

expenditures for training and related activities for both programs to ensure that the statutory ceiling is not exceeded. Tracking of expenditures for the NAFTA-TAA program will occur until all funds have been expended or the State submits a final report—at which time the NAFTA-TAA program will be phased out in accordance with the Trade Adjustment Assistance Reform Act of 2002. Additionally, the Secretary of Labor is responsible for ensuring that resources are equitably distributed to the States. This form enables the ETA to evaluate a State's need for resources and to distribute resources among States as necessary.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including

whether the information will have practical utility;

- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- * Enhance the quality, utility, and clarity of the information to be collected; and

- * Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The ETA-9023 has been successfully utilized by the ETA and the States with only minor modifications since Fiscal Year 1989. The **Federal Register** Notice requests an extension of the ETA-9023 for both the reformed TAA program and

the NAFTA-TAA program—the latter only until monies for it expire. Overall, States have done a commendable job in completing the form with relatively minor problems or questions raised by the States on the form. The ETA-9023 has been extremely important to the ETA over the last several years because the entire funding available, under the statutory cap for the Trade program for training was allocated to the States. The ETA-9023 report was critical in allowing ETA to be able to distribute resources equitably among States so the maximum number of eligible participants seeking training could obtain it.
