### National Emission Standards for Hazardous Air Pollutants for Primary Aluminum Reduction Plants

AGENCY: Environmental Protection Agency (EPA).

**ACTION:** Proposed rule; amendments.

**SUMMARY:** On October 7, 1997, the EPA issued national emission standards for primary aluminum reduction plants under section 112 of the Clean Air Act (CAA). This proposal would amend the existing rule by revising the emission limits for polycyclic organic matter applicable to one potline subcategory. The proposed amendments would also revise the compliance provisions by clarifying the dates by which all plants must meet the rule requirements and adding provisions specifying the time allowed to demonstrate initial compliance for a new or reconstructed potline, anode bake furnace, or pitch storage tank as well as an existing potline or anode bake furnace that has been shutdown and subsequently restarted. We are proposing these amendments to reduce compliance uncertainties and improve understanding of the final rule requirements.
