BILLING CODE 6210-01-P

GENERAL SERVICES ADMINISTRATION

Notice of Availability (NOA) of the Record of Decision for the Environmental Impact Statement (EIS) for the Future Master Plan Development for the Centers for Disease Control (CDC) in Chamblee, GA; Record of Decision, Master Plan Expansion for Chamblee Campus Centers for Disease Control, Chamblee, GA

Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969, the Council on Environmental Quality Regulations (40 CFR parts 1500-1508), and GSA Order PBS P 1095.4E.F.2, PBS 1095.4C, ADM 1020.1, GSA has prepared an Environmental Impact Statement (EIS) for the Centers for Disease Control (CDC). The Proposed Action is the implementation of a Master Plan at the Chamblee Campus. The purpose of the EIS is to provide public notice of the Proposed Action and Alternatives, reasonable time for public comment, and to develop and implement mitigation measures based on the impacts identified.

A. Proposed Action

The Centers for Disease Control and Prevention (CDC) is an agency of the U.S. Department of Health and Human Services (HHS) with a critical mission to safeguard the health of the American public through detection, investigation, control, and prevention of communicable diseases. The Proposed Action is the implementation by the CDC of a Master Plan to expand and upgrade facilities at the Chamblee Campus. The Chamblee Campus currently consists primarily of buildings constructed between 1940 and 1993, many of which no longer satisfy the

essential technical needs of CDC programs. Chamblee is one of two primary CDC campuses in the Atlanta Metro Area; the other is the main Roybal Campus and CDC Headquarters at Clifton Road. The Proposed Action would also consolidate leased facilities onto the Chamblee Campus and would accommodate the projected CDC growth at the Chamblee Campus to the year 2010 and beyond.

The Chamblee Campus is home to the National Center for Environmental Health (NCEH) and the Division of Parasitic Diseases (DPD). The Current laboratories at Chamblee Campus operate at a maximum bio-safety level (BSL) of 2 on a bio-safety scale of 1 (lowest) to 4 (highest). Practices, equipment, and facilities at BSL 2 are applicable to clinical, diagnostic, teaching and other facilities in which work is done with moderate-risk agents. The CDC anticipates an increase in personnel at the Chamblee Campus from a current staff of approximately 700 employees to approximately 4,000 in ten years. To accommodate this growth, the Master Plan provides for demolition of 17 outdated buildings, the construction of four new buildings, as well as the renovation of several other buildings on the existing 48.5-acre property. The Master Plan incorporates CDC's current inventory of 245,500 net usable square feet (NUSF) of office and laboratory space. This includes two buildings (#103 and #109) that are currently under construction to replace space from buildings recently demolished. The Master Plan would meet a cumulative need for 706,200 NUSF of space. Additional parking would be required to increase capacity from the current total of 591 spaces to 3,390 spaces at completion of full build-out. Design and construction of specific buildings, associated parking, and support facilities would be based on year-by-year Federal appropriations to fund individual projects. The General Services Administration (GSA) has prepared the EIS for the CDC and is serving as the lead agency for the NEPA process. However, the CDC will be responsible for implementing all aspects of the Proposed Action including, planning, designing, contracting, construction management, physical security, and operations and maintenance for new facilities.

B. Purpose and Need

The purpose of the Proposed Action is to enable the CDC to perform its public health and safety missions effectively and to better utilize Federal property and assets. The need for the
