SUPPLEMENTARY INFORMATION:

Background

On October 9, 2002, we proposed to designate approximately 170 ha (420 ac) of land in three units in Ventura and Santa Barbara counties as critical habitat for *Astragalus pycnostachyus* var. *lanosissimus* (67 FR 62926). We accepted public comments on this proposed rule until December 9, 2002. Private lands comprise approximately 33 percent of the proposed critical habitat, and State lands comprise 67 percent. No Federal lands are proposed for inclusion. No federally listed animal species are known to occur on the proposed critical habitat units.

Critical habitat receives protection from destruction or adverse modification through required consultation under section 7 of the Endangered Species Act of 1973, as amended (Act), with regard to actions carried out, funded, or authorized by a Federal agency. Section 4(b)(2) of the Act requires that we designate or revise critical habitat on the basis of the best scientific and commercial data available, after taking into consideration the economic and any other relevant impact of specifying any particular area as critical habitat. Based upon the previously published proposal to designate critical habitat for *Astragalus pycnostachyus* var. *lanosissimus*, we have prepared a draft economic analysis of the proposed critical habitat designation. The economic analysis shows that the proposed designation is not likely to result in any consultation costs pursuant to section 7 of the Act. As a result, the analysis concluded that the potential economic cost attributed to the proposed designation is expected to be \$0. The draft analysis is available on the Internet and from the mailing address in the **ADDRESSES** section above. We are reopening the comment period to allow all interested parties to comment simultaneously on the proposed rule and the associated draft economic analysis.

Public Comments Solicited

If you wish to comment, you may submit your comments and materials concerning this proposal by any of several methods:
