

competitive energy production choices. TVA's integrated resource plan, Energy Vision 2020, identified the need for a flexible range of options and alternatives to meet, among other things, the Tennessee Valley region's new base-load power supply needs through the year 2020. Recent record-breaking energy demands in the Tennessee Valley have reinforced TVA's obligation to provide ample safe, economic, reliable, and environmentally responsible sources of electric power. Fulfilling this responsibility, TVA seeks to maintain a robust and flexible range of generating options. These uncertainties, and the delay due to the extended construction inactivity at the site, provide good cause for extending the construction permits for Bellefonte Nuclear Plant, Units 1 and 2.

The NRC notes that there is renewed interest in completing at least Bellefonte Unit 1, possibly with financial assistance from outside parties. Recent NRC inspections have also verified that TVA is appropriately maintaining the Bellefonte units in a condition for continuation of construction and ultimate licensing for operation.

II

The NRC staff has concluded that good cause has been shown for the delays, the extensions are sought for a reasonable period, and this action involves no significant hazards consideration. The basis for these conclusions is given in the staff's Safety Evaluation.

The NRC staff has prepared an Environmental Assessment and Finding of No Significant Impact, which was published in the **Federal Register** on January 24, 2003 (68 FR 3571). Pursuant to 10 CFR 51.32, the Commission has determined that extending the construction completion dates will have no significant impact on the environment.

For further details with respect to the proposed action, see the licensee's letter dated July 11, 2001. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR

Reference staff by telephone at 1-800-397-4209 or 301-415-4737, or by e-mail to pdr@nrc.gov.

III

It is hereby ordered that the latest construction completion date for Construction Permit No. CPPR-122 is extended to October 1, 2011, and the latest construction completion date for Construction Permit No. CPPR-123 is extended to October 1, 2014.
