

reading room is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW., Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 690-2817 before coming.

APHIS documents published in the **Federal Register**, and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at <http://www.aphis.usda.gov/ppd/rad/webrepor.html>.

FOR FURTHER INFORMATION CONTACT: Dr. Tracy A. Horner, Ecologist, Environmental Services, PPD, APHIS, 4700 River Road Unit 149, Riverdale, MD 20737-1237; (301) 734-5213.

SUPPLEMENTARY INFORMATION:

Background

The Animal and Plant Health Inspection Service (APHIS) is considering several applications for permits to release the nonindigenous leaf-mining weevil *Acythopeus cocciniae* in order to reduce the severity and extent of ivy gourd (*Coccinia grandis*) infestations in Guam and Saipan.

Ivy gourd is native to Africa, Asia, Fiji, and northern Australia. This invasive weed is a rapidly growing, climbing or trailing vine that forms thick mats, overgrowing trees and other vegetation, walls, fences, and utility poles. Ivy gourd also serves as a host for numerous pests of cucurbitaceous crops, including black leaf-footed bug (*Leptoglossus australis*), leafminers (*Liriomyza* spp.), melon aphid (*Aphis gossypii*), melon fly (*Bactrocera cucurbitae*), pumpkin caterpillar (*Diaphania indica*), red pumpkin beetle (*Aulacophora foveicollis*), and whiteflies (*Bemisia* spp.).

Ivy gourd has been detected in the United States in Guam, Hawaii, and Saipan. In July 1999, we prepared an environmental assessment (EA) that examined the potential release of *A. cocciniae* and another weevil of the same genus, *A. burkhartorum*, into the environment for use as biological control agents to reduce the severity and extent of ivy gourd infestations in the State of Hawaii. APHIS has subsequently received permit applications for additional releases of *A. cocciniae* beyond the area considered in the 1999 EA. The applicants propose to release *A. cocciniae* in Guam and Saipan to reduce the severity and extent of ivy gourd infestation on those islands.

A. cocciniae is native to Africa. Adults live up to 200 days and feed on the leaves of the ivy gourd, creating numerous holes in the lamina. Eggs are laid singly by insertion into the lamina of the leaves. The eggs hatch in about 8 days, and the larvae mine the leaves for 9 to 10 days thereafter. Pupation takes place within the mine and lasts for 15 days. Adult feeding and larval mining can cause drying of the leaves and eventual defoliation.

APHIS' review and analysis of the proposed action and its alternatives are documented in detail in an EA entitled, "Field Release of *Acythopeus cocciniae* (Coleoptera: Curculionidae), a nonindigenous leaf-mining weevil for control of ivy gourd, *Coccinia grandis* (Cucurbitaceae), in Guam and Saipan" (February 2003). We are making the EA available to the public for review and comment. We will consider all comments that we receive on or before the date listed under the heading **DATES** at the beginning of this notice.

The EA may be viewed on the Internet at <http://www.aphis.usda.gov/ppq/> by following the link for "Document/Forms Retrieval System" then clicking on the triangle beside "6—Permits—Environmental Assessments," and selecting document number 0034. You may request paper copies of the EA by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the title of the EA when requesting copies. The EA is also available for review in our reading room (information on the location and hours of the reading room is listed under the heading **ADDRESSES** at the beginning of this notice).

The EA has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508), (3) USDA regulations implementing NEPA (7 CFR part 1), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 2nd day of April 2003.

Peter Fernandez,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Forest Service

Kootenai (KNF) and Idaho Panhandle National Forests (IPNF); Montana, Idaho and Washington; Extension of Scoping For Revised Land and Resource Management Plans

AGENCY: Forest Service, USDA.

ACTION: Extension of the scoping period in conjunction with revision of the Land and Resource Management Plans (hereafter referred to as Forest Plan or Plans) for the Kootenai and Idaho Panhandle National Forests (Kootenai Idaho Panhandle Zone, hereafter referred to as KIPZ) located in Lincoln, Sanders, and Flathead counties in Montana; Bonner, Boundary, Kootenai, Shoshone, Benewah, Latah, and Clearwater counties in Idaho; and Pend Oreille county in Washington.

SUMMARY: The scoping period has been extended for the proposed revised Forest Plans and the Draft Environmental Impact Statement. The original notice of intent was published in the **Federal Register**, Vol. 67, No. 83, on page 21210, on April 30, 2002 as FR Doc. 02-10548.

DATES: Comments concerning the scope of the analysis must be received in writing by May 30, 2003.

ADDRESSES: Send written comments and suggestions to Forest Supervisor, c/o Forest Plan Revision, Kootenai National Forest, 1101 W Hwy 2, Libby, MT 59923.

FOR FURTHER INFORMATION CONTACT: Joe Krueger at (406) 293-6211 or Gary Ford at (208) 765-7478.

SUPPLEMENTARY INFORMATION: The scoping period has been extended to May 30, 2003, to provide additional time for public access to the Analysis of the Management Situation report. Comments received during the scoping period will be used to develop alternatives in the DEIS.

Dated: April 1, 2003.

Bob Castaneda,

Kootenai Forest Supervisor.
