**Proposed Project:** Possession, Use, and Transfer of Select Agents and Toxins (OMB Control No. 0920-0576)—Extension—Office of the Director (OD), Centers for Disease Control and Prevention (CDC).

The Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (Pub. L. 107-188) specifies that the Secretary of Health and Human Services shall provide for the establishment and enforcement of standards and procedures governing the possession, use, and transfer of select biological agents and toxins. The Act specifies that facilities that possess, use, and transfer select agents register with the Secretary. The Secretary has designated CDC as the agency responsible for collecting this information.

CDC is requesting continued OMB approval to collect this information through the use of five separate forms. These forms are: (1) Application for Registration; (2) Facility Notification Form; (3) Request for Exemption; (4) Transfer of Select Agent form; and (5) Clinical and Diagnostic Laboratory Reporting Form.

The Application for Registration will be used by facilities to register with CDC. The Application for Registration requests facility information, a list of select agents in use, possession, or for transfer by the facility, characterization of the select agent, and laboratory information. Estimated average time to complete this form is 3 hours, 45 minutes for an entity with one principal investigator working with one select agent. CDC estimates that entities will

need an additional 45 minutes for each additional investigator or select agent. This is an increase of 1 hour, 45 minutes over the previous form due to new reporting requirements for security and identification of those individuals the entity has designated to have a legitimate need to handle or use such agents.

Facilities may amend their registration if any changes occur in the information submitted to the Secretary. To apply for an amendment to a certificate of registration, an entity must obtain the relevant portion of the application package and submit the information requested in the package to CDC. Estimated time to amend a registration package is 60 minutes.

The Facility Notification Form must be completed by facilities whenever there is release of a select agent or theft or loss of a select agent. This is a new form. Estimated average time to complete this form is 60 minutes.

The Request for Exemption form will be used by facilities that are using select agents in investigational new drug testing or in cases of public health emergency. This is a new form. Estimated average time to complete this form is 70 minutes.

The Transfer of Select Agent Form will be used by facilities requesting transfer of a select agent to their facilities and by the facility transferring the agent. This is a modification of an existing form approved under OMB Control No. 0920-0199. Estimated average time to complete this form is 1 hour, 45 minutes. This is an increase of 75 minutes due to procedural changes.

The Clinical and Diagnostic Laboratory Exemption Report will be used by clinical and diagnostic laboratories to notify the Secretary that select agents identified as the result of diagnosis or proficiency testing have been properly disposed of. This is a new form. Estimated average time to complete this form is 60 minutes.

In addition to the standardized forms, this regulation also outlines situations in which an entity must notify or make a request of the Secretary in writing and CDC is requesting OMB approval to collect this information. The regulation states that an entity must notify the Secretary in writing at least five business days before destroying all select agent or toxin covered by a

certificate of registration. The estimated time to gather the information and submit this notification is 30 minutes.

An entity may also apply to the Secretary for an expedited review of an individual by the Attorney General. To apply for this expedited review, an entity must submit a request in writing to the Secretary establishing the need for such action. The estimated time to gather the information and submit this request is 30 minutes. Entities should be aware that CDC is not developing standardized forms to use in these situations. Rather, the entity should provide the information as requested in the appropriate section of the regulation.

As part of the safety requirements of this regulation, the Responsible Official is required to conduct regular inspections (at least annually) of the laboratory where select agents and toxins are stored. The results of these inspections must be documented. CDC estimates that, on the average, such documentation will take 1 hour.

Also, as part of the safety requirements of this regulation, the entity is required to record the identity of the individual trained, the date of training, and the means used to verify that the employee understood the training. Estimated time for this documentation is 2 hours per principal investigator.

An entity or an individual may request administrative review of a decision denying or revoking either a certification of registration or approval based on a security risk assessment. This request must be in writing within 30 calendar days after the adverse decision. This request should include a statement of the factual basis for the review. CDC estimates the time to prepare and submit such a request is 4 hours.

Finally, an entity must implement a system to ensure that certain records and databases are accurate and that the authenticity of records may be verified. The time to implement such a system is estimated to average 4 hours.

The cost to respondents is their time to complete the forms and comply with the reporting and recordkeeping components of the Act plus a one-time purchase of a file cabinet (estimated cost \$400) to maintain records.

CFR reference	Data collection	Number of respondents	Responses per respondent	Avg burden per response (in hrs.)	Total annual burden (in hrs.)
73.7(b) .....	Registration application .....	1,000	1	3.75	6,262
