

standard specified in paragraph (b)(1)(i) of this section;

(D) For purposes of determining compliance with the 85 percent standard specified in paragraph (b)(1)(ii) of this section, all articles that conform to the production standards set forth in § 10.243(a)(4) must be considered, regardless of the HTSUS subheading under which they were entered;

(E) Fabric components and fabrics that constitute findings or trimmings are not to be considered in determining compliance with the 75 or 85 percent standard specified in paragraph (b)(1)(i) or paragraph (b)(1)(ii) of this section;

(F) Beginning October 1, 2003, in order for articles to be eligible for preferential treatment in a given year, a producer of, or entity controlling production of, those articles must have met the 75 percent standard specified in paragraph (b)(1)(i) of this section during the immediately preceding year. If articles of a producer or entity controlling production fail to meet the 75 percent standard specified in paragraph (b)(1)(i) of this section during a year, articles of that producer or entity controlling production:

(1) Will not be eligible for preferential treatment during the following year;

(2) Will remain ineligible for preferential treatment until the year that follows a year in which articles of that producer or entity controlling production met the 85 percent standard specified in paragraph (b)(1)(ii) of this section; and

(3) After the 85 percent standard specified in paragraph (b)(1)(ii) of this section has been met, will again be subject to the 75 percent standard specified in paragraph (b)(1)(i) of this section during the following year for purposes of determining eligibility for preferential treatment in the next year.

(G) A new producer or new entity controlling production, that is, a producer or entity controlling production who did not produce or control production of articles that were entered as articles described in § 10.243(a)(4) during the immediately preceding year, must first establish compliance with the 85 percent standard specified in paragraph (b)(1)(ii) of this section as a prerequisite to preparation of the declaration of compliance referred to in paragraph (c) of this section;

(H) A declaration of compliance prepared by a producer or by an entity controlling production must cover all production of that producer or all production that the entity controls for the year in question;

(I) A producer would not prepare a declaration of compliance if all of its

production is covered by a declaration of compliance prepared by an entity controlling production;

(J) In the case of a producer, the 75 or 85 percent standard specified in paragraph (b)(1)(i) or paragraph (b)(1)(ii) of this section and the declaration of compliance procedure under paragraph (c) of this section apply to all articles of that producer for the year in question, even if some but not all of that production is also covered by a declaration of compliance prepared by an entity controlling production;

(K) The U.S. importer does not have to be the producer or the entity controlling production who prepared the declaration of compliance; and

(L) The exclusion references regarding findings and trimmings in paragraph (b)(1)(i) and paragraph (b)(1)(ii) of this section apply to all findings and trimmings, whether or not they are of foreign origin.

(ii) *Examples.* The following examples will illustrate application of the principles set forth in paragraph (b)(2)(i) of this section.

*Example 1.* An ATPDEA beneficiary country producer of articles that meet the production standards specified in § 10.243(a)(4) in the first year sends 50 percent of that production to ATPDEA region markets and the other 50 percent to the U.S. market; the cost of the fabrics formed in the United States equals 100 percent of the value of all of the fabric in the articles sent to the ATPDEA region and 60 percent of the value of all of the fabric in the articles sent to the United States. Although the cost of fabrics formed in the United States is more than 75 percent of the value of all of the fabric used in all of the articles produced, this producer could not prepare a valid declaration of compliance because the articles sent to the United States did not meet the minimum 75 percent standard.

*Example 2.* A producer sends to the United States in the first year three shipments of articles that meet the description in § 10.243(a)(4); one of those shipments is entered under the HTSUS subheading that covers articles described in § 10.243(a)(4), the second shipment is entered under the HTSUS subheading that covers articles described in § 10.243(a)(7), and the third shipment is entered under subheading 9802.00.80, HTSUS. In determining whether the minimum 75 percent standard has been met in the first year for purposes of entry of articles under the HTSUS subheading that covers articles described in § 10.243(a)(4) during the following (that is, second) year, consideration must be restricted to the articles in the first shipment and therefore must not include the articles in the second and third shipments.

*Example 3.* A producer in the second year begins production of articles that conform to the production standards specified in § 10.243(a)(4); some of those articles are entered in that year under HTSUS subheading 6212.10 and others under HTSUS

subheading 9802.00.80 but none are entered in that year under the HTSUS subheading which pertains to articles described in § 10.243(a)(4) because the 75 percent standard had not been met in the preceding (that is, first) year. In this case the 85 percent standard applies, and all of the articles that were entered under the various HTSUS provisions in the second year must be taken into account in determining whether that 85 percent standard has been met. If the 85 percent was met in the aggregate for all of the articles entered in the second year, in the next (that is, third) year articles of that producer may receive preferential treatment under the HTSUS subheading which pertains to articles described in § 10.243(a)(4).

*Example 4.* An entity controlling production of articles that meet the description in § 10.243(a)(4) buys for the U.S., Canadian and Mexican markets; the articles in each case are first sent to the United States where they are entered for consumption and then placed in a commercial warehouse from which they are shipped to various stores in the United States, Canada and Mexico. Notwithstanding the fact that some of the articles ultimately ended up in Canada or Mexico, a declaration of compliance prepared by the entity controlling production must cover all of the articles rather than only those that remained in the United States because all of those articles had been entered for consumption.

*Example 5.* Fabric is cut and sewn in the United States with other U.S. materials to form cups which are joined together to form brassiere front subassemblies in the United States, and those front subassemblies are then placed in a warehouse in the United States where they are held until the following year; during that following year all of the front subassemblies are shipped to an ATPDEA beneficiary country where they are assembled with elastic strips and labels produced in an Asian country and other fabrics, components or materials produced in the ATPDEA beneficiary country to form articles that meet the production standards specified in § 10.243(a)(4) and that are then shipped to the United States and entered during that same year. In determining whether the entered articles meet the minimum 75 or 85 percent standard, the fabric in the elastic strips and labels is to be disregarded entirely because the strips and labels constitute findings or trimmings for purposes of this section, and all of the fabric in the front subassemblies is countable because it was all formed in the United States and used in the production of articles that were entered in the same year.

*Example 6.* An ATPDEA beneficiary country producer's entire production of articles that meet the description in § 10.243(a)(4) is sent to a U.S. importer in two separate shipments, one in February and the other in June of the same calendar year; the articles shipped in February do not meet the minimum 75 percent standard, the articles shipped in June exceed the 85 percent standard, and the articles in the two shipments, taken together, do meet the 75 percent standard; the articles covered by the February shipment are entered for consumption on March 1 of that calendar
