

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussion could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* Biomedical Library and Informatics Review Committee.

*Date:* June 18–19, 2003.

*Time:* June 18, 2003, 8:30 a.m. to 6 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Building 38, Board Room, 8600 Rockville Pike, Bethesda, MD 20892.

*Time:* June 19, 2003, 8 a.m. to 12:30 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, Building 38, Board Room, 8600 Rockville Pike, Bethesda, MD 20892.

*Contact Person:* Merlyn M. Rodrigues, MD, PhD, Scientific Review Adm., National Library of Medicine, Extramural Programs, 6705 Rockledge Drive, Suite 301, Bethesda, MD 20894.

(Catalogue of Federal Domestic Assistance Program Nos. 93.879, Medical Library Assistance, National Institutes of Health, HHS.)

Dated: April 15, 2003.

**LaVerne Y. Stringfield,**

*Director, Office of Federal Advisory Committee Policy.*

**BILLING CODE 4140–01–M**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institutes of Health

#### **Prospective Grant of Exclusive License: The Use of the Domain-Swapped Dimer of Cyanovirin (deltaQ50–CVN) in a Topical Microbicide To Prevent the Transmission of HIV and Other Sexually Transmitted Diseases**

**AGENCY:** National Institutes of Health, Public Health Service, DHHS.

**ACTION:** Notice.

**SUMMARY:** This is notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i), that the National Institutes of Health (NIH), Department of Health and Human Services, is contemplating the grant of an exclusive license worldwide to practice the invention embodied in:

U.S. Patent Application, S/N 60/359,360, filed: 2/25/2002, entitled “An Obligate Domain-Swapped Dimer of Cyanovirin with Enhanced Anti-viral Activity” (PHS Reference No. E–096–2002)

to Biosyn, Inc., of Philadelphia, PA. The patent rights in this invention have been assigned to the United States of America.

**DATES:** Only written comments and/or application for a license which are received by the NIH Office of Technology Transfer on or before June 23, 2003, will be considered.

**ADDRESSES:** Requests for a copy of the patent applications, inquiries, comments and other materials relating to the contemplated license should be directed to: Sally Hu, Ph.D., Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852–3804; Telephone: (301) 435–5606; Facsimile: (301) 402–0220, e-mail: [hus@od.nih.gov](mailto:hus@od.nih.gov).

**SUPPLEMENTARY INFORMATION:** The patent application describes a novel protein, obligate domain-swapped dimer of Cyanovirin-N (CVN), discovered by Dr. Carole A. Bewley at the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK). The obligate domain-swapped dimer of Cyanovirin-N (CVN) displays enhanced anti-HIV activity relative to the wild-type CVN monomer and offers a great advantage over wild-type CVN because it is extremely easy to purify large quantities to greater than 98% homogeneity. So, it may open the possibility that an effective drug treatment for the human immunodeficiency virus (HIV) could reach underdeveloped countries.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The field of use may be limited to compositions, devices and methods for the prevention of infection by HIV and other sexually transmitted pathogens, topically, but not systemically, utilizing the obligate domain-swapped dimer cyanovirin-N, anti-HIV mutants of the obligate domain-swapped dimer cyanovirin-N, and anti-HIV fragments of both, but excluding pegylated the domain-swapped dimer cyanovirin-N, pegylated anti-HIV mutants of the dimer cyanovirin-N and pegylated anti-HIV fragments of both.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: April 11, 2003.

**Steven M. Ferguson,**

*Acting Director, Division of Technology Development and Transfer, Office of Technology Transfer.*
