FOREWORD

The raga system in carnatic music has a long and interesting history from the time of Matanga's Brihaddesi, where you come across the definition of Raga. The system has evolved through the centuries. Ragas like Gaula, Takka etc. are mentioned in the Brihaddesi. By the 13th century the, 'Sangita Ratnakara' of Sarangadeva lists as many as 264 ragas. Here, you come across ragas like Sankarabharana, Sri raga, Todi, Malavagaula (which is referred to as Taurushka), Kedaragaula etc. In the 14th Century Vidyaranya, in his musical treatise 'Sangeetha Saram' gives a list of fifteen mela ragas and by the year 1550, Ramamatya in his 'Swara mela kalanidhi,' speaks of 19 melas and several derivatives from each of them. In the beginning of 17th Century, Somanatha's Raga Vibhoda' and Govinda Dikshitar's 'Sangita Sudha' are two important works which deal with ragas current at that time.

In the latter half of 17th Century, Venkatamakhi, son of Govinda Dikshitar appeared on the scene and in his monumental work 'Chatur Dandi Prakasika' expounded the 72 mela karta scheme, which brought the Mela Janya system on a rational basis. In this work, he only showed the possibility of 72 mela kartas. But, in his scheme, a raga could be a mela if it had all the seven swaras either in the ascent (arohana) or in the descent (avarohana). Kedara Gaula which is Audava Sampurna was a mela in his scheme.

It is believed that it was Venkatamakhi's grand son Muthu Venkatamakhi, who gave the nomenclature for the mela ragas, (Kanakambari, Phenadhyuti etc) in his gitam called 'Raganga Raga Anukramanika Gitam' (found in Subbarama Dikshitar's 'Sangitha Sampradaya Pradarsini', 1904.

Later Govindacharya, the author of 'Sangraha Chudamani' gave the nomenclature 'Kanakangi', 'Ratnangi' etc. to the 72 mela karta ragas. These melas had all the seven notes in both the ascent (arohana) and in the descent (avarohana). He has also given lakshana gitas and lakshana slokas for many Janya ragas.

The Music Academy, Madras, published the chaturdandi Prakasika and in the appendix printed what are called raga lakshanas which gave the lakshanas of several ragas.

Formerly, musicians used to possess GHATAKAMS containing the sancharas of ragas and if they had any doubts they used to refer to this work for clarification on ragas. Even Tyagaraja is said to have referred to the ghatakam in his possession, when one of his disciples raised some doubt pertaining to Raga Balahamsa.

Pazhamaneri Swaminatha Iyer, Tachur Singarachariar and Subbarama Dikshitar may said to be the pioneers in giving the arohana and avarohana kramas of hundreds of Janya ragas. These were followed by many others like, Nadamuni Pandithar, Abraham Pandithar, Manicka Mudaliar, K. V. Sreenivasa Iyengar, Prof. P. Sambamurthi, B. Subba Rao and Rangaramanuja Iyengar.

1. Nadamuni Pandithar - Swara Prastara Sangaram
2. Abraham Pandithar - Karnamrutha Sagaram Part II
3. Manicka Mudaliar - Sangitha Chandrika
4. K. V. Sreenivasa Iyengar - Gana Bhaskaram
5. Prof. P. Sambamurthi - South Indian Music Series
6. B. Subba Rao - Raga Nidhi
7. Rangaramanuja Iyengar - Krithi Mani Malai

The Music Academy, Madras has published a report of the conclusions of the deliberation on ragas in the form of a booklet called 'Raga Lakshana'.

In recent times B. M. Sundaram of All India Radio, Pondicherry has collected and published a work called 'Palai Yazhi' in which he has given the kramas of about 3000 ragas.

Though the arohana and avarohana krama of a raga does not tell us everything about the raga, it provides the frame work on which it is built. Ragas like Sahana, Ahiri, Neelambari, Devagandhari and Yadhukula Kambhoji defy definition. But for the majority of ragas, the Krama helps. With regard to the names of some ragas like Devakriya, Kalavati, there is some confusion.

The book 'Raga Pravaham' by Dr. Dhandapani and D. Pattammal contains the kramas of about 5000 ragas. They have consulted about 45 books in various languages (Tamil, Telugu, Kanarese, Hindi & English) and also contacted contemporary composers. The list of ragas is given both alphabetically and Mela kartha-wise.

The different kramas for the same raga and ragas with different names are also listed.

Equivalents of ragas of the 32 pannas of Tevaram are also given on the basis of the conclusions arrived at the deliberations of the Tamil Isai Sangam.

I am very glad that this work is now being published both in English and Tamil. I am sure that this book will be of great help to musicians, musicologists, teachers and music lovers.

COMPILER'S NOTE.

This work is a compilation of all Carnatic ragas from various sources from published books in various languages in the past, upto the works of present day contemporary composers and no originality is claimed. This is intended to fill the void created for lack of proper authentic books and publications. Previously the details about these ragas were published in various languages and this has created a lot of misunderstanding among the musicians and musicologists, as there was not one single source they could look upto for all their information.

As per mela raga scheme, more than 3 Lakhs ragas can be worked out by permutation and combination. Out of these only about 600 are in vogue. Another 5 to 6 thousand ragas are only available as scales. In this book, we have compiled from various sources nearly 5000 ragas for which names have been given. For many of the ragas, the different kramas used are also given. At the end of each scale, we have given the book reference.

The list of ragas is given both alphabetically and mela kartha wise. The different kramas for the same ragas and same scales with different names are also listed. We have also given the list of ragas equivalent or allied to some of the Hindusthani Ragas. Equivalent ragas of the 23 pannis of Thevaram are also given on the basis of the conclusions arrived at the deliberations of Tamil Isai Sangam, Madras. The Nomenclature as given by Sri S. Kalyanaraman for the Panchama Varja Dwi - Madhyama Ragas are also listed.

We feel this book will be of great help to the musician, musicologists, teachers, students of Carnatic music and music lovers in sorting out their doubts and also provide incentive for composers to compose in new scales that are not in vogue.

PREFACE TO THE SECOND EDITION

In view of the good response for the First Edition by Musicians, Musicologists, Music Lovers and Research Scholars, we have ventured to release the Second Edition of this Book.

We hope that this will receive the same response as the First Edition. This Edition has been completely corrected and revised as pointed out by Music Critics and Research Scholars. Some more Ragas have been added and the list is appended in the Annexure.

The Bibliography is wider based. Following points are to be noted while going through the Bibliography:

1. Where there are more than one reference for the same Raga or Scale, the oldest printed reference is given prominence.
2. Where some Ragas to the same Scale occurs in more than one Melakarta, it is the convention that the earlier Melakarta is the Janakaraga.
3. The standard and conventional signs have been given to enable the readers to pronounce the names properly.

A thought provoking article on the scientific naming of Upangavarja Ragas by **Smt D Pattammal** is enclosed. Readers are requested to go through the article and offer their opinions. It will be useful for discriminating Musicologists and Composers.

We are thankful to Sri.V.S.Kumar, Editorial Associate, "SRUTI" for translating the article "Upangavarja Ragas" in Tamil to English.

Late Sangeetha Kalanidhi **Dr.S.Ramanathan** has been the initiator and chiefly responsible continually for furtherance of our works, by his concern and constant motivation. His sudden demise is not only a severe blow and serious loss to Music community, but a personal loss to us as a Guide and Preceptor. We feel indebted to dedicate this Revised Volume in perpetuation of his Memory.

ACKNOWLEDGMENTS.

01. Sangitha Bhushanam Vidwan G.N. Dhandapani who was magnanimous enough to place his library at our disposal.
02. Sri T.S. Parthasarathy, Secretary, Music Academy, Madras, who gave suggestions now and then and allowed us to use the Music Academy, Library, Madras.
03. To all the contemporary composers who had given us the list of new ragas developed by them.
04. To Sri Thanjavur S. Kalyanaraman who gave the manuscript copy of raga index compiled by late Vidwan G.N. Balasubramaniam.
05. To Dr. S. Ramanathan who gave us guidance during the course of the publication and also consented to give a forward for the book.
06. To Sri V.S. Sundararajan, Asst. Editor, SRUTHI who helped us in making the alphabetical list of all ragas.
07. To Sri Raman, stenographer who typed out the books to our satisfaction.
08. To the Proprietors, Carnatic Music Book Centre, 14, Sripuram Street, Royapettah, Madras for permitting us to use the books available with them.
09. To M/S. Shanti Anand printing & Packaging, Madras-2. Phone : 848626 for printing the books neatly.
10. To my grand children, R. K. Murthi, Jayashree, and Shubha shree who helped me in translating the book material from Canarese books.
11. To my daughter-in-law Smt. Shanthi Chandrasekhar and Smt. Lalitha Natesan, who made the ardnous task of copying the manuscript papers and helping me in proof reading.
12. To all those musicians and musicologists who were basically responsible for bringing out this book.
13. To the Sangeeth Natak Academy, Delhi for the financial assistance given.
14. To all those well wishers who prompted and encouraged us to bring out this book.

NIROSHTA

This term is used for a Raga in which MA and PA are omitted in both Aarohana and Avarohana. These are 36 such Ragas listed below. There is only one composition 'Raja Raja Virajite' by Muthiah Bhagavathar in 'Mela Kartha Shankarabharanam'.

NAMING UPANGA VARJA RAGA

A Scientific Approach

(Proposed by Smt.D.Pattammal)

Carnatic music and the melakarta scheme of 72 ragas is based on the Seven swaras and the differentiation of these swaras (all except Panchama and Shadja).

The ragas that can be formed from the 72 melakarta ragas, by vajra vakra differentiations are legion. In fact there is no way one can say how many vakra ragas can be formed; but varja ragas, although very large in number, can be counted. Thus from a melakarta raga, there are 1763 possibilities of varja ragas.

| S.No. | Arohana | Avarohana | Number |
|-------|-----------------|------------------|--------|
| 01 | Sampurna | Eka-swarja-varja | 6 |
| 02 | Eka-swara-varja | Sampurna | 6 |
| 03 | Eka-swara-varj | Eka-swara-varja | 36 |
| 04 | Sampurna | Dwi-swara-varja | 15 |
| 05 | Dwi-Swara-varja | Sampurna | 15 |
| 06 | Eka-Swara-varja | Dwi-Swara-varja | 90 |
| 07 | Dwi-Swara-varja | Eka-Swara-varja | 90 |

A melakarta raga is a Sampurna raga (with all seven swaras) where the ascent (arohana) and descent (avarohana) are in the same (reverse) order e.g. Sankarabharana.

2. Varja ragas are formed by leaving out either in arohana or avarohana or both, one or more swaras but keeping the other swaras unchanged e.g. Hindolam, Arabhi, Saramati. Vakra ragas are formed when the order of the swaras are changed. E.g. Ritigoula (in addition one or more swaras may be left out).

Therefore, the total number of possible varja-kramas is 72×1763 or 126936. Ofcourse, only a limited number of these can be actually sung. Recently some of the rarer kramas have been used by musicians and have become quite popular like Revati, Sumanesaranjani, Janasammodini, etc.

Knowing the names of all the varja ragas is quite impossible. A few thousands were named in the past by our ancestors, but who gave the names, and when and what was the basis for these names is not quite clear in many cases. The meaning of a number of these names is not decipherable; the names appear to be only combination of letters. Not only are some varja ragas (duly named) not fit for singing, but some of the varja kramas which have rakti and are eminently fit to be sung do not seem to have been named.

Another confusion in all this is that for the same krama different names have been given by different persons, so that the same raga is known by more names than one. Not only that a performing musician now, chancing on any of these kramas and not aware of the history of the raga and the name given to it earlier, would christen it afresh.

Even without these complications, it is out of the question for anyone to have complete record of the names of the ragas and remember them. (It is like trying to remember the names of all the children in your neighbour's house especially if the family is economy in size with eight or nine daughters. More often than not, one refers to them as the second daughter or the last one and so on) This happens even when identifying a rare melakarta raga

being sung with the aid of the swarasthanas, we will be able to say that is the 33rd or 67th melakarta, but may not recall the name. Nor is it necessary.

When even the melas are not readily identifiable by name, the fate of varja ragas -- many thousands of which are possible -- can well be imagined. Only six hundred of these are in use at present; but people interested in the growth and promotion of our music should employ new varja kramas and develop them into rakti ragas. Their are those who maintain that ragas in use at present are sufficient -- an attitude that shows lack of foresight. If our ancestors had felt thus, a number of ragas we know now would have been denied to us. Carnatic music should and will see many more ragas).

It is therefore very important to find a method or develop a system for naming the various possible varja ragas which will be simple to remember and help in ready identification of new varja ragas.

One idea that could be tried to select the varja kramas that have been popularised and are in good use, and apply the same name to an identical krama originating from another melakarta, indicating the mela number in addition. Let us take the case of Mohanam for instance. Mohanam is janya raga of Harikambhoji, the 28th mela, and its krama is sa-ri-ga-pa-da-sa, sa-da-pa-ga-ri-sa. Now the same krama in Mayamalavagowla (15th mela) - that is Mayamalavagowla minus ma and ni in both arohana and avarohana - is called Revagupti. Again the same krama in Kanakangi (1st mela) is known by the name Ranganayaki. Instead we could call Mohanam as 28 Mohanam, Revagupti as 15 Mohanam and Ranganayaki as 1 Mohanam. This would enable us to name a new raga with the same krama - arising from some other mela -- as Mohanam, preceded by that mela number. We could select, for each varja krama, the most well known name and apply this formula. For instance, Hindolam, Valaji, Abhoji, Sriranjani, Hamsanandi, Kambhoji, Saveri, Kedaragaula, Bouli, Dhanyasi, Malayamarutham, Bilahari and Suddha Saveri could be chosen.

The difficulty in this process is the job of finding accepted or atleast known names for the different varja kramas. In fact there are merely a handful of known ragas (and therefore name) in the Tri-Swara-varja category or the ragas which have four swaras only. It is to remove this difficulty that the following system is submitted for consideration by musicologists and musicians. It should be noted that the scheme proposed here is only for upanga varja ragas and cannot be applied to vakra ragas and bhashanga ragas.

THE SYSTEM: We saw earlier that there are fifteen kinds of varja kramas. Of these, the first three kinds, which account for 48 varja kramas, are: Sampurana Shadava, Shadava Sampurna and Shadava-Shadava. For these three kinds of varja-kramas, the proposal is: to state the number of the melakarta, followed first by the name of the varja swara in the arohana and then the varja swara in the avarohana. If either arohana or avarohana is sampurna, we use the word poojya: in Sanskrit poojya means zero; and the word is used in a double negative sense here, to denote that no swara is absent.

Take Kambhoji for instance; In this raga nishada is the varja swara in the arohana; the avarohana is sampurna. We call the raga 28-nishada poojya; the melakarta number first the varja swara in the arohana next and finally, since avarohana is sampurna, the word poojya. Instead we were to name Sriranjani, we could call it 22 panchama-panchama, or 22 ubhaya panchama, which means panchama is varja swara in both arohana and avarohana (Ubhaya in Sanskrit means both).

This proposal takes care of the first three kinds of varja kramas. The next five kinds of varja kramas have audava krama (five swaras only) either in the arohana or in the avarohana or both. It will be incommodious to use the names of both the varja swaras, as the name of the ragas will become too long-winded. A different logic is therefore proposed for these five kinds of varja kramas which encompass 435 kramas.

The idea of an audava krama is that any two out of the six swaras ri, ga, ma, pa, da and ni will be varja swaras. The total number of such possibilities is 15 - the varja swara couples or sets could be any of the following fifteen:

ri - ga, ri - ma, ri - pa, ri - da, ri - ni,
or
ga - ma, ga - pa, ga - da, ga - ni,
or
ma - pa, ma - da, ma - ni,
pa - da, pa - ni, or da - ni.

For all the 435 varja kramas which have audava in the arohana or avarohana or both, only these fifteen varja combinations appear repetitively. It follows from this that if we name each of these fifteen combinations, we can cover all the 435 varja kramas. Better still, if the names can be made self explanatory by using an appropriate logic, remembering the names would become even simpler. This is attempted in the following:

| <u>S.No</u> | <u>Varja Swaras</u> | <u>Name</u> | <u>Explanation</u> |
|-------------|---------------------|-------------|-------------------------------|
| 01 | ri - ga | Mukha | Mukha (Face) is one |
| 02 | ri - ma | Kara | Kara-s (hand) are two |
| 03 | ri - pa | Rudra | Rudra (siva) has three eyes |
| 04 | ri - da | Kala -s | Kalas(seasons) are four |
| 05 | ri - ni | Bhoota | Bhoota-s (elements) are five |
| 06 | ga - ma | Guha | Guha(Muruga) has 6 heads |
| 07 | ga - pa | Swara | Swaras(note) are seven |
| 08 | ga - da | Lakshmi | There are Ashta Lakshmis |
| 09 | ga - ni | Graha | Graha(houses) are nine |
| 10 | ma - pa | Gamaka | Gamakas are of ten kinds |
| 11 | ma - da | Kumbha | Kumbha is 11th rasi |
| 12 | ma - ni | Chakra | Melachakra are 12 in number |
| 13 | pa - da | Pramodi | Pramodi is 13th year (of 60) |
| 14 | pa - ni | Loka | There are 14 Lokas-worlds |
| 15 | da - ni | Poornima | Poornima - full moon 15th day |

Thus all that one has to do is remember these fifteen names with swara sets that they denote, like one remembering the names of the seven swaras with the help of this simple expedient, will have a ready name for every one of the varja ragas, without any strain on memory. All the problems referred to earlier will be solved and there will be nothing of the confusion in raga names that we have now.

Finally we have all the last eight varja kramas with three swaras missing in the arohana or the avarohana or both. There are twenty such possibilities; and rather than give new names for these twenty sets which would create mixups, a simple solution is suggested: The first swara (of the three varja swaras) is spelt out in its short form, followed by the name given for the set of the other varja swaras. For instance if a raga's arohana - avarohana is sa-ga-pa-ni-sa and sa-ni-pa-ga-sa, the varja swaras are ri-ma-da. The name for these raga will (after the melakarta number) have ri (the first varja swara) followed by the name given earlier for ma-da, that is Kumbha.

The tri-swara varja raga names for a melakarta will be as under:

01. Ri-ga-ma :Riguha
02. Ri-ga-pa :Riswara
03. Ri-ga-da :Rilakshmi
04. Ri-ga-ni :Rigraha
05. Ri-ma-pa :Rigamaka
06. Ri-ma-da :Rikumba
07. Ri-ma-ni :Richakra
08. Ri-pa-da :Ripromida
09. Ri-pa-ni :Riloka
10. Ri-pa-ni :Ripurnima
11. Ga-ma-pa :Gagamaka
12. Ga-ma-da :Gakumba
13. Ga-ma-ni :Gachakra
14. Ga-pa-da :Gapramodita
15. Ga-pa-ni :Galoka

- 16 Ga-da-ni :Gapurnima
- 17 Ma-pa-da :Mapramodita
- 18 Ma-pa-ni :Maloka
- 19 Ma-da-ni :Mapurnima
- 20 Pa-da-ni :Papurnima

To sum up the order in which the name of the varja raga will appear is: the melakarta number (whose janya raga is the raga being christened), the arohana varja swara(s) and the avarohana varja swara(s). The scheme is in four parts:

a) Shadava ragas will be named by naming the melakarta number and then the varja swara in the arohana followed by the varja swara in the avarohana. If either is sampurna, we use the word **Poojya** for it and if the varja swara in both arohana and avarohana is the same, we use the word **Ubhaya** followed by the name of the varja swara.

b) Audava ragas will be named by the first naming the melakarta number, then identifying the two varja swaras in the arohana, finding the serial number of their combination and the name for that combination which follow the melakarta number and at the end, giving the name for the varja swaras in the avarohana. If the varja swaras in both the arohana and avarohana are the same, the name is the same and the word **Ubhaya** followed by the name will be sufficient.

c) If either arohana or avarohana is shadava, the varja swaras name should be used in the appropriate place. Similarly if either arohana or avarohana is sampurna, the word **Poojya** should be used in the appropriate place.

d) If the arohana and /or avarohana is chatusra, that is, if three swaras are varja, the name will have (1) the melakarta number (2) the first varja swara and the name for the combination of the next two varja swaras (in the arohana) and (3) the varja swara and the name for the next two varja swaras in avarohana.

A few more examples are given below:

1. Suddha Saveri: Sa ri pa da sa

----- sa da pa ma ri sa (22)

Varja Ga and Ni: serial no 9, graha

So the name is 22 **Ubhaya graha**

2. Malayamarutam: Sa ri ga da ni sa

----- sa ni da ga ni sa (15)

Varja Ma So 15 **Ubhaya Madhyama**

3. Saraswathi: Sa ri ma pa da sa

----- sa ni da pa ma ri sa (64)

varja in arohana Ga Ni: serial no 9, Graha

So 64 **Griha Gandhara**

4. Saramathi: Sa ri ga ma pa da ni sa

----- sa ni da ma ga sa (20)

Arohana is Sampurna. Varja in Avarohana are Pa and Ri

Serial No 3: Rudra. So 20, **Poojya Rudra**

5. Jayamanohari: Sa ri ga ma da sa

----- sa ni da ma ga ri sa (22)

Varja in arohana: Pa and Ni - serial no. 14 - Loka varja

So 22, **Loka Panchama**

6. Madhyamavathi: Sa ri pa ni sa

----- sa ni pa ma ri sa (22)

Varja swaras in both arohana and avarohana are Ga and Da

Serial No. 8: Lakshmi. So 22, **Ubhaya Lakshmi**

7. Mahati: Sa ga pa ni sa

----- sa ni pa ma ga sa (28)

Varja swaras in both arohana and avarohana are re-ma-da

So 28, **Rikhumba**

One question that can come up is: what to do with all the lovely names we have already like Hindolam and Suddha Dhanyasi and Sivaranjani? do we abandon them?

The answer is most certainly **no**. The names have been in vogue for too long and are too beautiful to be given up. We should continue to use them while simultaneously identifying them by the new scheme as well. Time alone can tell when the system outlined will come to stay: but at least for new ragas it will save the time and effort in choosing names.
