

the fund's assets. In addition, no amount of net long-term capital gain shall be considered permanently set aside for charitable purposes to the extent the trustee distributes proceeds from the sale or exchange of the fund's assets as income within the meaning of § 1.642(c)-5(a)(5)(i). \* \* \*

(e) *Effective dates.* Generally, the second sentence of paragraph (c) of this section, concerning the loss of any charitable deduction for long-term capital gains if the fund's income may be determined by a fixed percentage of the fair market value of the fund's assets or by any amount that takes into account unrealized appreciation in the value of the fund's assets, applies for taxable years beginning after January 2, 2004. In a state whose statute permits income to be determined by reference to a fixed percentage of, or the unrealized appreciation in, the value of the fund's assets, net long-term capital gain of a pooled income fund may be considered to be permanently set aside for charitable purposes if the fund's governing instrument is amended or reformed to eliminate the possibility of determining income in such a manner and if income has not been determined in this manner. For this purpose, a judicial proceeding to reform the fund's governing instrument must be commenced, or a nonjudicial reformation that is valid under state law must be completed, by the date that is nine months after the later of January 2, 2004 or the effective date of the state statute authorizing determination of income in such a manner.

■ **Par. 3.** In § 1.642(c)-5, paragraph (a)(5)(i) is revised to read as follows:

**§ 1.642(c)-5 Definition of pooled income fund.**

(a) \* \* \*

(5) \* \* \*

(i) The term *income* has the same meaning as it does under section 643(b) and the regulations thereunder, except that income generally may not include any long-term capital gains. However, in conformance with the applicable state statute, income may be defined as or satisfied by a unitrust amount, or pursuant to a trustee's power to adjust between income and principal to fulfill the trustee's duty of impartiality, if the state statute both provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust and meets the requirements of § 1.643(b)-1. In exercising a power to adjust, the trustee must allocate to principal, not to

income, the proceeds from the sale or exchange of any assets contributed to the fund by any donor or purchased by the fund at least to the extent of the fair market value of those assets on the date of their contribution to the fund or of the purchase price of those assets purchased by the fund. This definition of income applies for taxable years beginning after January 2, 2004.

■ **Par. 4.** Section 1.643(a)-3 is revised to read as follows:

**§ 1.643(a)-3 Capital gains and losses.**

(a) *In general.* Except as provided in § 1.643(a)-6 and paragraph (b) of this section, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary.

(b) *Capital gains included in distributable net income.* Gains from the sale or exchange of capital assets are included in distributable net income to the extent they are, pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of discretion by the fiduciary (in accordance with a power granted to the fiduciary by applicable local law or by the governing instrument if not prohibited by applicable local law)—

(1) Allocated to income (but if income under the state statute is defined as, or consists of, a unitrust amount, a discretionary power to allocate gains to income must also be exercised consistently and the amount so allocated may not be greater than the excess of the unitrust amount over the amount of distributable net income determined without regard to this subparagraph § 1.643(a)-3(b));

(2) Allocated to corpus but treated consistently by the fiduciary on the trust's books, records, and tax returns as part of a distribution to a beneficiary; or

(3) Allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary.

(c) *Charitable contributions included in distributable net income.* If capital gains are paid, permanently set aside, or to be used for the purposes specified in section 642(c), so that a charitable deduction is allowed under that section in respect of the gains, they must be included in the computation of distributable net income.

(d) *Capital losses.* Losses from the sale or exchange of capital assets shall first be netted at the trust level against any

gains from the sale or exchange of capital assets, except for a capital gain that is utilized under paragraph (b)(3) of this section in determining the amount that is distributed or required to be distributed to a particular beneficiary. See § 1.642(h)-1 with respect to capital loss carryovers in the year of final termination of an estate or trust.

(e) *Examples.* The following examples illustrate the rules of this section:

*Example 1.* Under the terms of Trust's governing instrument, all income is to be paid to A for life. Trustee is given discretionary powers to invade principal for A's benefit and to deem discretionary distributions to be made from capital gains realized during the year. During Trust's first taxable year, Trust has \$5,000 of dividend income and \$10,000 of capital gain from the sale of securities. Pursuant to the terms of the governing instrument and applicable local law, Trustee allocates the \$10,000 capital gain to principal. During the year, Trustee distributes to A \$5,000, representing A's right to trust income. In addition, Trustee distributes to A \$12,000, pursuant to the discretionary power to distribute principal. Trustee does not exercise the discretionary power to deem the discretionary distributions of principal as being paid from capital gains realized during the year. Therefore, the capital gains realized during the year are not included in distributable net income and the \$10,000 of capital gain is taxed to the trust. In future years, Trustee must treat all discretionary distributions as not being made from any realized capital gains.

*Example 2.* The facts are the same as in *Example 1*, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid first from any net capital gains realized by Trust during the year. Trustee evidences this treatment by including the \$10,000 capital gain in distributable net income on Trust's federal income tax return so that it is taxed to A. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must treat all discretionary distributions as being made first from any realized capital gains.

*Example 3.* The facts are the same as in *Example 1*, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid from any net capital gains realized by Trust during the year from the sale of certain specified assets or a particular class of investments. This treatment of capital gains is a reasonable exercise of Trustee's discretion.

*Example 4.* The facts are the same as in *Example 1*, except that pursuant to the terms of the governing instrument (in a provision not prohibited by applicable local law), capital gains realized by Trust are allocated to income. Because the capital gains are allocated to income pursuant to the terms of the governing instrument, the \$10,000 capital gain is included in Trust's distributable net income for the taxable year.
