

submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (volume 65, number 70; pages 19477-78), or you may visit <http://dms.dot.gov>.

General Information

You may contact the Dockets Facility by phone at (202) 366-9329, for copies of this proposed rule or other material in the docket. All materials in this docket may be accessed electronically at <http://dms.dot.gov/search>. Once you access this address, type in the last four digits of the docket number shown at the beginning of this notice (in this case 7666), and click on search. You will then be connected to all relevant information.

FOR FURTHER INFORMATION CONTACT:

Mike Israni by phone at (202) 366-4571, by fax at (202) 366-4566, or by e-mail at mike.israni@rspa.dot.gov, regarding the subject matter of this proposed rule. General information about the RSPA/OPS programs may be obtained by accessing RSPA's Internet page at <http://RSPA.dot.gov>.

SUPPLEMENTARY INFORMATION: RSPA/OPS published a proposed rule on pipeline integrity management in high consequence areas for gas transmission pipelines on January 28, 2003 (68 FR 4278). That notice provided a 60-day comment period ending on March 31, 2003. By petition dated March 6, 2003, the American Gas Association (AGA), the American Public Gas Association (APGA), and the Interstate Natural Gas Association of America (INGAA) requested that the comment period be extended by 60 days, from March 31, 2003, to May 30, 2003.

In the petition, the associations argue that because the proposed rule is lengthy and complex, additional time is necessary to analyze the proposal and prepare comments. The petition also refers to the public meeting on March 14, 2003, where OPS will discuss the proposed rule. The associations maintain it will take time for them to inform their member companies about the discussions at the meeting so that the companies can use the information in developing their comments.

RSPA/OPS has decided to extend the comment period in light of the request and the complexity of this proposed rule. RSPA/OPS does not consider that a 60-day extension is necessary. A statutory requirement (Pipeline Safety Improvement Act of 2002, 49 U.S.C. 60109(c)) requires us to publish the final rule by December 17, 2003. A 60-day extension of the comment period would

not allow us to meet this statutory deadline. A 30-day extension provides 45 days after the public meeting for interested parties to submit comments.

RSPA/OPS believes that an extension of the comment period by 30 days from the existing closing date (March 31, 2003) is reasonable; the comment period is hereby extended to April 30, 2003.

Issued in Washington, DC on March 13, 2003.

Stacey L. Gerard,

Associate Administrator for Pipeline Safety.

RIN 2137-AD70

Security Requirements for Motor Carriers Transporting Hazardous Materials

ACTION: Notice.

SUMMARY: This notice advises the public that the Research and Special Programs Administration (RSPA) has assumed the lead role from the Federal Motor Carrier Safety Administration (FMCSA) for rulemaking addressing the security of motor carrier shipments of hazardous materials. On July 16, 2002, the two agencies published a joint advance notice of proposed rulemaking (ANPRM), requesting comments on technological and operational measures to enhance hazardous materials transportation security. Because the Homeland Security Act of 2002 provides RSPA with enhanced authority to regulate hazardous materials transportation security, RSPA will lead further rulemaking development on this subject.

DATES: This notice is effective March 19, 2003.

ADDRESSES: You can mail, fax, hand deliver or electronically submit written comments to the U.S. Department of Transportation, Dockets Management Facility, Room PL-401, 400 Seventh Street, SW., Washington, DC 20590-0001, FAX (202) 493-2251, on-line at <http://dmses.dot.gov/submit>. You must include in your comment the docket number that appears in the heading of this document. You can examine and copy all comments at the above address from 9 a.m. to 5 p.m., EDT, Monday through Friday, except Federal holidays.

You can also view all comments or download an electronic copy of this document from the DOT Docket Management System (DMS) at <http://dms.dot.gov/search.htm> by typing the last five digits of the document number appearing at the heading of this document. The DMS is available 24 hours each day, 365 days each year. You can get electronic submission and retrieval help and guidelines at the "Help" section of the Web site. If you want us to notify you that we received your comments, please include a self-addressed, stamped envelope or postcard, or print the acknowledgement page that appears after submitting comments on-line.

FOR FURTHER INFORMATION CONTACT:

Susan Gorsky, Office of Hazardous Materials Standards, Research and Special Programs Administration, 202-366-8553.

SUPPLEMENTARY INFORMATION: On July 16, 2002, FMCSA and RSPA published a joint ANPRM entitled "Security Requirements for Motor Carriers Transporting Hazardous Materials" (67 FR 46622). In the ANPRM, RSPA and FMCSA sought information on the feasibility of imposing specific security requirements on motor carriers that transport hazardous materials in commerce. The ANPRM noted that certain government agencies, including the Department of Defense, the Department of Energy, and the Nuclear Regulatory Commission, as well as some private companies, employ rigorous security measures to protect sensitive shipments and suggested that some of these security measures could also be appropriate for broader application to commercial motor carrier shipments of hazardous materials. In addition, the ANPRM described technological solutions for tracking shipments, communicating with drivers, or securing shipments within trailers that can protect shipments from hijacking or provide an early indication of a potential security problem. The ANPRM asked for comments on the feasibility of mandating technological or operational measures such as escorts, vehicle tracking and monitoring systems, emergency warning systems, remote shut-offs, direct short-range communications, and advance notification of shipments to state and local authorities. After an extension, the comment period for the ANPRM closed November 15, 2002. Comments received in response to the ANPRM are accessible through DOT's Dockets Management System under Docket No. FMCSA-01-11650 (HM-232A).
