Title: Federal Emission Guidelines For Existing Municipal Solid Waste Landfills (Small) (40 CFR part 62, subpart GGG) (OMB Control Number 2060-0430, EPA ICR Number 1893.03). This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the

collection of information while this submission is pending at OMB.

Abstract: The Environmental Protection Agency (EPA) is charged under section 111 of the Clean Air Act, as amended, to collect data. The information will be used by Agency enforcement personnel to (1) identify existing sources subject to these standards; (2) ensure that Best Demonstrated Technology is being properly applied; and (3) ensure that the emission control device is being properly operated and maintained on a continuous basis. In addition, records and reports are necessary to enable the EPA to identify landfills that may not be in compliance with these standards. Based on reported information, the EPA can decide which landfills should be inspected and what records or processes should be inspected at the landfill. The records that landfills maintain would indicate to the EPA whether the personnel are operating and maintaining control equipment properly. The type of data required is principally emissions data and would not be confidential. If any information is submitted to the EPA for which a claim of confidentiality is made, the information would be safeguarded according to the Agency policies set forth in 40 CFR, chapter 1, part 2, subpart B.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on November 7, 2002. No comments were received.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 12 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search data sources; complete and review the collection of information;

and transmit or otherwise disclose the information.

Respondents/Affected Entities: 173.

Estimated Number of Respondents: 173.

Frequency of Response: Annually.

Estimated Total Annual Hour Burden: 11,678.

Estimated Total Annual Cost:

\$659,428 includes \$242,000 for Operating and Maintenance costs.

There is a decrease of 3,432 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to recalculations, correction of high estimates of affected landfills, and no new respondents.

Dated: February 21, 2003.

Director, Collection Strategies Division.
