

GROUP CHARTER & GROUND RULES

Morgan and Little Creeks Local Watershed Planning Group

1/15/03

Proposed Amendments to the Charter

Fred Royal provided us with handouts at our 10/24/02 meeting, describing a related planning activity in Chapel Hill. He suggests the following amendment, under group tasks:

"Provide relevant information and participation to the discussion elements of the inter-jurisdictional Stormwater Work Group, to be implemented by the Town of Chapel Hill. This work group will primarily discuss and coordinate efforts in the water quality sampling and monitoring, illicit discharge identification and elimination, public education, flood mapping and sedimentation and erosion control programs."

Upon review, Bonnie Duncan has added the suggestion that we alter the proposed amendment to specify the jurisdiction for which these efforts will be discussed and coordinated (the town, the county), and add after the first sentence:

"Meetings of this group will be held separately from the Morgan/Little Creek Local Watershed Planning meetings, although the activities of this Work Group will include several of the Local Watershed Planning stakeholders and the work of the group will be reported to the Local Watershed Planning Team."
