Pello, Senior Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487-5901, Fax: (559) 487-5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington, DC 20250-0237; telephone: (202) 720-2491, Fax: (202) 720-8938.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue SW., STOP 0237, Washington DC 20250-0237; telephone: (202) 720-2491, Fax: (202) 720-8938, or E-mail: *Jay.Guerber@usda.gov*.

**SUPPLEMENTARY INFORMATION:** This rule is issued under Marketing Agreement and Order No. 989 (7 CFR part 989), both as amended, regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the order provisions now in effect, final free and reserve percentages may be established for raisins acquired by handlers during the crop year. This rule establishes final free and reserve percentages for NS and ZC raisins for the 2002-03 crop year, which began August 1, 2002, and ends July 31, 2003. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with USDA a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule establishes final volume regulation percentages for 2002-03 crop NS and ZC raisins covered under the order. The volume regulation percentages are 53 percent free and 47 percent reserve for NS raisins, and 80 percent free and 20 percent reserve for ZC raisins. Free tonnage raisins may be sold by handlers to any market. Reserve raisins must be held in a pool for the account of the Committee and are disposed of through various programs authorized under the order. For example, reserve raisins may be sold by the Committee to handlers for free use or to replace part of the free tonnage raisins they exported; used in diversion programs; carried over as a hedge against a short crop; or disposed of in other outlets not competitive with those for free tonnage raisins, such as

government purchase, distilleries, or animal feed.

The volume regulation percentages are intended to help stabilize raisin supplies and prices, and strengthen market conditions. The Committee unanimously recommended ZC final percentages on January 29, 2003, and NS final percentages on February 13, 2003.

**Computation of Trade Demands**

Section 989.54 of the order prescribes procedures and time frames to be followed in establishing volume regulation. This includes methodology used to calculate percentages. Pursuant to § 989.54(a) of the order, the Committee met on August 14, 2002, to review shipment and inventory data, and other matters relating to the supplies of raisins of all varietal types. The Committee computed a trade demand for each varietal type for which a free tonnage percentage might be recommended. Trade demand is computed using a formula specified in the order and, for each varietal type, is equal to 90 percent of the prior year's shipments of free tonnage and reserve tonnage raisins sold for free use into all market outlets, adjusted by subtracting the carryin on August 1 of the current crop year, and adding the desirable carryout at the end of that crop year. As specified in § 989.154(a), the desirable carryout for NS raisins shall equal the total shipments of free tonnage during August and September for each of the past 5 crop years, converted to a natural condition basis, dropping the high and low figures, and dividing the remaining sum by three, or 60,000 natural condition tons, whichever is higher. For all other varietal types, including ZC raisins, the desirable carryout shall equal the total shipments of free tonnage during August, September and one-half of October for each of the past 5 crop years, converted to a natural condition basis, dropping the high and low figures, and dividing the remaining sum by three. In accordance with these provisions, the Committee computed and announced 2002-03 trade demands for NS and ZC raisins at 196,185 tons and 2,166 tons, respectively, as shown below.

**COMPUTED TRADE DEMANDS**

[Natural condition tons]

	NS raisins	ZC raisins
Prior year's shipments .....	298,133	3,441
Multiplied by 90 percent .....	0.90	0.90
