

20590; office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays. For legal questions, Ms. Vivian Philbin, HFL-16, (303) 716-2122, FHWA, 555 Zang Street, Lakewood, CO 80228. Office hours are from 7:45 a.m. to 4:15 p.m., m.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

You may submit or retrieve comments online through the Document Management System (DMS): <http://dmses.dot.gov/submit>. Acceptable formats include: MS Word (versions 95 to 97), MS Word for Mac (versions 6 to 8), Rich Text File (RTF), American Standard Code Information Interchange (ASCII)(TXT), Portable Document Format (PDF), and WordPerfect (versions 7 to 8). The DMS is available 24 hours each day, 365 days each year. Electronic submission and retrieval help and guidelines are available under the help section of the Web site.

An electronic copy of this document may be downloaded by using a computer, modem and suitable communications software from the Government Printing Office's Electronic Bulletin Board Service at (202) 512-1661. Internet users may reach the Office of the Federal Register's home page at: <http://www.nara.gov/fedreg> and the Government Printing Office's web page at: <http://www.access.gpo.gov/nara>.

Background

Section 1115(d) of the TEA-21 (Public Law 105-178, 112 Stat. 107, 156 (1998)) amended 23 U.S.C. 204 to require the Secretary of Transportation and the Secretary of each appropriate Federal land management agency, to the extent appropriate, to develop safety, bridge, pavement, and congestion management systems for roads funded under the FLHP. A management system is a process for collecting, organizing and analyzing data to provide a strategic approach to transportation planning, program development, and project selection. Its purposes are to improve transportation system performance and safety, and to develop alternative strategies for enhancing mobility of people and goods.

The roads funded under the FLHP include, but are not limited to, Park Roads and Parkways, Forest Highways, Refuge Roads, and Indian Reservation Roads. The Secretary of Transportation delegated to the FHWA the authority to serve as the lead agency within the U.S. Department of Transportation to administer the FLHP (see 49 CFR

1.48(b)(29)). This rulemaking action addresses the management systems for the Fish and Wildlife Service (FWS) and the Refuge Roads program.

On September 1, 1999, the FHWA issued an advance notice of proposed rulemaking (ANPRM) to solicit public comments concerning development of this proposed rule pertaining to the FWS and the Refuge Roads program (64 FR 47741). The ANPRM requested comments on the feasibility of developing a rule to meet both the transportation planning and management systems requirements of the TEA-21. Therefore, comments made to the docket addressed both transportation planning and management systems issues. However, the FHWA has decided to publish separate NPRMs for transportation planning and management systems. For this reason, this NPRM concerns only the development of the management systems. This NPRM includes responses to the comments submitted to the docket on the ANPRM that addressed the proposed development of the four management systems. Those comments on the ANPRM that addressed transportation planning will be addressed at a later date. The FHWA received comments addressing the management systems from various State Departments of Transportation. These comments are summarized below. Specific comments may be obtained by reviewing the materials in the docket.

Based on the comments on the ANPRM, the FHWA has developed this NPRM to provide for the development and implementation of pavement, bridge, safety, and congestion management systems for transportation facilities serving the Refuge System funded under the FLHP. Separate NPRMs on management systems have also been developed for the National Park Service (NPS) and the Park Roads and Parkways program, the Forest Service (FS) and the Forest Highway program, and the Bureau of Indian Affairs (BIA) and the Indian Reservation Roads program. The other three related NPRMs are published elsewhere in today's **Federal Register**.

On April 21, 2000, then President Clinton issued Executive Order (EO) 13148, Greening the Government Through Leadership in Environmental Management. This EO requires all Federal agencies to implement an environmental management system (EMS) to ensure that agencies develop strategies to support environmental leadership in programs, policies, and procedures and that senior level managers explicitly and actively endorse these strategies. The EO

requires that agencies implement an EMS no later than December 31, 2005. Furthermore, in an April 1, 2002, letter, the Bush Administration encouraged all agencies to promote the use of EMS in Federal, State, local, and private facilities and directed the Environmental Protection Agency (EPA) to report annually on how well each agency has done in promoting EMS.

The FHWA has already begun working toward establishing an EMS. Additionally, the FHWA is working with the American Association of State Highway and Transportation Officials' (AASHTO) Center for Environmental Excellence to include EMS as part of an environmental stewardship demonstration project. The FHWA is currently providing technical and financial assistance to the Center, which in turn supports States that have initiated EMSs.¹ Furthermore, the FHWA continues to demonstrate environmental stewardship by encouraging the use of EMS in the construction, operation, and maintenance of transportation facilities.

Although an EMS may have some overlap with the four management systems that are the subject of this proposed rulemaking, the FHWA has decided not to incorporate the EMS in this rulemaking. The FHWA believes that great progress has been made on the EMS and promoting the use of EMS by the States. In addition, the FHWA has a long-standing working relationship with the Federal Land Management Agencies (FLMAs) through the Federal Lands Highway Program. The natural resource conservation and preservation missions of these agencies have led to the development of a jointly held environmental ethic that pervades transportation project decision-making through the use of context sensitive design, best management practices, and a heightened sensitivity to environmental impacts. This relationship provides a strong foundation for the FHWA to encourage the use of environmental management systems by the FLMAs. For example, the National Park Service currently has an initiative underway to implement a service-wide EMS approach. The FHWA and the NPS can evaluate ways to coordinate the use and development of the EMS with the transportation management systems through the joint development of the management system implementation plan called for in this

¹ More information on how EMS applies to transportation organizations can be found on the AASHTO's Center for Environmental Excellence Web site at the following URL: <http://itre.ncsu.edu/AASHTO/stewardship>.
