

Figure 1: General locations of proposed critical habitat in the Mobile River Basin

BILLING CODE 4310-55-C

Because portions of the historic range of each of the 11 mussels were shared with 4 or more of the other mussel

species, there is considerable overlap between species' current and historical distributions within 25 of the 26 habitat units. This offers opportunities to

increase each species' current range and number of extant populations into units currently occupied by other listed species included in this designation. For
