¹ A Revision Checklist is a document that addresses the specific changes made to the Federal regulations by one or more related final rules published in the **Federal Register**. EPA develops these checklists as tools to assist States in developing their authorization applications and in documenting specific State analogs to the Federal regulations. For more information see EPA's RCRA State Authorization Web page at <http://www.epa.gov/epaoswer/hazwaste/state>.

² A "RCRA Cluster" is a set of Revision Checklists for Federal rules promulgated between July 1 and June 30 of any given year.

2. Additional Requirements for Universal Waste Handlers of Hazardous Waste Lamps

In the preamble of the July 6, 1999 Universal Waste Rule for hazardous waste lamps (64 FR 36466 *et seq.*), EPA stated that the Agency will consider authorization of State programs that include provisions for controlling the treatment or crushing of universal waste lamps, if the State program can be shown to be equivalent to the Federal prohibition (see p. 36478, column 1). Virginia has adopted and is seeking authorization for requirements at 9 VAC sections 20–60–273.B.3.b and 20–60–273.B.3.c which allow universal waste handlers to crush universal waste lamps at the site of generation in order to reduce their volume before transportation. Virginia's lamp crushing regulations include technical requirements for controlling emissions of hazardous constituents to levels established by the Federal Occupational Safety and Health Administration (OSHA), and specific operational recordkeeping requirements. EPA has reviewed Virginia's universal waste lamp regulations and has determined that the State's requirements are at least as protective as, and therefore equivalent to, the Federal prohibition on the treatment of universal waste lamps. Therefore, EPA grants Virginia final authorization for its universal waste

lamp regulations, which provide for lamp crushing.

3. Miscellaneous Changes

In addition to adopting Federal program revisions by means of updating the effective date of the incorporation by reference of the Code of Federal Regulations to July 1, 2001, Virginia has made various additional regulatory revisions since its first program revision application. Virginia is seeking authorization for these miscellaneous changes, which became effective March 13, 2002. Among these changes, Virginia reorganized its permit procedures by deleting Part XI (9 VAC 20–60–960 through 9 VAC 20–60–1250) and expanding, as appropriate, the coverage of 9 VAC 20–60–270. Virginia has also adopted the Federal provisions of 40 CFR 260.30 and 260.31 at 9 VAC 20–60–1390 A 2 and 20–60–1390 B respectively, which provide for a petition process for waste variances from classification as a solid waste; and revised various cross-references, principally to conform to the deletion of Part XI. Additional miscellaneous changes are listed following this paragraph. Regulatory citations annotated with an asterisk are deemed to be more stringent than the Federal program. EPA has evaluated the miscellaneous changes described in this section and has determined that they are consistent with and no less stringent

than the corresponding Federal regulations.
