

NNMS Order Entry Firms, shall participate in the NNMS as follows:

(i) NNMS Market Makers, NNMS Auto-Ex ECNs, and NNMS Order Entry Firms to the extent they enter a Non-Attributable Quote/Order shall participate in the automatic-execution functionality of the NNMS, and shall accept the delivery of an execution up to the size of the participant's Displayed Quote/Order and Reserve Size.

(ii) NNMS Order-Delivery ECNs shall participate in the order-delivery functionality of the NNMS, and shall accept the delivery of an order up to the size of the NNMS Order-Delivery ECN's Displayed Quote/Order and Reserve Size. The NNMS Order-Delivery ECN shall be required to execute the full size of such order (even if the delivered order is a mixed lot or odd lot) unless that interest is no longer available in the ECN, in which case the ECN is required to execute in a size equal to the remaining amount of trading interest available in the ECN.

(iii) UTP Exchanges that choose to participate in the NNMS shall do so as described in subparagraph (f) of this rule and as otherwise described in the NNMS rules and the UTP Plan.

(B) Processing of Non-Directed Orders—Upon entry of a Non-Directed Order into the system, the NNMS will ascertain who the next Quoting Market Participant or NNMS Order Entry Firm in queue to receive an order is (based on the algorithm selected by the entering participant, as described in subparagraph (b)(B)(i)–(iii) of this rule), and shall deliver an execution to Quoting Market Participants or NNMS Order Entry Firms that participate in the automatic-execution functionality of the system, or shall deliver a Liability Order to Quoting Market Participants that participate in the order-delivery functionality of the system. Non-Directed Orders entered into the NNMS system shall be delivered to or automatically executed against Quoting Market Participants' or NNMS Order Entry Firms' Displayed Quotes/Orders and Reserve Size, in strict price/time priority, as described in the algorithm contained in subparagraph (b)(B)(i) of this rule. Alternatively, an NNMS Market Participant can designate that its Non-Directed Orders be executed based on a price/time priority that considers ECN quote-access fees, as described in subparagraphs (b)(B)(ii) of this rule, or executed based on price/size/time priority, as described in subparagraph (b)(B)(iii) of this rule. The individual time priority of each Quote/Order submitted to NNMS shall be assigned by the system based on the date and time such Quote/Order was received.

Remainders of Quote/Orders reduced by execution, if retained by the system, shall retain the time priority of their original entry. For purposes of the execution algorithms described in paragraphs (i), (ii) and (iii) below, "Displayed Quotes/Orders" shall also include any odd-lot, odd-lot portion of a mixed-lot, or any odd-lot remainder of a round-lot(s) reduced by execution, share amounts that while not displayed in the Nasdaq Quotation Montage, remain in system and available for execution.

(i) through (iii) No Change.

(iv) Exceptions—The following exceptions shall apply to the above execution parameters:

(a) If a Nasdaq Quoting Market Participant enters a Non-Directed Order into the system, before sending such Non-Directed Order to the next Quoting Market Participants in queue, the NNMS will first attempt to match off the order against the Nasdaq Quoting Market Participant's own Quote/Order if the participant is at the best bid/best offer in Nasdaq. Effective February 10, 2003, until [April 28, 2003 (or such earlier date as determined by Nasdaq with appropriate notice to the Securities and Exchange Commission and market participants)] March 17, 2003, this processing shall also apply to Non-Directed Orders of NNMS Order Entry Firms. Thereafter, this exception shall not apply to Non-Directed Orders Entered by NNMS Order Entry Firms. *Nasdaq Quoting Market Participants may, and NNMS Order Entry Firms must, avoid any attempted automatic system matching permitted by this paragraph through the use of an anti-internalization qualifier (AIQ) quote/order flag containing the following values: "Y" or "I", subject to the following restrictions:*

Y—if the Y value is selected, the system will execute the flagged quote/order solely against attributable and non-attributable quotes/orders (displayed and reserve) of Quoting Market Participants and NNMS Order Entry Firms other than the party entering the AIQ "Y" flagged quote/order. If the only available trading interest is that of the same party that entered the AIQ "Y" flagged quote/order, the system will not execute at an inferior price level, and will instead return the latest entered of those interacting quote/orders (or unexecuted portions thereof) to the entering party.

I—if the I value is selected, the system will execute against all available trading interest, including the quote/orders of the NNMS Order Entry Firm or Nasdaq Quoting Market Participant that entered the AIQ "I" flagged order, based

exclusively on the execution algorithm selected when entering the AIQ I flagged quote/order.

The I value described above shall be available for the use of NNMS Order Entry Firms on March 17, 2003, and available for use by Nasdaq Quoting Market Participants on May 12, 2003.

(b) through (c) No Change.

(C) through (D) No Change.

(2) through (8) No Change.

(c) through (e) No Change.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Nasdaq included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Nasdaq has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On January 31, 2003, the Commission approved File No. SR–NASD–2002–173 on a 90-pilot basis,⁴ to allow NNMS Order Entry Firms to enter non-marketable limit orders into Nasdaq's SuperMontage system using the SIZE MMID.⁵ Under new processing set to commence on March 17, 2003, the quotes/orders of NNMS Order Entry Firms on opposite sides of the market will interact with each other only if such interaction would result based on the execution algorithm selected (price/time, price/time with fee consideration, or price/size). This filing seeks to provide this same option to Nasdaq Quoting Market Participants, and codify current SuperMontage functionality related to the use of the Anti-Internalization Qualifier order flag.

Currently, SuperMontage market participants that do not wish to execute against themselves may voluntarily designate individual quotes/orders so that they do not automatically interact

⁴ See Securities Exchange Act Release No. 47301 (January 31, 2003), 68 FR 6236 (February 6, 2003).

⁵ The SIZE MMID is the anonymous MMID that represents the aggregate size of all Non-Attributable Quotes and Orders entered by market participants in Nasdaq at a particular price level. Non-Attributable Quotes and Orders are not displayed in the Nasdaq Quotation Montage using the market participant's MMID. Instead, these are displayed next to the SIZE MMID.
