

pesticide products containing Chromated Copper Arsenate (CCA) to cancel certain CCA products and to amend the registrations to terminate certain uses of other CCA products (67 FR 8244)(FRL-6826-8). Another notice was issued (67 FR 13328, March 22, 2002)(FRL-6831-6) to extend the comment period until April 9, 2002. The requests proposed that only certain uses of CCA be allowed as of December 31, 2003. The registrants stated in their requests that their requests were being made as a result of current and projected market demand for CCA products and the availability of new

generation wood treatment products. The Agency considers these voluntary moves toward arsenic-free wood treatment products as a positive step, particularly for our nation's children. The Agency believes that reducing the potential residential exposure to a known human carcinogen is desirable. This transition affects all future residential uses of wood treated with CCA, including wood used in playground structures, decks, picnic tables, landscaping timbers, residential fencing, patios, walkways and boardwalks.

EPA received requests from four registrants (Table 1 of this unit) to cancel 2 products (Table 2 of this unit), and to amend 17 other affected end-use and manufacturing-use registrations to terminate all uses of such products (Table 3 of this unit) with the exception of the treatment of wood products that fall under the American Wood-Preservers' Association (AWPA) standards (based on the 2001 edition of the AWPA Standards) listed in the text of the requested label amendment stated below.
