What is Creative Commons?

Creative Commons is a 501(c)(3) nonprofit organization devoted to expanding the range of creative and educational materials available for others to build upon and share.

If you publish your content online, we provide an interface that helps you tell the world how people may distribute and reuse your content. We can also help you find content to share and transform.

About the licenses

Every Creative Commons license allows the world to distribute, display, copy, and webcast your work – provided users abide by certain conditions of your choice. There are four conditions you can apply with a **Creative Commons License**.

BY: **Attribution:** You must be given credit for your creation.

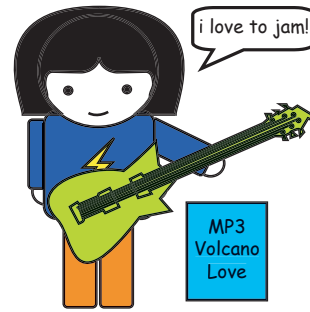

NC: **Noncommercial:** Your content may not be used for commercial purposes without your permission.

ND: **No Derivative Works:** Your content may not be altered or transformed.

SA: **Share Alike:** You permit others to distribute derivative works only under a license identical to the one that governs your work.

How does it work?

When Anita chooses a Creative Commons license, she gets an easy-to-understand, legally sound, and technically savvy license – free of charge. Every license is expressed in three ways, so that when Anita licenses her song “Volcano Love,” she:

Links to a human-readable summary of the license so that when John, a filmmaker, finds her song while surfing the Internet, he understands how he may use it – even though he has never spoken to or met Anita.

Links to a lawyer-readable license, a thorough legal document that defines the terms in which others may distribute or re-use her song.

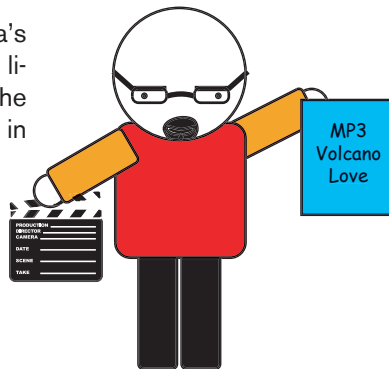

Includes some machine-readable code in her website, or MP3 file, so that search engines can easily lead John, and other artists to her song.

3

If John likes Anita’s song, and the license permits, he may include it in his film.

Find content to reuse

Creative Commons can help you find content to reuse. We’ve compiled a list of great places to locate reusable text, audio, video, images, etc., at <http://creativecommons.org/getcontent/>. Here are a few examples of what you might find:

Do you like this photo?

photo by Matt Haughey

Go ahead and reuse it! It’s available under an Attribution-ShareAlike-Non-Commercial license. Download it: <http://photos.metafilter.com/index.cfm/series/67/start/9>. Or go to our website and look for hundreds of licensed photos: <http://creativecommons.org/getcontent/>.

Do you like to remix music?

BM Relocation Program is a band that has licensed many songs under an Attribution-ShareAlike license. We invited several other musicians to remix their song “Superego Exchange” and chose a few entries to include on our new *Copy Me/Remix Me* CD, a compilation of freely licensed tunes. You can find other BM Relocation songs, among hundreds of others by artists from around the world, at <http://opsound.org/>, a pool of royalty-free music licensed with Creative Commons tools.

Want to read a good book?

Celebrated science-fiction author Cory Doctorow licensed his first novel *Down and Out in the Magic Kingdom* under an Attribution-Non-Commercial-NoDerivativeWorks license. Download it: <http://www.craphound.com/down/download.php>. You can also purchase the physical book at <http://www.amazon.com>.
