7 CFR Part 989

[Docket No. FV03-989-3 IFR]

Raisins Produced From Grapes Grown in California; Reduction in Production Cap for 2003 Diversion Program

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule reduces the production cap for the 2003 diversion program (RDP) for Natural (sun-dried) Seedless (NS) raisins from 2.75 to 2.0 tons per acre. The cap is specified under the Federal marketing order for California raisins (order). The order regulates the handling of raisins produced from grapes grown in California and is administered locally by the Raisin Administrative Committee (RAC). Under a RDP, producers receive certificates from the RAC for curtailing their production to reduce burdensome supplies. The certificates represent diverted tonnage. Producers sell the certificates to handlers who, in turn, redeem the certificates with the RAC for raisins from the prior year's reserve pool. The production cap limits the yield per acre that a producer can claim in a RDP. Reducing the cap for the 2003 RDP is expected to bring the figure in line with anticipated 2003 crop yields.

DATES: Effective March 20, 2003. Comments received by April 3, 2003, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW., STOP 0237,

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 989 (7 CFR part 989), both as amended, regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any

handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule reduces the production cap for the 2003 RDP for NS raisins from 2.75 to 2.0 tons per acre. The cap is specified in the order. Under a RDP, producers receive certificates from the RAC for curtailing their production to reduce burdensome supplies. The certificates represent diverted tonnage. Producers sell the certificates to handlers who, in turn, redeem the certificates with the RAC for raisins from the prior year's reserve pool. The production cap limits the yield per acre that a producer can claim in a RDP. Reducing the cap for the 2003 RDP is expected to bring the figure in line with anticipated 2003 crop yields. This action was recommended by the RAC at a meeting on January 29, 2003. An interim final rule modifying provisions of the raisin diversion program was published in the **Federal Register** on January 28, 2003 (68 FR 4079).

Volume Regulation Provisions

The order provides authority for volume regulation designed to promote orderly marketing conditions, stabilize prices and supplies, and improve producer returns. When volume regulation is in effect, a certain percentage of the California raisin crop may be sold by handlers to any market (free tonnage) while the remaining percentage must be held by handlers in a reserve pool (reserve) for the account of the RAC. Reserve raisins are disposed of through various programs authorized under the order. For example, reserve raisins may be sold by the RAC to handlers for free use or to replace part of the free tonnage they exported; carried over as a hedge against a short
