

## BILLING CODE 4310-55-C

(3) The primary constituent elements include:

(i) The physical features of karst-forming rock containing subterranean spaces with stable temperatures, high humidities (near saturation), and suitable substrates (for example, spaces between and underneath rocks suitable for foraging and sheltering); and

(ii) The biological features of a healthy surface community of native plants (for example, juniper-oak woodland) and animals (for example, cave crickets) surrounding the karst feature that provide nutrient input and buffer the karst ecosystem from adverse effects (from, for example, nonnative species invasions, contaminants, and

fluctuations in temperature and humidity).

(4) Existing human-constructed, above-ground, impervious structures do not contain the primary constituent elements and are not considered to be critical habitat. Such features and structures include, but are not limited to, buildings and paved roads. However, subsurface areas under these structures are considered to be critical habitat since subterranean spaces containing these species and/or transmitting moisture and nutrients through the karst ecosystem extend, in some cases, underneath these existing human-constructed structures. Landscaped areas associated with existing human-constructed structures also are not considered critical habitat.

(5) Unit 20 (23 ha (57 ac)) is an area bounded by points with the following coordinates: -98.4582897, 29.5087489; -98.4575517, 29.5091199; -98.4561171, 29.5091615; -98.4553228, 29.5088978; -98.4552343, 29.5082394; -98.4563160, 29.5073726; -98.4571671, 29.5071204; -98.4586325, 29.5063688; -98.4606616, 29.5044311; -98.4637341, 29.5006275; -98.4649997, 29.4990919; -98.4656642, 29.4986719; -98.4660631, 29.4991019; -98.4658881, 29.4995898; -98.4646589, 29.5017013; -98.4639396, 29.5027162; -98.4616730, 29.5055952; -98.4595256, 29.5073856; -98.4591719, 29.5077488; -98.4582897, 29.5087489.
