

1511, P-1518 (indicator well), and P-1528, and to abandon in place the associated 4-inch-diameter well lines. The locations of the project facilities are shown in Appendix 1.² The abandonment of the wells and well lines would involve dismantling and removing the appurtenances at the well heads, including meters, valves, drips, and associated piping. The well lines connecting the wellhead to Line S-52 would be disconnected, purged, capped, and abandoned in place. The applicant states that deliverability from the wells has decreased over time, primarily due to deterioration of the facilities and they are not necessary for the continued operation of the storage field. All project components are located in the Summit Heights Mobile Home Park in Summit Township. All work would take place within the existing well sites and National Fuel's 35-foot-wide permanent right-of-way (ROW). No nonjurisdictional facilities are involved.

Land Requirements for Construction

The project area encompasses a total of approximately 1.19 acres of land, including the three well pad work areas and a 35-foot-wide ROW associated with each of the three well lines. Work space will be confined to National Fuel's existing 35-foot-wide permanent ROW and the three wellhead areas. No access roads other than public roadways and roadways within the Summit Heights residential community will be required to complete the proposed project. No improvements to these roads will be required for the proposed activities.

Following completion of the abandonment project, National Fuel would allow the easements associated with the permanent ROWs to revert back to the use of property owners in Summit Heights Mobile Home Park. The construction workspaces would be restored and allowed to revert to their previous land use and vegetative cover.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires the Commission to discover and address

concerns the public may have about proposals. This process is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the proposed abandonment project under these general headings:

1. Geology and soils
2. Land use
3. Water resources, fisheries, and wetlands
4. Cultural resources
5. Vegetation and wildlife
6. Air quality and noise
7. Endangered and threatened species
8. Hazardous waste
9. Public safety

We will also evaluate reasonable alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas. Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section below.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal, and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow

these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your letter to: Magalie R. Salas, Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426.
- Label one copy of the comments for the attention of Gas Branch 3.
- Reference Docket No. CP03-49-000.
- Mail your comments so that they will be received in Washington, DC on or before April 14, 2003.

Please note that we are continuing to experience delays in mail deliveries from the U.S. Postal Service. As a result, we will include all comments that we receive within a reasonable time frame in our environmental analysis of this project. However, the Commission strongly encourages electronic filing of any comments or interventions or protests to this proceeding. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at <http://www.ferc.gov> under the "e-Filing" link and the link to the User's Guide. Before you can file comments you will need to create a free account which can be created by clicking on "Login to File" and then "New User Account."

We may mail the EA for comment. If you are interested in receiving it, please return the Information Request (Appendix 3). If you do not return the Information Request, you will be taken off the mailing list.

Becoming an Intervener

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding known as an "Intervener." Interveners play a more formal role in the process. Among other things, Interveners have the right to receive copies of case-related Commission documents and filings by other Interveners. Likewise, each Intervener must provide 14 copies of its filings to the Secretary of the Commission and must send a copy of its filings to all other parties on the Commission's service list for this proceeding. If you want to become an Intervener you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see Appendix 2).⁴ Only Interveners have the right to seek rehearing of the Commission's decision.

Affected landowners and parties with environmental concerns may be granted

² The appendices referenced in this notice are not being printed in the **Federal Register** nor will they be available on the Commission's website. Copies are available from the Commission's Public Reference and Files Maintenance Branch, 888 First Street, NE., Washington, DC 20426, or call (202) 502-8371. Copies of the appendices were sent to all those receiving this notice in the mail.

⁴ Interventions may also be filed electronically via the Internet in lieu of paper. See the previous discussion on filing comments electronically.
