(15)  
Major General F. L. MARTIN,  
*Commanding General, Hawaiian Air Force,*  
*Hickam Field, T. H.*

DEAR FDR: Your letter of November 2, 1941, was very enlightening on the use of Air Force troops in Hawaii. I am happy to learn that in your opinion a satisfactory solution to the problem will be arrived at shortly.

When the new "Standing Operating Procedure" of the Hawaiian Department is published, I would be interested in knowing the policy which it expresses toward air troops and their employment in local defense of air bases. These matters are of vital interest and the decisions reached in Hawaii may set in the solutions of similar situations in the United States or in other theaters.

In your letter you urged that a War Department policy be issued which will prescribe that ground forces assume the responsibility of airborne defense. The broad policy governing local ground defense of air bases has been published in War Department Training Circular No. 47, dated July 18, 1941. Paragraph 10 of this circular states the order of availability of troops for defense, and Air Corps troops are listed in the 4th priority with a notation that their primary mission is operation, maintenance and repair of aircraft. I believe that this is a plain statement of current War Department policy on this matter.

I am appreciative of your efforts to keep me abreast of developments affecting your command.

Yours very truly,

J. H. ARNOLD,  
*Major General, U. S. A.,*  
*Chief of the Army Air Forces.*
