

irrigation cleaning systems) by adding the following materials:

Copper Sulfate, for use as an algicide, is limited to one application per field during any 24-month period.

Application rates are limited to those which do not increase baseline soil test values for copper over a timeframe agreed upon by the producer and accredited certifying agent.

Ozone Gas, for use as an irrigation system cleaner only; and

Peracetic acid, for use in disinfecting equipment, seed, and asexually propagated planting material.

Paragraph (a) is proposed to be further amended by correcting the spelling of the word “demisters” contained in subparagraph (a)(4) to “demossers.”

This proposed rule would amend paragraph (e) of § 205.601 by adding the following material:

Copper Sulfate, for use as tadpole shrimp control in rice production, is limited to one application per field during any 24-month period. Application rates are limited to levels which do not increase baseline soil test values for copper over a timeframe agreed upon by the producer and accredited certifying agent.

This proposed rule would amend paragraph (i) of § 205.601 (as plant disease control) by adding the following substance:

Peracetic acid, for use to control fire blight bacteria when approved by the Environmental Protection Agency (EPA) under a Special Local Need (24c) registration.

This proposed rule would revise paragraph (k) of § 205.601 (as plant growth regulators) by inserting the word “gas” behind “ethylene” to be consistent with the June 2000 NOSB recommendation for the substance. Section 205.601(k) will now read “As plant growth regulators—Ethylene gas, for regulation of pineapple flowering.”

This proposed rule revises paragraph (m) of § 205.601 by inserting a new subpart (2) as follows:

(2) EPA List 3—Inerts of unknown toxicity—for use only in passive pheromone dispensers.

Section 205.602 Nonsynthetic Substances Prohibited for Use in Organic Crop Production

This proposed rule would amend § 205.602 by adding the following substance:

Calcium chloride, except as a brine-sourced foliar spray to treat physiological disorders associated with calcium uptake.

This proposed rule revises current paragraph (h) of § 205.602 by amending its annotation to read as follows:

Sodium nitrate—unless use is restricted to no more than 20% of the

crop’s total nitrogen requirement; use in spirulina production is unrestricted until October 21, 2005.

Section 205.603 Synthetic Substances Allowed for Use in Organic Livestock Production

This proposed rule would revise current subparagraph (4) of § 205.603 (a) by correcting the spelling of the word “chlorohexidine” to “chlorhexidine.”

This proposed rule would amend paragraph (d) of § 205.603 (as feed additives) by adding the following substances:

DL—Methionine, DL—Methionine—Hydroxy Analog, and DL—Methionine—Hydroxy Analog Calcium—for use only in organic poultry production until October 21, 2005.

This proposed rule would revise current subparagraph (1) of § 205.603 (d) by removing examples (i) and (ii), copper sulfate and magnesium sulfate, as they are both approved for use by FDA and do not need to be listed individually as examples. As currently published, subparagraphs § 205.603 (d) (1) (i) and (ii) may mislead readers to believe that the use of trace minerals are limited only to copper sulfate and magnesium sulfate. Therefore, the revision made in this proposed rule for current subparagraph (1) of § 205.603 (d) would read “Trace minerals, used for enrichment or fortification when FDA approved.”

This proposed rule would amend current paragraph (e) of § 205.603 (As synthetic inert ingredients as classified by the Environmental Protection Agency (EPA), for use with nonsynthetic substances or synthetic substances listed in this section and used as active pesticide ingredients in accordance with any limitations on the use of such substances.) by redesignating current paragraph (f) of § 205.603 as new subparagraph (1) under § 205.603 (e). While drafting § 205.603 for final publication in the **Federal Register**, current paragraph (f) was intended to be designated as § 205.603 (e) (1), however, its designation was not properly assigned. Therefore, this proposed rule redesignates current paragraph (f) of § 205.603 as subparagraph (e) (1) of the same section.

Section 205.605 Nonagricultural (nonorganic) Substances Allowed as Ingredients In or On Processed Products Labeled as “Organic” or “Made with Organic (specified ingredients or food group(s))”

This proposed rule would amend current paragraph (a) of § 205.605 by adding agar-agar, carageenan and tartaric acid as technical corrections.

These substances were included on the National List proposed in the **Federal Register** on December 16, 1997, but were inadvertently removed from the National List published in the **Federal Register** on March 13, 2000, proposed rule and on December 21, 2000, Final Rule (7 CFR Part 205).

This proposed rule would revise current paragraph (b) (10) of § 205.605 by amending its annotation to read as follows:

Ethylene, allowed for postharvest ripening of tropical fruit and degreening of citrus.

III. Request for Public Comment on the Use of Ethylene

Ethylene, for organic crop production, was a substance that was petitioned and reviewed for inclusion onto the National List after promulgation of the proposed rule published in the **Federal Register** on March 13, 2000. The NOSB approved and recommended that ethylene gas be included on the National List with the annotation “for regulation of pineapple flowering.” After receiving the NOSB recommendation for the material, the NOP, while finalizing the NOS, included the material on the National List without receiving public comment on the material through the Federal rulemaking process. As a result, this proposed rule requests public comment on the use of ethylene gas for regulation of pineapple flowering.

IV. Related Documents

Eight notices were published regarding the meetings of the NOSB and its deliberations on recommendations and substances petitioned for amending the National List. Substances and recommendations included in this proposed rule were announced for NOSB deliberation in the following **Federal Register** Notices: (1) 64 FR 54858, October 8, 1999 (Ethylene); (2) 65 FR 33802, May 25, 2000, (Ethylene gas); (3) 65 FR 64657, October 30, 2000, (Calcium borogluconate and Peracetic acid); (4) 66 FR 10873, February 20, 2001, (Poloxalene); (5) 66 FR 48654, September 21, 2001, (Calcium chloride, Copper sulfate, Methionine); (6) 67 FR 19375, April 19, 2002, (Potassium sorbate and Sodium propionate); (7) 67 FR 54784, August 26, 2002, (Ozone gas, Pheromones, Sodium (Chilean) nitrate, Propylene glycol, Magnesium hydroxide/Magnesium oxide, Kaolin pectin, Bismuth subsalicylate, Flunixin, Xylazine, Tolazoline, Butorphanol, Mineral oil, Activated charcoal, Epinephrine); and (8) 67 FR 62950,
