Proposed Use:* Despite dramatic
reductions in blood-lead levels over the
past 15 years, lead poisoning continues
to be significant health risk for young
children. The Third National Health and
Nutrition Examination Survey suggests
that the greatest risk exists for children
under the age of two. The developmentof a viable national strategy for the
primary prevention of lead poisoning in
these young children is a difficult task.
The City of Milwaukee has enacted an
ordinance requiring owners of pre-1950
rental properties in two target
neighborhoods to carry out specified
essential maintenance practices and
standard treatments by April 30, 2000.
The purpose of this information
collection activity is to evaluate the
feasibility, costs, and effectiveness (in
terms of reducing residential dust-lead
levels and preventing elevated blood-
lead levels in children under two years
of age) of the comprehensive primary
prevention program being conducted in
the two target Milwaukee
neighborhoods. The collection
information will be used as vital input
for developing a viable national strategy
for the primary prevention of childhood
lead poisoning.This information collection will
involve conducting brief on-site
interviews of tenants, conducting visual
inspections of rental units, collecting
dust-wipe samples for lead analysis
from selected floor and window sill
locations, and obtaining blood-samples
from study subjects. If appropriate, the
results of this information collection
will be used to improve existing HUD
guidance for primary prevention lead-
hazard control activities.*Agency Form Numbers:* Not
