

## ABSTRACT FORM

### INSTRUCTIONS

1. **White paper should be used with a box of the following dimensions: 115 mm wide x 155 mm high. Single space all typing on the form.** Abstracts must be submitted in English. The text of the abstract should be a single paragraph starting with a 3-space indentation. Leave 1 space between last line of address(es) and first line of text. Leave no top or left margin within the box. Use short specific titles. Use standard abbreviations. Give the title in bold uppercase characters. Capitalize the first letter of trade names. Please type the abstract using a point size of preferably 11 or 12 (in any case not smaller than 10). **Please type within the dimensions of the box as noted above.**

2. Your abstract must include a concise, descriptive title, author(s), location where work was done, text and acknowledgments.

3. Your abstract should be of the informative type, containing: (a) a short statement of the study's specific objectives, unless this is given by the title; (b) a brief statement of methods, if pertinent; (c) a summary of the results obtained; (d) a statement of the conclusions. It is NOT acceptable to state: "The results will be discussed".

4. When using abbreviations for compounds, spell them out in full when first mentioned, followed by the abbreviation in parentheses (see sample abstract). Do not abbreviate compounds in the title of the abstract.

5. Spell out any Greek letter in the title. Avoid superscripts and subscripts in the title. Any hand-written symbols must be drawn in black ink. Tables are permitted within the abstract text.

6. Underline only the name of the author who will actually present the paper. Unless otherwise stated, it is assumed that the first named author will be the presenter. The presenting author will receive all future correspondence.

7. **Please remember that your abstract will appear in a 70% reduced form in the Abstract Book exactly as you submit it.** Any erasure smudges, errors, misspellings, poor hyphenations and deviations from good usage will be glaringly apparent in the published abstract. If a mistake is made in typing, type the corrected word on another sheet of paper and very carefully glue over the incorrect word with rubber cement.

8. **The original typed copy of your abstract form (for reduced reproduction by photo-offset in the Abstract Book) must be submitted together with 3 photocopies. Abstracts sent by fax and by e-mail will NOT be accepted, unless the original is sent by express mail.**

9. Please note: **Resubmission of an abstract to make corrections or changes is not possible.**

10. Any question concerning your abstract should be referred to the EUFEPS '98 Secretariat:

### SAMPLE TO SHOW STYLE

#### THE PHARMACOLOGY OF LEUKOTRIENE C4 IN ISOLATED GUINEA-PIG LUNGS

G.C. Folco, C. Omini, G. Brunelli, T. Viganò and F. Berti

Institute of Pharmacology and Pharmacognosy, Via A. del Sarto, 21, 20129 Milan, Italy.

Leukotriene C4 (LTC-4) has been recently identified as an important component of slow reacting substance of anaphylaxis (SRS-A) and considerable work is now in progress to elucidate its physiological role. Since SRS-A has been known to play a major role in a number of immediate hypersensitivity reactions and in anaphylaxis, we decided to investigate the cardiopulmonary potential of LTC-4 with special attention to its capacity to trigger formation of other arachidonic acid (AA) metabolites.....

**New chemical compounds and those that are designated by code must be adequately identified in the abstract, e.g., MJ - 1999: 4-(2-isopropylamino-1-hydroxyethyl) methanesulfonanilide hydrochloride.**
