

complete this investigation; it provides the investigating State agency with a uniform method of compiling and analyzing information that can subsequently be used to study trends, economic importance, and other matters. This form is arranged in sections so that the disease investigations can be completed in stages by different inspectors, depending upon the location of the flock, hatchery, and breeding flock. The inspector obtains some of the needed information by interviewing the appropriate poultry producers. When several States are involved in a pullorum-typhoid infection, the completed form will be sent to each of the States involved so that all of them will be aware of the investigation's outcome.

#### **Sentinel Birds Banded for Identification Prior to Flock Vaccination**

When a Federally licensed *Salmonella enteritidis* bacterin is used to vaccinate a flock, 350 birds must remain unvaccinated so that they can be used to conduct the necessary serological tests for *Salmonella pullorum* and *Salmonella gallinarum*. These test birds must be banded so that they can be recognized as sentinel birds. A report is submitted annually to APHIS, from the various States, with information from their participants and data required by the various disease control programs of the NPIP.

#### **Request for Salmonella Serotyping (VS Form 10-3)**

This is a National Veterinary Services Laboratory (NVSL) form that must be completed by State or APHIS personnel who are submitting samples for salmonella serotyping. If samples were sent to NVSL without this form, lab

personnel would have no way of identifying any given sample as to the flock from which it came, or even the disease for which the sample is to be tested.

#### **Printing and Mailing Computerized Printouts**

These printouts are constructed by hatchery operators who ship large numbers of small chick orders all across the United States. These computerized lists contain all the information found on a VS form 9-3, but reduce the paperwork load substantially because they are computer generated. These printouts are sent every month to those States that request them. The States use these printouts to monitor the number of small chicks they are receiving.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. We need this outside input to help us:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies, e.g., permitting electronic submission of responses.

*Estimate of Burden:* Public reporting burden for this collection of information

is estimated to average 0.4742 hours per response.

*Respondents:* Flock owners, breeders, hatchery operators, and State veterinary medical officers.

*Estimated Number of Respondents:* 9,000.

*Estimated Number of Responses per Respondent:* 8.8562.

*Estimated Annual Number of Responses:* 79,706.

*Estimated Total Annual Burden on Respondents:* 37,797 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 7th day of January, 2003.

**Peter Fernandez,**

*Acting Administrator, Animal and Plant Health Inspection Service.*
