

each site, or the pool of potential clients from which clients are then selected. Program implementation will be measured using a series of progress summaries.

Initiative sites will be responsible for screening potential participants, assessing homeless and disabling condition eligibility criteria for the program, and documenting eligibility as

part of the national performance assessment. Each site will identify a limited number of portals of entry into the program in a relatively small geographic area, so that the evaluator can practically and systematically contact clients about participating in the evaluation. VA evaluation staff, clinical program staff, and NEPEC will work together to establish systematic

procedures for assessing eligibility, enrolling clients into the Housing/Treatment Activity of the Initiative, obtaining written informed consent to participate in the national performance assessment, and other evaluation activities.

The estimated response burden to collect this information is as follows:

Instrument	No. of respondents	Responses/ respondent	Burden/ response (hrs)	Total burden (hrs)
Client screener (completed by program staff)	10	300	0.083	249
Client baseline interview	1,200	1	1.00	1,200
Client followup interviews	1,200	11	0.67	8,844
Client discharge form (completed by program staff)	10	120	0.083	100
Key informant interviews with site program managers	108	3	1.00	324
Total	1,318	10,717
3-Year annual average	1,318	3,572

Port Pelican LLC Deepwater Port License Application; Preparation of Environmental Impact Statement

AGENCY: Coast Guard, DHS, and Maritime Administration, DOT.

ACTION: Notice of intent and request for public comments.

SUMMARY: The U.S. Coast Guard and the Maritime Administration (MARAD) announce their intent to prepare an environmental impact statement (EIS) for the project described in the Port Pelican LLC Deepwater Port License Application. The plan description in the license application calls for construction of a liquefied natural gas (LNG) Deepwater Port known as "Port Pelican" and associated anchorage in

the Gulf of Mexico, approximately 36 miles south southwest of Fresh Water City, Louisiana, located in Outer Continental Shelf (OCS) Block Vermillion 140. Port Pelican would deliver natural gas to the U.S. Gulf Coast using existing gas supply and gathering systems in the Gulf of Mexico and southern Louisiana. Gas would then be delivered to shippers using the national pipeline grid through interconnections with major interstate and intrastate pipelines. The Coast Guard seeks public and agency input on the scope of the EIS. Specifically, the Coast Guard requests input on any environmental concerns that the public may have related to the proposal to construct a new Deepwater Port, sources of relevant data or information, and any suggested analysis methods for inclusion in the EIS.
