

Proposed Selection Criterion

The emphasis on research rigor plus the importance of the collaborative research program require a modification to the selection criteria for this program. The Secretary proposes to add a criterion to reflect increased emphasis on research management. This criterion reads as follows: There must be a clearly delineated plan for research management, with focus on quality controls for data collection, management of research protocols, and provisions for oversight at collaborating sites.

Executive Order 12866

This notice of proposed priority has been reviewed in accordance with Executive Order 12866. Under the terms of the order, we have assessed the potential costs and benefits of this regulatory action.

The potential costs associated with the notice of proposed priority are those resulting from statutory requirements and those we have determined as necessary for administering this program effectively and efficiently.

In assessing the potential costs and benefits—both quantitative and qualitative—of this notice of proposed priority, we have determined that the benefits of the proposed priority justify the costs.

Summary of potential costs and benefits: The potential cost associated with this proposed priority is minimal while the benefits are significant. Grantees may anticipate costs associated with completing the application process in terms of staff time, copying, and mailing or delivery. The use of e-Application technology reduces mailing and copying costs significantly.

The benefits of the TBIMS and collaborative projects have been well established over the years that similar projects have been completed. This proposed priority will generate new knowledge through research to improve treatment and services delivery outcomes for persons with TBI through collaborative research projects.

The benefit of this proposed priority and proposed application and project requirements will be the establishment of new collaborative projects that support the President's NFI.

Applicable Program Regulations: 34 CFR part 350.
