

surface water entering the area from regional canals. The proposed redistribution of freshwater flow across a broad front is expected to restore or enhance freshwater wetlands, tidal wetlands, and nearshore bay habitat.

The study will evaluate alternatives based on their ability to improve water deliveries to the natural system, protect and conserve water resources, protect or restore fish and wildlife and their associated habitat, restore and manage wetland and associated upland ecosystems, sustain economic and natural resources, improve water quality, and other performance criteria being developed by the Project Delivery Team.

d. Preliminary Alternatives: Additional alternatives will be drafted which may be revised pending model results and public feedback.

The Environmental Impact Statement (EIS) for the project will include an evaluation of adverse environmental impacts, including but not limited to, water quality, socio-economic, archaeological and biological. In addition to adverse impacts, the evaluation will also focus on how well the plans perform with regard to specific performance measures.

e. Issues: The EIS will address the impacts concerning freshwater overland flow into Biscayne Bay; and water quality, particularly in the estuaries and receiving waters of Biscayne Bay and the reef tract.

The EIS will also address environmental issues, such as: Flood protection; aesthetics and recreation; fish and wildlife resources, including protected species; cultural resources; and other impacts identified through scoping, public involvement, and interagency coordination.

f. Scoping: A scoping letter and public workshops will be used to invite comments on alternatives and issues from Federal, State, and local agencies, affected Indian tribes, and other interested private organizations and individuals.

Public meetings will be held over the course of the study; the exact location, dates, and times will be announced in public notices and local newspapers.

g. DEIS Preparation: The integrated draft PIR, which will include a draft EIS, is currently scheduled for publication in July 2005.

Dated: February 21, 2003.
