Respondents/Affected Entities:

Owners or operators of coal preparation plants which process more than 200 tons of coal per day.

Estimated Number of Respondents: 616.

Frequency of Response:

Semiannually.

Estimated Total Annual Hour Burden:

17,162 hours.

Estimated Total Capital and Operations & Maintenance (O & M)

Annual Costs: \$21,700 which includes \$0 annualized capital/startup costs and \$21,700 annual O&M costs.

Changes in the Estimates: There is increase of 1,699 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to more accurate accounting of existing sources subject to NSPS Subpart Y and an adjustment in the reporting frequency.

Title: NSPS for Industrial-Commercial-Institutional Steam Generating Units (40 CFR part 60, subpart Db), OMB Control Number 2060-0072, EPA ICR Number 1088.10. This is a request to renew an existing approved collection that is scheduled to expire on February 28, 2003. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: Owners or operators of steam generating units subject to Subpart Db must make one-time-only notifications of construction/reconstruction, anticipated and actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. They must also submit reports on initial performance test results, monitoring results, and excess emissions. Records must be maintained of startups, shutdowns, malfunctions, and periods when the continuous monitoring system is inoperative, and of various fuel combustion and pollutant emission parameters.

The required notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard, and serve as a record of the operating conditions under which compliance was achieved. The monitoring and excess emissions reports are used for problem identification, as a
