## II. Background and Statutory Findings

In the **Federal Register** of January 2, 2003 (68 FR 103) (FRL-7282-5), EPA issued a notice pursuant to section 408 of FFDCA, 21 U.S.C. 346a, as amended by FQPA (Public Law 104-170), announcing the filing of a pesticide petition (PP 2E6366) by IR-4, Center for Minor Crop Management, Rutgers, The State University of New Jersey, 681 U. S. Highway #1 South, North Brunswick, NJ 08902-3390. That notice included a summary of the petition prepared by Bayer CropScience, the registrant.

The petition requested that 40 CFR 180.415 be amended by establishing a tolerance for residues of the fungicide fosetyl-Al, aluminum tris (O-ethylphosphonate), in or on onion, green at 10 parts per million (ppm). There were no comments received in response to the notice of filing.

Section 408(b)(2)(A)(i) of the FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is “safe.” Section 408(b)(2)(A)(ii) of the FFDCA defines “safe” to mean that “there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.” This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of the FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to “ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue....”
