Luminary Project Memo No. 6

TO: Internal Luminary Memo Distribution  
FROM: R. A. Larson  
DATE: August 13, 1970  
SUBJECT: Luminary for Apollo 14

I understand that we are a little ahead of our schedule for the Luminary Re-release; that is Level 3 testing complete by Aug. 12 rather than the advertised Aug. 17. This is great!

In order to meet the Release date of Sept. 19 and yet have a little breathing room, we would like to be ready for a FACI with MSC by Sept. 8. The format for this meeting should be Level 4 Summary Reports and other documentation complete. To meet this schedule I would like to hold a pre FACI review on Sept. 1. For this review it is hoped that all Level 4 runs be complete but without the formal documentation necessary for the real FACI. See Bruce for the Simulation report sheets.
