         | Hypergolic servicing at base of Service Structure           |
| 10.             | 7          | South pedestal LOX tanking & Hyper loading                  |
| 11.             | 34         | UT 250' straight down full time launch day                  |
| 11a.            | 30         | Adjust 4 level security and Hyper                           |
| 12.             | 32         | UT 128' level                                               |
| 13.             | 11         | APS loading and LOX pit                                     |
| 14.             | 8          | North Pedestal                                              |
| 15.             | 9          | East Pedestal                                               |
| 15a.            | 24         | AGCS roof                                                   |
| 16.             | 28         | Adjustable 2 APS loading and firing                         |
| 17.             | 29         | Adjustable 2 APS loading and firing                         |
| 17a.            | 29         | Adjustable 1 security monitor SIB.                          |

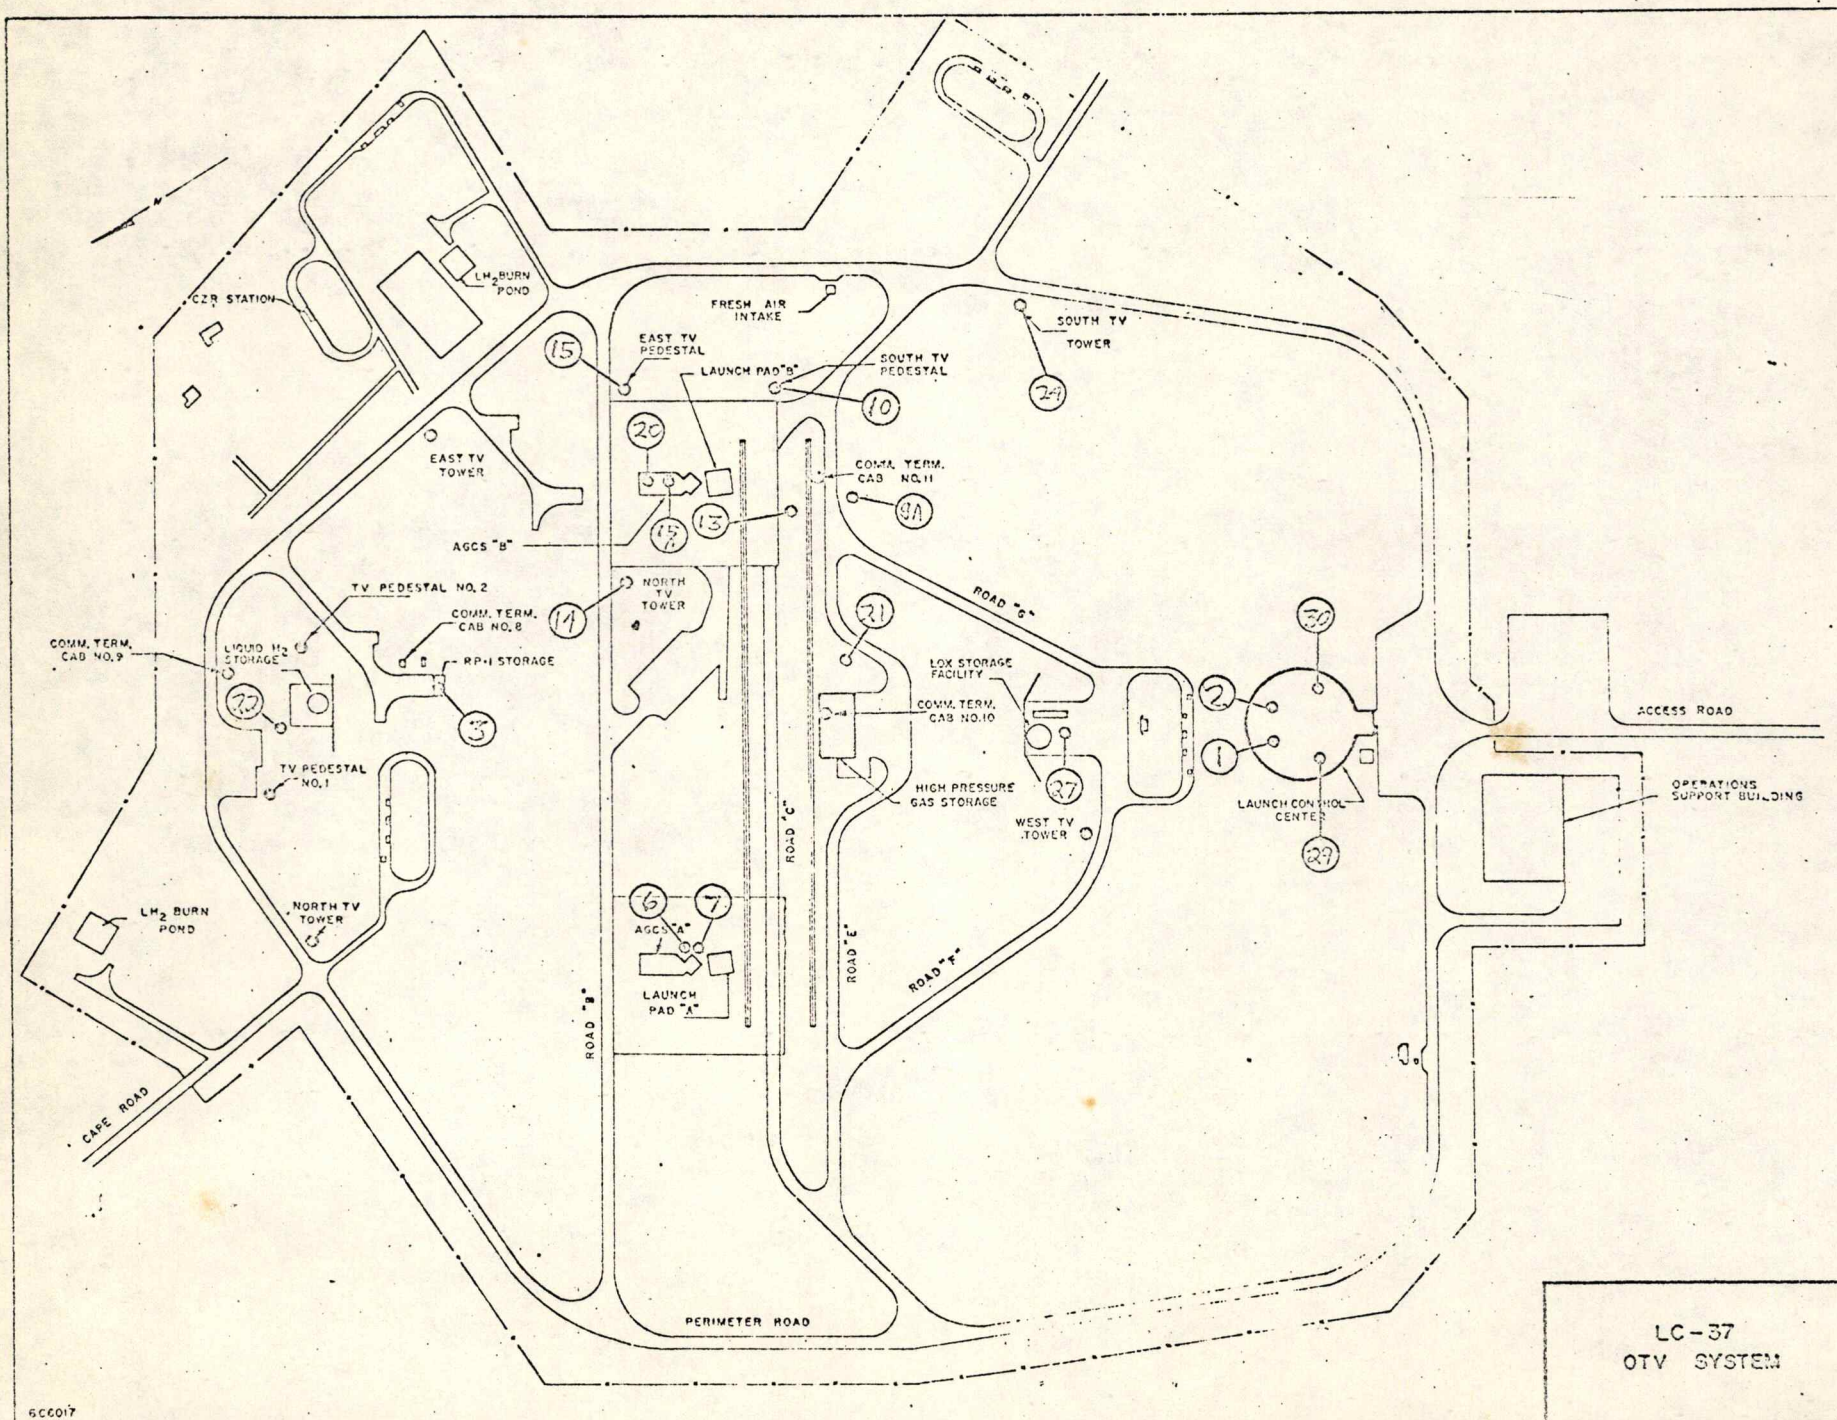

|     |    |                                           |
|-----|----|-------------------------------------------|
| 18. | 33 | UT 148' swingarm #3 LH <sub>2</sub> flow  |
| 19. | 22 | UT 128' swingarm #2 IOX flow              |
| 20. | 31 | AGCS computer                             |
| 21. | 13 | High pressure gas area Hyper Oxidizer Pad |
| 22. | 12 | LH <sub>2</sub> fuel area                 |
| 23. | 19 | 218' level UT umbilical connections       |
| 24. | 10 | South tower hyper fuel pad and IU window  |
| 25. | 15 | Adjustable 5                              |
| 26. | 16 | Adjustable 5                              |
| 27. | 6  | IOY storage                               |
| 28. | 18 | 188' level swingarm #3 LOY flow           |
| 29. |    | Countdown                                 |
| 30. | 3  | Firing Room                               |
