True patriotism
* It is very important for everyone of the nation wherever he lives to cultivate and possess strong Union Spirit.
* Only Union Spirit is the true patriotism all the nationalities will have to uphold and safeguard.

Lt-Gen Maung Bo inspects regional development in Mon, Kayin States

YANGON, 1 April — Member of State Peace and Development Coun- cil Lt-Gen Maung Bo of the Ministry of Defence arrived at Sittauang Bridge in Mon State on 29 March and heard reports on the facts about Sittauang Bridge, the progress of constructing Kyonpaku Creek Bridge in Winkan Village, Kyakhto Township and village BEPS and village-to-village road.

Afterwards, Lt-Gen Maung Bo together with Mon State Peace and Development Coun- cil Chairman South-East Command Commander Maj-Gen Soe Naing and officials went to the cement plant in Myang Galay and gave necessary instructions to the offi- cials on promoting pro- duction of the plant. On arrival at Barkat model village in Hpa-an, Lt-Gen Maung Bo and party viewed the nurturing of 30,000 physic nut saplings and attended to the needs. After hearing reports by the officials at the brief- ing hall of Barkat river pumping project, Lt-Gen Maung Bo and party in- spected the plantations of physic nut and water sup- ply tasks at the project.

At Hpa-an Government Computer College, Lt-Gen Maung Bo heard the report on progress of con- structing the college and left instructions. It is a three-storey building with 491 feet in length and 231 feet in width and altogether 2,960 students can study at the college on completion. On arrival at Thayokheila Village, he heard reports on the target for the cultivation of monsoon and summer paddy and stressed the need to exceed the target of 500,000 acres of monsoon paddy and 150,000 acres of summer paddy in 2006-2007. Next, Lt-Gen Maung Bo inspected the paddy fields in the village and attended to the needs. Later, Lt-Gen Maung Bo and the commander met with of- ficers and other ranks and their families at the hall of Hpa-an Station. —MNA

**Strive for export promotion**

Under one of the four economic objectives—proper evolution of the market-oriented economic system, the government is rendering all necessary assistance to national entrepreneurs for development of production, trade and service sectors.

Thanks to the encouragement and supervision of the government, coupled with concerted efforts of national entrepreneurs, production, trade and service sectors are meeting with success. The Union of Myanmar Federation of Chambers of Commerce and Industry, which leads and organizes the private sector for success, is now playing a greater role in this field.

The UMFCCI membership has increased to 15,245, with an increase of 1,550 last year. And the federation has now 51 associations as its members, with an increase of seven last year.

Last year, the federation received 573 foreign businessmen, sent 270 members abroad to attend meetings and seminars and 739 members to participate in 29 international trade fairs. As a result, the federation was awarded prizes at those international trade fairs and Miss Talent Award at the Miss ASEAN 2005 beauty contest.

Under the leadership of the federation, the private sector has now contributed 90 per cent to the GDP of the State. The private sector had turnover of US$ 1.3 billion, out of US$ 2.8 billion, accounting for 55.5 per cent of that of the State in 2003-2004 fiscal year, and US$ 2.4 billion accounting for 53.6 per cent to the foreign trade of the State.

The government is practising export and import policy systematically. In this regard, it encourages export and allows necessary goods for import. Hence, since 2002-2003, the nation has seen trade surplus.

Nowadays, the UMFCCI is organizing the entrepreneurs to reclaim virgin and fallow lands to grow cash crops for export. Moreover, steps are being taken for improving the export items.

Therefore, it is incumbent upon the UMFCCI to make the best use of foundations already laid down, while trying its utmost for boosting export.

**Deputy Foreign Minister back from India**

YANGON, 1 April — Deputy Minister for Foreign Affairs U Maung Myint arrived back here by air from India after attending the Sixth Bangladesh-China-India-Myanmar Economic Cooperation, held in New Delhi from 30 to 31 March 2006.

While in New Delhi, the deputy minister met with Mr Rajvi Sikri, Secretary of Ministry of External Affairs of India and Mr P S Goel, Secretary of Department of Ocean Development, and discussed matters on mutual interest.

The deputy minister was welcomed at the Yangon International Airport by officials of Ministry of Foreign Affairs and Mr Manoj Kumar Bharti, Charge d’Affaires of the Embassy of India.

U Kyaw Zaw, Deputy Director-General of Directorate of Investment and Company Administration, U Myint Soe, Director of Economic Division of Department of International Organizations and U Kyaw Thi Wa, Assistant Director, the Ministry of Foreign Affairs also arrived back here together with the deputy minister.

**MyMyanmar Unicode System distributed**

YANGON, 1 April — MyMyanmar Unicode System (Unicode Version 4.1) developed by Mg Htoo Myint Naung, a third year student of Yangon University of Computer Studies was distributed today for computer-users.

Research on the Unicode Version 4.1 was conducted in 2004 and it was introduced to local and foreign computer practitioners at 4th ICCA 2006.

It can be accessed on the website for accounting and drawing of programmes. The Unicode Version 4.1 would contribute to Unicode Version 5.x, development of which is under way. The new item includes Installer, Uniscribe installer and User manual.

Everyone can log the system on www.myanmar.net free of charge.—H

India says nuclear deal will not spark arms race

WASHINGTON, 31 March — India, pressing US congressional approval of a landmark nuclear energy agreement, on Thursday rejected suggestions the deal might provoke a South Asia arms race and reaffirmed its commitment to a voluntary moratorium on atomic weapons testing.

The three-propeller turbine prototype developed by the Italian Bridge of Archimede company, dubbed Kobilob, is even more environmentally friendly because much of its own power comes from 39 solar panels. "The project is a proud achievement for Italy and I'm happy that Messina has become the first city on the planet to receive electrical power from the sea," said Archimede company's president Elio Matacena.

He added: "The marine currents in the Strait which in ancient times sowed terror among sailors today provide an inexhaustible source of energy."

Livio Gallo of Italian energy group Enel said: "Our group has always been at the forefront of research into alternative, clean energy."

"We have several wind farms here in Sicily and we're expecting approval for the innovative Archimede project which for the first time will combine a thermodynamic solar plant with a gas-powered energy plant," he said. MNA/Xinhua

Mugabe blasts Western critics

HARARE, 31 March — Zimbabwe's President Robert Mugabe has blasted Western critics of his controversial policies and rights record, and vowed he will never retreat or surrender to a "neo-colonialist" onslaught.

Mugabe, 82 and at the helm in Zimbabwe since its independence from Britain in 1980, has been at odds with the West, which has led charges of misrule against him.

He is accused of plunging the southern African country into political and economic turmoil by seizing white-owned farms and destroying the key agricultural sector, rigging elections and waging a violent campaign against the opposition.

Speaking at a dinner he hosted for Equatorial Guinea's visiting President Teodoro Obiang Nguema Mbasogo, Mugabe said his government had been targeted by Western powers, particularly Britain and the United States, for empowering Zimbabwe's black majority and resolutely defending its political rights. "We stand by our principles and shall never retreat, capitulate or shirk our responsibility," he said to applause at the dinner attended by hundreds of Zimbabwean officials and some foreign diplomats.

"Those opposed to our principles have enlisted the services of like-minded countries and their leaders, and deceitfully and dishonestly used the media ... vilifying us as undemocratic because we have dared to put the interests of the poor and down-trodden first," he added. — Internet

Drug ring smuggled cocaine in Virgin Mary statues

NEW YORK, 31 March — Two suspects accused of helping smuggle cocaine to New York from Mexico inside statues of the Virgin Mary were arrested on Thursday, US authorities said. Peter Matheis, 52, and Rafael Serrano, 36, both Mexican nationals, were indicted in New York and Houston respectively on money-laundering and narcotics charges along with six others arrested previously in the United States, the Drug Enforcement Administration said.

Five 3-foot-tall (1-metre) statues of the Virgin Mary, filled with 110 kg (242 pounds) of cocaine were seized in a Brooklyn warehouse as part of the police operation.

The drug ring used the statues to smuggle cocaine worth millions of dollars, FBI agent John Gilbride said in a statement.

The DEA said the investigation was continuing in Mexico. — Internet
Iran hopes to solve N-issue through diplomatic talks

Geneva, 31 March— Iranian Foreign Minister Manouchehr Mottaki said here on Thursday that Iran hoped the nuclear issue could be solved through diplomatic negotiations within the framework of the International Atomic Energy Agency (IAEA).

The referral of the nuclear issue to the UN Security Council was a mistake move, which could only weaken the position of the IAEA, Mottaki told reporters after addressing a session of the Conference on Disarmament.

Mottaki said the IAEA had clear concepts for rights and obligations of member states, therefore, it was an appropriate place to look for a settlement of the nuclear issue.

Further importance should be added to the work of the IAEA, so that certain solutions to problems could be found within the agency, he said.

When asked a question on the UN Security Council sanctions against Tehran over the nuclear issue, Mottaki said that “We have readied ourselves to all possible conditions.”

He said, however, under the current conditions, the possibility of sanctions on Iran “does not exist”.

Mottaki also reiterated that Iran would not give up its inalienable right to produce nuclear fuel, noting that Iran’s uranium enrichment activities are in compliance with the nuclear Non-Proliferation Treaty. Iran will continue its sincere cooperation with the IAEA, he said.

Passenger ferry sinks off Bahrain

Cairo, 31 March— At least 51 people died as a passenger ferry, carrying over 130 persons, sank in the Gulf off the coast of Bahrain on Thursday.

A Bahraini Interior Ministry official also announced at a news conference broadcast live on the al-Arabiya TV channel that 63 people were rescued alive, 12 of them sustaining injuries.

The ship capsized and then went down in the sea, said the official, adding that many of the victims were drowned. Dozens of other people were still missing and rescue work was underway with the help of the US Navy’s Fifth Fleet, which is based in Bahrain.

No fire or explosion was reported prior to the incident which occurred about one mile (1.6 kilometers) off the main island of Bahrain, according to the official.

Earlier, a senior Bahraini official told the media that the ship carried employees of a Bahrain-based company on an evening cruise expected to last a couple of hours.

He said that he believed 25 British nationals, 20 Filipinos, 10 Egyptians and a number of Bahrainis were on board.

The exact number of people on board and their nationalities were not immediately clear.

Scientists seek new pesticide alternatives

Tifton, Ga, 31 March— Since the 1940s, methyl bromide has served farmers well as a stunningly lethal fumigant, killing off pests such as fungi, weeds, insects and rodents. But amid requirements that farmers stop using it, University of Georgia students are joining an international effort to find an earth-friendly alternative.

Alex Cisnors, a plant pathologist, and other researchers at the university’s Coastal Plain Experiment Station in south Georgia have been testing an alternative fumigant, metasodium, in a one-quarter acre test plot of vegetables, including tomatoes and squash.

The move to phase out the use of methyl bromide is a result of the United Nations’ 1992 Montreal Protocol, which identified the pesticide as one of many chemicals that damages the stratosphere’s layer of ozone.

Humans would be at greater risk of skin cancer and other health problems if the ozone layer continues to be damaged.

The deadline for the United States and 32 other industrialized countries to stop using methyl bromide was on 1 January, 2005, but the UN agreed to allow “critical exemptions” on a few crops.

Methyl bromide is still used for strawberries and tomatoes, crops for which there is no effective alternative. The alternatives that are being developed may involve using a “cocktail” of chemicals that are more expensive, more costly to apply, less efficient and possibly toxic for days or weeks.

Cisnors said.

Chinese shoemakers oppose EU anti-dumping sanctions

Guangzhou, 31 March— Chinese shoemakers on Thursday reiterated their resolute opposition to European Union anti-dumping duties, pledging further efforts to protect their interests.

The alliance of Chinese shoemakers against the anti-dumping move, comprising many Chinese footwear enterprises, said it is firmly against the sanctions levied upon Chinese-made leather shoes, although the decision was made when EU member states were reported to be split in a vote over the punitive duties on 16 March.

The European Commission (EC) announced last week that it would place anti-dumping duties on leather shoes from China and Vietnam, despite the fact that only three countries voted in favour of the tariffs, ten voted against and 11 abstained.

The duties on Chinese shoes will start at about 4 per cent from 7 April and rise to 19.4 per cent in six months. However, children’s shoes and high-tech sports shoes will be excluded from the tariffs.

The alliance said it disagrees with the EC’s decision to treat Chinese shoemakers as state-nurtured companies and not freely competing market players, and the conclusion that the EU’s footwear industry has suffered losses due to imports of Chinese footwear.

The alliance also stressed that the EC has no grounds to attribute the predicament of some EU companies to the imports of Chinese shoes, and the proposed anti-dumping sanction lacks fairness and legitimacy.

China’s polluting enterprises urged to implement clean-up plans

BEIJING, 31 March — China’s environmental agency on Wednesday urged 21 highly polluting enterprises in the country to honour their pledges to install and upgrade their pollution treatment facilities and stop discharging pollutants into rivers and lakes.

“There have been very positive responses from these enterprises after we made public their illegal activities,” said Pan Yue, deputy director of the State Environmental Protection Administration (SEPA).

On 7 February, SEPA named 11 highly polluting enterprises along rivers and lakes, and 10 projects that were built in contravention of the country’s environmental laws and regulations. SEPA ordered the enterprises and builders of the projects to immediately install and improve pollution treatment facilities or face severe punishment. Pan said that to date, one of the 11 enterprises has upgraded its pollution treatment facilities and now basically meets the country’s environmental standard. Ten others have submitted plans showing how they will improve their pollution controls. The cost of their clean-up plan is expected to reach 400 million yuan (about 49 million US dollars).

New case of H5N1 bird flu confirmed in northern Poland

WARSAW, 31 March — A dead swan in the northern Polish city of Cudziancz was confirmed on Thursday to have been infected with the lethal H5N1 bird flu virus, bringing the total number of bird flu cases in the country to five.

The State Veterinary Institute in Pulawy, central Poland, said on Thursday that the dead swan was tested positive for the deadly bird flu virus on Wednesday during routine tests and further tests on Thursday confirmed the preliminary results.

The four previous cases were discovered in Bydgoszcz, Torun, Kostynz and Swinoujscie respectively with the first case reported on 5 March, in Torun. — MNA/Xinhua

Kazakh man offers car as reward for missing horses

ALMATY, 31 March — A Kazakh farmer is offering a brand-new Japanese off-roader as a reward for his missing herd of horses, media reported on Thursday.

Zhansap Alzhanov’s 45 horses went missing two years ago and he has been trying to find them ever since, state news agency Kazinform reported. “He still believes they can be found,” the agency said, adding that he thought they had been stolen. Horse breeding is an integral part of life for many farmers in the vast steppes of the Central Asian country. Many Kazakhs see the horse as a symbol of their nomadic past and glory dating back to the reign of Genghis Khan. MNA/Reuters

India’s Wipro clinches 80 million-dollar outsourcing deal

BANGALORE, 31 March — India’s third largest software exporter Wipro Ltd has won a 80 million-dollar outsourcing deal from one of the country’s top banks.

Wipro will manage the information technology network of the HDFC Bank, which has 535 outlets across India, the company said in a statement late Friday.

“The contract is valued at approximately 3.6 billion rupees (80 million dollars) over a period of 10 years,” the statement said. Software and customer services outsourced in the country were forecast to grow 25 percent a year by the end of the decade to 60 billion dollars, according to a report released in December by India’s premier software body.

The National Association of Software and Services Companies and consulting firm McKinsey & Co estimated that outsourced services would earn 110 billion dollars worldwide by 2010, and that Indian companies will receive more than half of that business.

In September last year India’s two largest software companies, Tata Consultancy Services and Infosys Technologies, were awarded their largest ever outsourcing contracts by the Dutch-based bank ABN Amro in a deal worth 400 million dollars. — Internet

Moderate earthquake rocks southern Turkey

ANKARA, 31 March — A moderate earthquake measuring 4.7 on the Richter Scale shook southern Turkey’s Mediterranean coast early on Thursday with no casualties and damages reported.

According to Turkey’s Bogazici University and the US Geological Survey, the quake occurred at 1:05 am (2305 GMT on Wednesday) and the epicenter was 100 kilometres off Turkish southern province of Hatay. The quake was felt in Turkish southern province of Antakya as well. Earthquakes are frequent in Turkey, which is located on several seismological fault lines. Two massive quakes killed more than 18,000 people in 1999.

Coal mine gas blast kills five in north China

TAIYUAN, 31 March — Five workers were killed and 11 others injured in a coal mine gas explosion in Zhongyang County, north China’s Shanxi Province, local government sources said Thursday.

The explosion happened at the Sheke Coal Mine around 4 pm Wednesday when 16 workers were carrying out engineering work in the shaft. The blast killed four people on the spot and injuring 12 others, said Pang Pengfeng, head of Zhongyang County Government. — MNA/Xinhua

Iraqi civilian killed in roadside bomb attack in Baghdad

BAGHDAD, 31 March — An Iraqi civilian was killed and two others wounded when a roadside bomb missed a police patrol and struck private cars in central Baghdad on Thursday, an Interior Ministry source said.

“A roadside bomb went off at about 8:50 am (0550 GMT) at Ugha Bin Nafse Square, killing a civilian and wounding two others,” the source told Xinhua on condition of anonymity. The attack apparently targeted a passing-by police patrol that survived the attack, the source said. — MNA/Xinhua

Venezuelan authorities seize 2.1 tons of cocaine

CARACAS, 31 March — Venezuelan authorities seized 2.1 tons of cocaine, which they said were to be smuggled to the European Union or the United States, and arrested two smugglers, a government official said on Wednesday.

Deputy Security Minister Jesus Villegas Solarte told a news conference that the authorities intercepted the cocaine at a farmhouse in Miranda State, in Venezuela’s eastern coastal region. The drug was hidden in a cellar, in 76 small packages.
New case of H5N1 found in Cameroon

YAOunde, 31 March — Cameroon has confirmed its second case of the deadly H5N1 bird flu virus in the city of Malape, the Carne-roaming Ministry of Livestock, Fishing and Animal Industries said Wednesday.

According to the ministry, the virus was detected in a wild duck which was found dead on the lake of Malape not long ago, about 1,000 kilometres north of the capital Yaounde. Test in an Italian lab confirmed the bird was killed by the highly pathogenic H5N1 strain of the virus.

Aboubakari Sarki, minister of livestock, fishing and animal industries, has asked to beef up surveillance of the poultry and animals which are prone to be infected with the bird flu virus in Malape and the Northern Province where the city is located. — MNA/Xinhua

Skywatchers gather to witness solar eclipse

NEW DELHI, 31 March — A partial solar eclipse was witnessed Wednesday across the northern, north-eastern and north-western parts of the country as some places across the world witnessed a total eclipse.

The eclipse, which began at 1103 hours GMT and ended at 1302 hours GMT in the country's capital, was also visible in Indian cities of Amritsar, Bhopal, Kolkata and Chandigarh. The eclipse began in Brazil with sunrise, extended across Atlantic, Libya, Egypt, Central Asia and ended at sunset in Mongolia.

In India, the maximum eclipse was visible at Amritsar with over 27 per cent of sun appearing as sliced during maximum of eclipse between 4.48 pm and 5.46 pm.

Some parts of Brazil, Ghana, Nigeria, Georgia, Kazakhstan and a few other countries saw a total solar eclipse. Partial eclipse was also visible in central parts of India.

"Cities in northwest of India saw a better eclipse since their location is comparatively closer to the path of totality," Director of Research and Academics at the Planetarium Dr Debiprosad Duari said.

Such events had gained in popularity as was evident in large number of people thronging planetaria to see the eclipse, Dr Amitabh Ghosh from the Science Popularization Association of Communicators and Educators said.

Dr N Ratnasree, Director of Nehru Planetarium here where about 600-700 people had gathered to see the eclipse, said "We had expected much more crowd. However, superstitions prevent people from venturing out." But compared to previous years, more people could be seen.

Bird flu vaccine promising in humans

NEW YORK, 31 March— Tests in humans of an experimental vaccine against H5N1 avian influenza (bird flu) show that the vaccine is safe and spurs the immune response needed to protect against the deadly illness. The achievement is reported in The New England Journal of Medicine this week.

Dr John J Treanor, from the University of Rochester Medical Centre in New York, and his associates developed the vaccine, in part, by using the hemagglutinin protein, the “H” in the virus designation, and the neuraminidase protein, the “N” in the virus designation, taken from an avian flu virus that killed a boy in Vietnam in 2004. The vaccine also contains genes derived from a lab flu strain commonly used for seasonal influenza vaccines.

According to Treanor’s team, tests conducted on 451 healthy adults showed that the vaccine was generally well tolerated and produced an immune response that the researchers think may protect against exposure to avian flu.

Roughly half of the volunteers who got the vaccine and a booster shot of the highest dosage of the vaccine developed infection-fighting antibodies that current data suggest would neutralize the virus. The primary value of this vaccine, noted Dr Anthony S Fauci, Director of the National Institute of Allergy and Infectious Diseases, is that the federal government can begin stockpiling a small amount of the vaccine before any human pandemic ever occurs.

Danish “mermaid” likely to be moved out of reach of tourists

STOCKHOLM, 31 March— The Danish capital of Copenhagen may make a decision to move its famous mermaid statue a few metres offshore to avoid vandalism, Danish Press reports reaching here Wednesday.

The 125-centimetre-high bronze sculpture, based on one of Hans Christian Andersen’s fairy tale figures, has been sitting at the edge of the Copenhagen harbour since 1913.

A decision will be made later this year on whether she would be moved further from the shoreline, officials of the city’s roads and parks department said.

The mermaid, which can easily be reached by stepping on a concrete platform and rocks that surround her, attracts some one million tourists from around the world and is also a target of vandalism.

Tourists often climb on the body of the mermaid, officials said.

Once she was even beheaded, and was only able to be repaired because the sculptor creating her was still alive.

According to Andersen’s fairy tale, the mermaid was a mythical sea king’s daughter who fell in love with a prince and had to wait for 300 years to become a human.

Ryanair flight landed at wrong airport

BRUSSELS, 31 March — A Ryanair flight landed at the wrong airport in Northern Ireland after a pilot appeared to have made “a stupid mistake”, Ryanair chief executive Michael O’Leary said on Thursday.

The aircraft, operated by Irish airline Eirjet on behalf of Ryanair also of Ireland, was flying from Liverpool in England to Derry in Northern Ireland on Wednesday but landed instead at a British military base, a few miles away from Derry.

“The pilot seems to have made a stupid mistake,” O’Leary told reporters in Brussels where he was at a promotional event.

“Never in our 20-year year history has an incident like this happened,” Ryanair said in a statement.

Hu Jintao meets heads of seven Japan-China friendship organizations

BEIJING, 1 April — Chinese President Hu Jintao said here on Friday that the seven Japan-China friendship organizations based in Japan, which are making a concerted China visit, are the “backbone forces” in promoting the friendliness between the two countries.

These organizations serve as an “important bridge” for non-governmental exchange between the two countries and have done a lot of “helpful work” for the normalization of diplomatic ties and the promotion of friendliness between the two countries, said the President while meeting the heads of the organizations at the Great Hall of the People in downtown Beijing.

Noting that China-Japan relations are in a difficult period for the time being, Hu said that the Japanese organizations’ current visit and their exchange and dialogue with relevant Chinese bodies have displayed the “benevolent wish” of the two peoples to improve bilateral relations.

The visit will contribute to shoring up mutual understanding, friendship and relations between the two countries, said the President.

The seven organizations, which have come as the guests of the China-Japan Friendship Association, are namely the Japanese Council for the Promotion of International Trade, Association of Dietmen League for Japan-China Friendship, Japan-China Friendship Association, Japan-China Cultural Exchange Association, Japan-China Association on Economy and Trade, Japan-China Society, and Japan-China Friendship Center.

The heads of the organizations include former Japanese prime minister Ryutaro Hashimoto and former foreign minister Masahiko Komura. — MNA/Xinhua

First Turkish team to climb Mt Everest

KATHAMANDU, 1 April — An 11-member expedition team from Turkey plans to scale Mount Everest, the world’s highest peak, this year, a Nepali mountaineering company said here on Friday.

It is the first time a Turkish team attempts to climb Mount Everest, Arun Expeditions said in a statement.

With the slogan “pushing the limits”, the team plans to climb the mountain from its north-east ridge without supplementary oxygen as they hope to explain the effect of altitude on human beings, the statement added.

The team, including a female mountaineer, has already started its preparations by climbing the mountains in Turkey and undergoing training and performance tests. — MNA/Xinhua

US pushes Japan to reopen beef imports

TOKYO, 1 April — Visiting US Commerce Secretary Carlos Gutierrez pushed Japan on Friday to reopen its market on US beef imports, which has been closed in January after a shipment with risky parts was discovered.

“We have the world’s safest food supply,” Gutierrez was quoted by Kyodo News as saying at a breakfast meeting in Tokyo, “we just want the opportunity to demonstrate that we can deliver the best beef in the world with the highest quality and risk standards as Japan requires”.

On 20 January, Japan re-imposed a ban on US beef imports after a backbone part, prohibited under a bilateral agreement, was found in a shipment.

That halt in trade came only a month after Japan eased a two-year ban on US beef from December 2003, after the first US discovery of mad-cow disease, or bovine spongiform encephalopathy.

Japan used to be a major US beef market. In 2002, Japan imported 1.7 billion US dollars’ worth of beef from the country. — MNA/Xinhua

3.69 m travellers expected for Ching Ming Festival

HONG KONG, 1 April — About 3.69 million people are expected to pass through Hong Kong’s immigration checkpoints during the Ching Ming Festival, a traditional Chinese festival, up 8.8 per cent over last year, the Immigration Department said on Thursday.

Among the total, 2.87 million are expected to travel by land, up 9.2 per cent, the department said.

The peak period for passenger traffic will be from 1 to 6 April. About 1.77 million passengers will travel through Lo Wu checkpoint, a daily average of 295,000, up 3.3 per cent.

Departing passengers at Lo Wu are expected to peak at 190,000 on 1 April, while arrivals will peak 2-5 April with 170,000 people returning to Hong Kong. Highest daily traffic is expected to reach 325,000 on 1 April. — MNA/Xinhua

India to keep 8% economic growth

NEW DELHI, 1 April — India is expected to sustain a gross domestic product growth of 8.1 per cent in the fiscal year of 2005-2006 and the next two years, a UN report said on Thursday.

It is a good performance considering the 28 per cent rise in crude oil prices and 26 per cent rise in metal prices, said the UN Economic and Social Survey of Asia and Pacific (ESCAP) 2006 report released here on Thursday.

“Assuming no major internal or external shocks, which could destabilize the economy, it would be possible to sustain real GDP growth rate of 8.0 per cent over 2006-2008, supported by a growth rate of 2.5-3.0 per cent in agriculture added, 8.0 per cent in industry and 8.5 per cent in services,” the report said.

The Indian economy has been benefitted from substantial inflows of foreign investments and the government’s efforts to contain the fiscal deficit despite high public expenditure for employment generation programme, it said.

Driven by a rise in rural incomes and increased spending, leading to a rise in physical and social infrastructure, the industrial and social sectors will keep growth momentum. — MNA/Xinhua

NY to talk free trade with Arab countries

WELLINGTON, 1 April — New Zealand is trying to make another free trade deal, this time with six oil-rich Arab countries, though existing tariffs are already low.

The deal got a kick-start last week when Trade Minister Phil Goff visited trading partners Saudi Arabia and the United Arab Emirates.

Goff said both countries encouraged New Zealand to enter free trade talks with the Gulf Cooperation Council (GCC) comprising Saudi Arabia, UAE, Kuwait, Bahrain, Qatar and Oman. GCC countries no longer negotiate individual deals.

At present, New Zealand exports about 500 million NZ dollars (350 million US dollars) of goods to the region each year, mainly meat and dairy products. New Zealand imports mainly oil-related products worth about 1 billion NZ dollars (700 million US dollars).

A deal would make no difference to rising petrol costs as petrol and oil imports are already tariff-free into New Zealand.

Any drop in petrol prices would depend more on the strength of the New Zealand dollar and market forces, said Goff.

If successful, a deal would remove tariffs of between 4 and 5 per cent paid on most goods going into the region. It could also help New Zealand expand exports into new areas such as information technology, biotechnology and education. It would also stop New Zealand falling further behind rival exporters such as the European Union and Australia.

The GCC countries include six of New Zealand’s top 20 export destinations — Malaysia, the Philippines, Indonesia, Thailand, Singapore and Vietnam. — MNA/Xinhua

Teak plantations, Po Kyar Elephant Camp inspected in Yedashe

Yangon, 1 April—Minister for Forestry Brig-Gen Thein Aung made an inspection tour of the Thagara Teak Jetty in Toungoo (North) Timber Extraction Region in Yedashe Township yesterday morning.

In Yedashe Township, 500 acres of special teak plantation was established in 2004-05, and 900 acres of special teak plantation in 2005-06.

At Po Kyar Elephant Camp in Yedashe Township, Managing Director U Min Latt of Asia Green Travels and Tours Co Ltd reported to the minister on arrival of tourists at the camp, and training being given to the elephants.

While in Yedashe Township, the minister inspected teak saplings and hard wood saplings at Saingya nursery. In Swa, the minister oversaw production process of MKTI Plywood Factory.—MNA

Myanmar cooperating with international NGOs to contain bird flu outbreak

Yangon, 1 April—The Livestock Breeding and Veterinary Department today announced that Myanmar was free from bird flu till February 2006. In February 2006, certain regions in the Central Myanmar saw some cases of chicken deaths. In March, H5N1 virus was detected for the first time in the nation. The disease then spread to various regions of the country. So, 226 townships in Mandalay Division, 70 townships in Sagaing Division, 24 townships in Shan State (East), 43 townships in Shan State (West), 25 townships in Shan State (North), and 63 townships in Shan State (South) were declared as restricted areas. In the affected townships, after designating them as restricted regions by the Livestock Breeding and Veterinary Department, the Ministry of Livestock and Fisheries, under the Ministry of Health and the Ministry of Health and the Livestock Breeding Federation, the Livestock Breeding Cooperative of the Livestock Breeding Development, and Veterinary Department, conduct a two-week programme on detection of avian influenza with the use of modern technology.

In addition, Dr Watanee and Dr J Mac Arthur of USAID from the Mal Health Laboratory in Australia, the Livestock Breeding Development Department in Thailand, and DLD to seek methods for disease control and receive health equipment and lab equipment. FAO regional coordinator Dr Watanee and Dr J Mac Arther of USAID from the US have visited Myanmar twice and collaborated with livestock breeding and veterinary experts to contain the spread. Dr J Mac Arther said that he recognized the enthusiasm cooperation of the Livestock Breeding and Veterinary Department, the Health Department and local authorities, reports on the outbreak to international organizations concerned, and participated in the regional cooperation for the disease control measures.

Bird flu expert Dr Sudarat of the Japan International Cooperation Agency (JICA) who arrived in Myanmar on 28 February will, in cooperation with local experts of the Livestock Breeding and Veterinary Department, conduct a two-week programme on detection of avian influenza with the use of modern technology. In addition, Dr Watanee and expert Dr Prasit who arrived here on 31 March will collaborate with local veterinary surgeons for two weeks for prevention against the spread of the disease.

In the fight against the epidemic in cooperation with the international organizations, the department has so far received medical equipment, lab equipment and public educational posters worth more than US$ 500,000.—MNA

Armed Forces Day Exhibition packed with visitors

Yangon, 1 April—The 61st Anniversary Armed Forces Day Exhibition 2006 continued for the seventh day at the Defence Services Museum on Shwedagon Pagoda Road here from 9 am to 5 pm today.

People from all walks of life including monks visited the exhibition.

At the booths of Triangle Region Command, statue of King Bayinnaung (Tachilek), documentary photos on education sector, developing villages in Shan State (East), health sector of Shan State (East), Women’s Affairs Organization, Maternal and Child Welfare Association, transport and electric power, historic Punmaungsun battle, four major tasks for nation-building endeavours, developing Shan State (East), inspection tour of the Commander of Triangle Region Command, Mohein Operation for drug elimination, inspection tour of State leaders, flourishing of Sasana in Shan State (East) and photos of pagodas in the region of Triangle Region Command and others.

In addition, computer quiz was held at noon at the booth of nation-building endeavours and prizes were presented to the winners. The free exhibition opens till 4 April.—MNA

Lt-Gen Myint Swe unveiled the stone plaque of the ward. The commander and the mayor sprinkled scented water on the plaque. They visited the hospital.

At the ceremony to mark the opening of the Sangha Ward, Lt-Gen Myint Swe delivered a speech and accepted cash donations.

Speaking on the occasion, Lt-Gen Myint Swe said that construction of the Sangha ward at Dalla Township Hospital contributes to health care services for local people and that the ward is being furnished with the basic tailoring course.

In conclusion, Lt-Gen Myint Swe urged all to maintain development of the township and to participate in regional development tasks.

The commander also accepted K 300,000 each donated by Dr Ye Myint Soe and wife Daw May Zaw Khaing and U Htin Aung Kyaw-Daw Pa Pa Wah and family; K 100,000 each by U Wai Lwin and wife, and U Aung Kyaw Myint and wife Daw Ah Mar.

Today’s donations to the medical fund of the Sangha amounted to K 5.3 million.

The Sangha ward measuring 81 feet by 29 feet was constructed at a cost of K 30 million by Dr Naing Win of Kyaw Zeyar Trading Co Ltd.

The commander and the mayor gave speeches.

Manager U Kyaw Than and Pinlaung Township PDC Chairman U Saw Hla Oo reported on arrangements being made for cultivation of crops and producing of agricultural products. Local entrepreneurs also reported on cultivation of local crops and stockpiling and distribution of agricultural products. Afterwards, the minister gave concluding remarks.

On arrival at the camp for construction of Tonhon-Pinlaung Road, one mile and five furlongs from Pinlaung, the commander and the minister heard reports by Superintending Engineer of Public Works U Kyaw Htay on the finding of an axis for building the road.

In the afternoon, they visited Naga Cement Plant project being implemented near Naungtaya Village in Pinlaung Township and inspected arrival of machinery from abroad and left instructions on timely implementation of the project. They then inspected raw materials stored at the plant. Officials presented a report on implementation of the project.

In the afternoon, the commander and the minister met local people and departmental staff of Kalaw, Pindaya and Ywangan, Yaksawk and Nyaungshwe townships at BEMS No 1 in Aungban. The commander and the minister explained rendering of assistance to the production of regional agricultural products. Later, local farmers reported on their agricultural tasks and the commander and the minister fulfilled the requirements. — MNA

Basic tailoring course concludes in Salingyi

The Chairman of Sagaing Division Peace and Development Council Commander of North-West Command, Major Gen Tha Aye delivered an address. The Commander of the Sagaing Division Women’s Affairs Organization Daw Wai Wai Khaing, wife of the commander, presented prizes to three outstanding trainees. Director-General U Than Win of ETD gave certificates to the trainees and handed over sewing machines sold in installment by the PRANRDA Ministry. Altogether 50 trainees attended the course that lasted 14 weeks.

YANGON, 1 April—A ceremony to conclude the basic tailoring course No 1, organized by the Education and Training Department under the Ministry of Progress of Border Areas and National Races and Development Affairs, was held at Women’s Vocational Training School in Salingyi yesterday.

The course was presented to three outstanding trainees.

The commander and the minister accepted donations by well-wishers.

Lt-Gen Myint Swe and party proceeded to the tax-free markets in Yanakin and Tanway Townships and inspected the sale of clothes, foodstuffs and consumer goods of the Ministry of Industry-1 and Ministry of Energy, eggs, chicken, vegetables, mutton, pork, fish and dairy products shops of the Ministry of Livestock and Fisheries, private companies and entrepreneurs, flower shops of social organizations, rice shops of Myanmar Rice Dealers Association, edible oil shops of Myanmar Edible Oil Dealers and grocery, kitchen utensil and other shops in the markets.

Next, Lt-Gen Myint Swe gave instructions to the officials and cordially greeted buyers and sellers in the market.

**Methods on crop drying and quality control explained**

**Yangon, 1 April** — The Myanmar Rice Millers’ Association organized talks on drying paddy and other crops with a demonstration at Thaung Win Hall at No 143 on U Shwe Bin Street, Industrial Zone-1, Hlaingthaya Township, this morning.

Chairman of the Association U Tin Win delivered a speech. General Secretary of the Myanmar Rice Merchants Association Dr Myo Aung Kyaw read out two papers on quality control and post-harvest technology, and dryers suitable for Myanmar, and retired agriculturist U Ba Hein a paper on production of quality strain paddy. The resource persons replied to the queries raised by those present.

In the second session, Managing Director of Trust & Development Co Ltd U Myint Zaw submitted the paper on necessary equipment for the control of crop quality. Manager of Wisara International U San Myint, paper on storage of crops and pest control; U Thaung Win (Thaung Win Industry), paper on crop dryers; and U Tin Oo (Engineering Group), on experiences of paddy dryers, followed by the demonstration.

MRMA Chairman U Tin Win and Vice-Chairman U Ko Ko Gyi presented gifts to the resource persons.

**Vocational training courses conclude in far-flung areas**

**Yangon, 1 April** — The advanced tailoring course No 12 and basic course No 41, and the cookery course No 1 concluded at the hall of Women’s Vocational Training School of the Education and Training Department under the Ministry for Progress of Border Areas and National Races and Development Affairs in Myeik yesterday morning.

Chairman of Taninthayi Division Peace and Development Council Commander of Coastal Region Command Maj-Gen Maung Maung Swe delivered an address.

Eight trainees attended the advanced tailoring course; 27 at the basic tailoring course and 22 at the cookery course.

The closing ceremonies of the advanced and basic tailoring courses were held at Women’s Vocational Training Schools in Lashio, Muse, Kengtung, Tachilek, Monghsat, Loikaw, Hpa-an, Myawady, Ye, Kawthoung, and Maungtaw.

Likewise, advanced and basic tailoring courses, knitting courses, basic weaving courses, and oyster shell painting courses concluded at the same training schools in Haka, Falam, and Mindat in Chin State.

Furthermore, ceremonies to conclude basic and advanced tailoring courses and knitting courses were held in Putao, Bhamo, Tiddim, Kampetlet and Matupi. Likewise, the conclusion of the basic tailoring courses took place in Dunban, Dawphoneyan, Mudon, Leshi, Lahe and Nanyun.

All the courses lasted 14 weeks each.

**Construction beat Army (A) 5-4**

**Yangon, 1 April** — Construction and Army (A) played a 3-3 draw till the full time of the match in the Myanmar League Closing Cup Knockout Football Tournament at Aung San Stadium, here, this afternoon.

After the competitions, Construction moved up to the quarterfinal with a 5-4 win over Army (A) through two silver goals.

During the 90-minute match, striker Soe Thiha Aung scored two goals to the net of Army (A), and Tin Lin Aung also added a third for Construction. By showing series of attacks, strong players of Army (A) Thet Naing, Kyaw Zin Pyo and Naing Ko Hoke shot one goal each. Due to unchanging the result of goal scores till the final whistle, the match entered the extra time.

In the extra time, players of both teams penetrated end to end with zealous efforts and brilliant skills. Former selected player Sun Day Thein and Tin Zaw Moe shot one goal each for Construction. Army (A) was consorted with only one silver equalizer of Nyi Nyi Htwe. Hence, Army (A) scored four goals in total just one goal adrift of Construction.

In the quarterfinal, Construction is to play the winning team to come out from the match between Home Affairs and Sunye.

**Fixture on 2 April:**

Livestock Breeding and Veterinary Department of the Ministry of Livestock Breeding and Fisheries issued a press release on death of chicken in central Myanmar.

1. Death of chicken:

The LBVD carried out restriction and control measures on prevention and control of disease regarding the death of chicken and quails in Shwebo District, Sagaing Division from the first week of February 2006 to 26-3-2006 and Mandalay District, Mandalay Division from 8-3-2006 to 26-3-2006.

(A) Death of chicken/those destroyed

Out of 60,929 fowls at 93 poultry farms, 6,731 died in Shwebo District (Shwebo, KhinU, Kanbalu and YeU) from the time of chicken death to 26-3-2006, altogether 24,836 fowls were culled and buried. In Mandalay District (Pyigyidagun, Amarapura, Chanmyathazi, Chanayethazan, Maha Aungmye and Aungmyethazan) 2,060 fowls died at 99 poultry farms. Therefore, 8,791 fowls died and 120,995 fowls and 560 eggs were destroyed and buried in those districts.

(B) Death of quails and those destroyed

Altogether 1,941 quails at two quail farms in Shwebo District and 115,650 quails in 44 quail farms in Mandalay District and 50,515 eggs were killed/destroyed and buried. Therefore, 8,791 fowls died and 120,995 fowls and 560 eggs were destroyed and buried.

(C) Finding of bird flu virus

After the initial outbreaks in the cull zone in Kanbalu, KhinU, YeU, Pyigyidagun, Amarapura, Chanmyathazi, Chanayethazan, Maha Aungmye and Aungmyethazan Townships, investigation was made at 47 poultry farms. A total of 433 samples (blood, inner organs of the chicken and trachea) were collected and examined through rapid test and HA, HI and PCR processes. The H5N1 virus was detected in 26 samples of 35 chicken farms.

2. Control of disease:

Under the supervision of local authorities the LBVD is taking measures on disease control in the cull zones in cooperation with Health Department, Development Affairs Departments, Myanmar Livestock Breeding Federation and breeders and with the assistance of disease control experts from international organizations. All the fowls in the farms from one kilometre radius of the farm where the virus was found were culled for risk prevention. The destruction included 120,995 fowls, 112,414 quails, 50,515 quail eggs and 560 eggs.

The farms and other materials were sprayed with pesticides. The ban on sale and transport of animals and their products was imposed after the control and restricted and control areas were designated between 3 kilometres and 7 kilometres from the infected farm. It was found that there was no evidence of human and other animal infections from the H5N1. The situation is now under control in affected townships of Mandalay Division.

3. The latest condition up to 26-3-2006:

The disease has been brought under control in Shwebo, KhinU except in Kaboe Village in Kanbalu Township and Mandalay District; control measures continue at Kaboe Village.

4. Cooperation with international organizations:

Regional Coordinator of FAO Dr K Watanabe and Regional Coordinator of USAID of the United States Dr John MacArthur in cooperation with the LBVD made a field trip to the affected areas in Mandalay and Shwebo Districts and took emergency measures on control of the disease. Minister for Livestock Breeding and Fisheries Brig-Gen Maung Maung Thein received the FAO and WHO resident representatives to Myanmar and discussed bird flu control programmes. The Japan International Cooperation Agency (JICA) and a regional laboratory in Australia provided educative posters and laboratory equipment. Myanmar received protective gear, testing kits and others worth about US $ 100,000 provided by FAO, JICA and the regional laboratory in Australia. Three experts from FAO, JICA and DLD of Thailand together with Dr K Watanabe will conduct disease control in Mandalay and Shwebo for two weeks beginning 28-3-2006.

5. Rehabilitation:

Under the programme of the Ministry of Livestock and Fisheries, the Livestock Breeding and Veterinary Department, the Myanmar Livestock Breeding and Fisheries Development Bank and the Myanma Livestock Breeding Federation will jointly take measures for rehabilitation of the affected chicken runs.

6. Regions that have not been infected:

To ensure normal rate of consumption and trade of domestic chickens and chicken products in such regions, State/Division Livestock Breeding and Veterinary Departments will hold coordination meetings and issue animal health certificates to livestock breeders and traders to distribute products with the permission of respective local authorities.

Ministry of Livestock and Fisheries
Tests confirm bird flu virus in Cambodian ducks

PINOM PENSI, 31 March — Tests have confirmed the H5N1 bird flu virus in dead ducks found near Cambodia’s border with Vietnam two weeks ago, a government minister said on Thursday.

More than 100 ducks died of the virus last week, and 59 chickens were culled within a three-kilometre (two-mile) radius of the outbreak in the southern province of Kambot, the same province where two people died of H5N1 last year.

“This makes us worried that the virus will spread to other areas because of our poor health system and bad communications,” Deputy Agriculture Minister Yin Vantotheun told Reuters.

There was no sign of human infection in the isolated village, 85 kilometres (60 miles) south of Phnom Penh, he said.

Since it first surfaced in Southeast Asia in late 2003, five Cambodians have died of H5N1, which scientists fear could mutate into a highly contagious flu that spreads easily from person to person, triggering a pandemic that could kill millions.

Prime Minister Hun Sen kicked off an urgent campaign on Tuesday to revive fishery industry, including share information with their counterparts in the international community.

“We shall also improve intelligence fusion as well as linkages and stronger ties with our neighbour countries,” he said. — MNA/Xinhua

 Philippine military to train more units against terrorism

MANILA, 31 March — The Armed Forces of the Philippines (AFP) will train and create more units to address the local terrorist threat, Chief of Staff Generoso Senga said on Thursday, three days after an improvised bomb blasted a department store in Sulu leaving nine dead and scores wounded.

“Additional counter terrorist units shall be created and trained, specialized and technical training shall be enhanced,” said Senga, adding that some military units have been trained by US forces and dedicated to performing counter-terrorism duties.

Senga reiterated the AFP’s commitment in the global fight against terrorism, including sharing intelligence information with their counterparts in the international community.

“We shall also improve intelligence fusion as well as linkages and stronger ties with our neighbour countries,” he said. — MNA/Xinhua

FAO calls for sustained efforts to revive fishery industry

BANGKOK, 31 March — Continued re-examination and targeting of reconstruction efforts have to install to secure a long-term future for fishery communities, the Food and Agriculture Organization of the United Nations said on Thursday.

One year after the tsunami, people’s basic needs for food, shelter and clothing have been met, yet the recovery of the worst hit fisheries and coastal eco-system calls for a five-to-ten year effort, said the UN organization at a meeting on regional post-tsunami fisheries.

FAO’s representative for Asia and the Pacific He Changchui said in restoring the livelihood of coastal communities, the international community must ensure sustainable development of the fisheries and aquaculture sectors and sound management of the natural resource base such as land, coral reef, mangrove forests and associated fisheries.

Increased concern have been focused on the quantity of vessels and fishing gear supplies need for government and donors.

Among others were the poor quality of boats, perceived inequalities in distribution of fishery and aquaculture inputs, and post-harvest activities and markets.

Derek Staples, senior fishery officer in FAO Bangkok branch, said the key guiding principle for the moment is to adopt fishing management interventions addressing issues like over-fishing and seek solutions to the apparent oversupply of small fishning boats.

Representatives from India, Indonesia, Malaysia, Maldives, Myanmar and Sri Lanka participated in the workshop organized to review progress and reassess need in rehabilitating the fishery sector affected by tsunami. — MNA/Xinhua

Venezuela delays restrictions on US airline flights

CARACAS, 31 March — Venezuela is to postpone the move to drastically cut the number of flights to and from the country by US airlines until 25 April, a government statement on Thursday said.

The restriction was due to come into force on Thursday, but Venezuela has decided to delay it pending negotiations between Venezuela’s National Civil Aviation Agency (INAC) and the US Federal Aviation Authority (FAA), the statement added.

An FAA delegation arrived in Venezuela last Sunday to inspect the country’s main Simon Bolivar Airport and facilities at Venezuela’s largest airline, Aerosur.

Venezuela had planned to ban all flights by Delta and Continental airlines and allow only American Airlines to operate three flights per week.

The threat to stop the flights was made in February following the FAA’s failure to raise Venezuelan airlines above category two security status. The rating causes serious inconvenience to Venezuela, as it means the country’s airlines have to hire extra category one approved staff and aircraft to fly to the United States, America continued to enforce this rule despite an International Civil Aviation Organization report in 2004 saying that Venezuela had restructured and modernized its airlines and security procedures. — MNA/Xinhua

Serbia’s GDP up 6.3% in 2005

BELGRADE, 1 April — Serbia’s gross domestic product (GDP) increased by 6.3 per cent in 2005, higher than the projected 4.5 per cent, the Serbian Statistics Office said on Thursday.

By quarters, the GDP increase in 2005 was 5.6 per cent, 7.3 per cent, 6.4 per cent and 5.9 per cent, said a statement released by the office, adding that Serbia’s GDP increased at an average annual rate of 5.5 per cent from 1999 until 2005.

The economy advanced by a 23.6-per-cent rise in transport services, a 21.9-per-cent increase in trade and a 16.9-per-cent expansion in financial services, said the statement.

China grants 176 GMO biosafety certificates

BEIJING, 1 April — China has granted 176 genetically-modified organisms (GMO) biosafety certificates to domestic and overseas GMO research units since 2002, the Ministry of Agriculture announced on Friday.

Fang Xiangdong, deputy chief of the ministry’s Biosafety Office of Agricultural GMO, said China had beefed up GMO administration since 2004, when the government issued the national regulation on administration of agricultural GMO biosafety in 2002.

China’s GMO biosafety administration covered more than 100 genetically-modified products.

Proposals must undergo five phases for a research unit to qualify for a GMO biosafety certificate, including laboratory tests, controlled environmental tests and production tests, Fang added.

The ministry has taken into consideration biosafety evaluation applications from nearly 60 domestic or overseas GMO research units, with 333 projects already in laboratory tests, 157 projects in environmental tests, and 141 projects in production tests, said Fang.

Under ministry rules, all activities related to GMO in China, including research, experimentation, production and importing, have to receive a biosafety evaluation.

Fang said China had established a range of laws and regulations on GMO biosafety evaluation, and local governments had also tightened biosafety administration.

To date, 28,000 GMO biosafety officials had undergone training on biosafety supervision, and 8,300 of them had executive certificates, said Fang.

The Chinese Government has set new species GMO cultivation as a vital middle and long-term scientific goal, Fang said. The Ministry of Agriculture would raise the priority of GMO development, so as to expand the use of modern technology in agriculture.

Nokia expects strong growth in global mobile phone market

HELSINKI, 31 March — The global mobile phone market is to grow by at least 15 per cent in 2006 due to strong subscriber growth, said Jorma Ollila, chairman and CEO of the world’s largest mobile phone maker Nokia, Thursday at the shareholders’ annual general meeting.

Previously, Nokia estimated that the global mobile phone market volume would grow 10 per cent this year to 795 million units in 2005, the CEO said. But now the estimate is that in the year 2006, the volume will increase globally by 15 per cent to 915 million units.

Furthermore, Nokia expects that there will be three billion mobile phone users in 2008, with much of this growth coming from markets like China, India, South-East Asia and Africa, where penetration levels are still relatively low.

HK to launch digital TV next year

HONG KONG, 31 March — Hong Kong Commerce, Industry & Technology Bureau announced Wednesday it has set up working groups with Asia Television Limited (ATV) and Television Broadcasts Limited (TVB) to ensure the timely and smooth launch of digital services next year.

By Wednesday as part of a new website was launched for digital TV programme service and network rollout.

The Broadcasting Authority has approved the investment plans of ATV and TVB for their digital TV programme service and network rollout.

ATV has committed more than 400 million Hong Kong dollars ($51.28 million US dollars) up to 2009 to provide a hybrid digital service of high-definition television (HDTV) and multi-channel broadcasting, while TVB has committed the same for an HDTV channel starting from the end of next year.

China to see two total solar eclipses in four years

NANNING, 31 March — Chinese will see two total solar eclipses in the next four years, which may offset their regret of only seeing a partial one on Wednesday, said an expert with the Purple Mountain Observatory on Thursday.

The two total solar eclipses will fall on 1 August, 2008 and 11 July, 2009, said Wang Sichao, with the observatory based in Nanjing, East China’s Jiangsu Province. The eclipse in 2008 will be viewed in the Xinjiang Uygur, Tibet and Ningxia Hui autonomous regions, as well as in Qinghai, Gansu, and Sichuan provinces.

The partial solar eclipse on Wednesday will be viewed in Northwest China while the other in 2009 in the populous area along the Yangtze River, according to Wang.

The partial solar eclipse on Wednesday will be viewed in the Xinjiang Uygur, Tibet and Ningxia Hui autonomous regions, as well as in Qinghai, Gansu, and Sichuan provinces.

Huge statue of Mao Zedong en route to Tibet

CHANGSHA, 31 March — A huge, 35-ton statue of late Chinese leader Chairman Mao Zedong en route to Tibet and expected to arrive in Gonggar County in a week.

The statue will be placed on the Changsha Plaza which is under construction in Gonggar County, making it the first plaza in Tibet with a statue of Mao. Changsha, the capital of central-south China’s Hunan Province, donated 6.5 million yuan (about $812,500 US dollars) for the plaza.

The statue measures 7.1 metres tall and is made of quality chiseled stone from Dingzi Township, Wangcheng County of Hunan Province, according to designer Zhu Weijing, who is also head of the Changsha Sculpture Institute.

The statue, which began its journey Monday, will go through five provinces including Hubei, Henan, Shaanxi, Gansu and Qinghai provinces to reach Tibet.

Mao Zedong, born to a farmer’s family on December 26, 1893, was the founder and leader of the Communist Party of China and the People’s Republic of China. He is remembered and revered by people in China and the world.

**FIFA names just 23 referees for 2006 World Cup**

**FRANKFURT, 1 April—** FIFA sprang a surprise on Friday by naming just 23 referees to cover the 64 games of the 2006 World Cup in Germany.

A total of 36 referees officiated at the last World Cup in South Korea and Japan in 2002 and FIFA had been expected to choose around 30 from the 44 on the candidate list.

Instead, FIFA named a seven-strong group of "support" referees who will be present at the tournament but will only officiate in the event of another referee being unable to take charge of a match because of injury or illness, for example.

The 23 referees come from 23 different countries and include well-known figures such as Markus Merk of Germany and Lubos Michel of Slovakia.

Ten of the refs come from UEFA, five from South America, three from CONCACAF, two from Africa, two from Asia and one from Australia.

"The 33rd team at the World Cup—the 23 referees who will be in action in Germany— are currently the best match officials in the world," FIFA President Sepp Blatter said in a statement.

**Fortune released by Manchester United at season's end**

**MANCHESTER (England), 1 April—** Former South Africa international Quinton Fortune is to be released by Manchester United at the end of the season, manager Alex Ferguson said on Friday.

The 28-year-old defender cum midfielder has not played in the first team this season because of a knee injury. He will not have his contract renewed when it expires.

"Quinton Fortune came to see me and asked what his future was going to be," Ferguson told Manchester-based Century Radio.

"I explained the situation to him the best I could, which was not easy because he is such a great lad. "We have a lot of good young players in his position so we are not going to be renewing his contract. "He has been a great servant to us and played some terrific games for us. I think next season he will get a good club."

Ferguson moved to Old Trafford from Atlético Madrid in August 1999. He has made 126 United appearances, scoring 11 goals.

Fortune has contributed to three Premier League title wins, claiming a medal once when he made the required number of appearances.

**Watford hopes nedsive after defeat at Crystal Palace**

**LONDON, 1 April—** Third-placed Watford’s hopes of automatic promotion from the English Second Division were dealt a serious blow by a 3-1 defeat at Crystal Palace on Friday.

Watford have 72 points from 41 matches, six adrift of Sheffield United who visit Stoke City on Saturday.

Leaders Reading (92 points) are already guaranteed a berth in next season’s Premier League.

The top two go up automatically, with the next four going into the promotion playoffs.

Watford went in front through Martin King after 27 minutes at Selhurst Park but the visitors contributed to their own downfall with two own goals in the second half.

**Leaders Anderlecht held at home by Lokeren**

**BRUSSELS, 1 April—** Anderlecht wasted a chance to significantly extend their lead when they were held to a 1-1 home draw by Lokeren in the Belgian First Division on Friday.

Second-placed Standard Liege can cut their deficit from four points to one by beating Excelsior Mouscron in their game in hand on Saturday.

Anderlecht have 59 points with five games left. Standard are four points in front of champions Club Bruges, who travel to Ghent on Saturday. The top two meet in Brussels on 28 April.

Anderlecht received an early double-blows. Argentine striker Nicolas Frutos going off injured before Lokeren took a 12th-minute lead when Hakim Bouchoeur’s drive was deflected into his own net by home defender Hannu Tihinen.

Frutos had scored in every game since joining from Independiente for an undisclosed fee in January.

**Al Ahli, JS Kabylie advance in African Champions League**

**JOHANNESBURG, 1 April—** Holders Al Ahli and former winners JS Kabylie recorded 3-0 wins in their African Champions League secondround, second leg ties on Friday.

Al Ahli clinched a 5-0 aggregate triumph over Kenya’s Tusker FC in Cairo to go through to the last of the knockout rounds. Osama Hosni scored in the first half before Mohamed Abdelwakab and substitute Wael Rizk made sure of victory for the Egyptians in the second.

Tusker missed a late penalty.

Two goals by Hamid Bergaiga and one from Hamza Yacel gave Algerians JS Kabylie a 3-1 aggregate win over Zambia champions ZANACO in Algiers.

**Heinze back in training with after six months**

**LONDON, 1 April—** Manchester United’s Argentina defender Gabriel Heinze has completed his first training session since suffering a cruciate ligament injury in September. Heinze, who picked up the injury in United’s Champions League group stage draw with Villarreal, had been working alone with the club’s fitness coach before doing his first ball-work with teammates on Friday.

United manager Alex Ferguson believes Heinze, who still hopes to make Argentina’s World Cup squad, could play before the end of the season.

“It depends on a lot of things and also what we’re trying to achieve,” Ferguson told the club’s website. “But it is possible that he could be available for the last couple of matches.”—INTERNET

Romania proposes building Black Sea European zone

BUCHAREST, 1 April — Deputies from countries around the Black Sea on Thursday issued a statement, expressing their support for a proposal Romania put forward on building a Black Sea European zone, the Romania Press Agency reported.

At a two-day conference held in Constanta, Romania, on regional cooperation in the Black Sea region, officials from Armenia, Azerbaijan, Bulgaria, Ukraine, Georgia, Greece, Turkey, Moldova and Romania signed an initiative to set up a body to promote regional economic cooperation.

Russian deputies expressed reservations on the proposal and did not sign the statement.

A senior Russian Foreign Ministry official said that such an organization seems to be a duplication of the Black Sea Economic Cooperation Organization founded in 1992.

Romanian Foreign Minister Mihai Razvan Ungureanu said it was necessary to establish such a body because the economic cooperation in the region is fairly weak.

General-Secretary of the Council of Europe Terry Davis shared the Romanian opinion, saying such an organization would boost cooperation in the Black Sea region.

HK supermarket vows to cut plastic bags

HONG KONG, 1 April — Another supermarket chain, China Resources Vanguard, announced here Thursday to reduce distribution of plastic shopping bags.

This is the third voluntary agreement signed after similar agreements with Wellcome and PARKnSHOP in February and March.

China Resources Vanguard pledged to reduce plastic bag distribution at its retail outlets by at least 15 per cent in one year.

Hong Kong Permanent Secretary for Environment, Transport & Works Keith Kwok said the government is pleased to see the three major supermarket chains are committed to reducing plastic bags by about 90 million in a year.

Forecast for Mandalay and neighbouring areas for 2-4-2006: Generally fair weather.

Earthquake report (Issued at 18:00 hours MST Today)

A Strong earthquake of intensity (6.1) Richter Scale with its epicenter outside Myanmar (TAIWAN REGION) about (1700) miles Northeast of Kaba-Aye seismological observatory, was recorded at 06:16 hrs (34) min (40) sec MST on 1st April 2006.
Lt-Gen Myint Swe attends ceremonies to put tarred road, Sangha ward into service in Dalla Township

Yangon, 1 April — Lt-Gen Myint Swe of the Ministry of Defence attended the ceremony to inaugurate repaved Kyanitha Road in Kamakathwe Ward of Dalla Township this morning.

Accompanied by Chairman of Yangon Division Peace and Development Council Commander of Yangon Command Brig-Gen Hla Htay Win and Chairman of Yangon City Development Committee Mayor Brig-Gen Aung Thein Lin, Lt-Gen Myint Swe of the Ministry of Defence viewed the vegetables produced from Yangon Division Vegetables and Poultry Farming Special Zone, at the port building of Nanthida Jetty on Pansodan Street, here.

Officials reported on distribution of the vegetables. Lt-Gen Myint Swe instructed the officials to distribute vegetables to the tax-free markets in Yangon.

Lt-Gen Myint Swe and party proceeded to Dalla, and attended the ceremony to put repaved Kyanitha Road into service in Kamakathwe Ward.

Chairman of Dalla Township Peace and Development Committee U Myint Aung reported on construction of the road.

Commander Brig-Gen Hla Htay Win, Director-General U Aung Win of Department of Human Settlement and Housing Development and Chairman of the road construction committee U Kyaw Hsan formally opened the road.

Kyanitha tarred road measuring 2,576 feet by 12 feet was built at a cost of K 64.5323 million.

Lt-Gen Myint Swe attended the opening ceremony of the Sangha ward at Dalla Township Hospital. Also present were Commander Brig-Gen Hla Htay Win, Mayor Brig-Gen Aung Thein Lin, Vice-Mayor Col Maung Pa and wellwisher Dr Naing Win of Kyaw Zeyar Trading Co Ltd together with locals.

First, the commander, the mayor and the wellwisher cut the ribbon to open the Sangha ward.

Local farmers in Shan State (South) urged to boost agricultural production

Yangon, 1 April — Minister for Industry-1 U Aung Thaung inspected the site chosen for construction of Paunglaung Creek suspension Bridge in Lainki Village, Pinlaung Township, Shan State (South), yesterday morning. Deputy Superintending Engineer U Win Pe of Public Works reported on plans to build the bridge.

Next, Chairman of Shan State Peace and Development Council Commander of Eastern Command Maj-Gen Ye Myint and the minister met service personnel and local people from Pinlaung, Naungtaya and Phekhoon Townships at Pinlaung Township PDC office in Taunggyi District.

First, the commander said measures are being taken for ensuring secure and smooth transport that contributes to the speedy flow of crops and goods between one region and another. So local people are to boost the cultivation of crops and vegetables in order to improve their regional economic, education and health sectors.

In his speech, Minister U Aung Thaung said the State has been building development infrastructures for ensuring secure transport and speedy flow of commodities and uplift of living standard of the local people.

The country is also striving for the development of agriculture as the base and all-round development of other sectors of the economy as well. That is why local people are to increase their agricultural products and if there are surpluses, they are to be distributed to other regions. The government on its part will also take steps to ensure secure and smooth transport in the region. Next, Myanmar Agriculture Service.
