	C8a.	C8b.	C8c.	C8d.

In addition to the quarterly report, the HUD Office of Lead Hazard Control is always interested in the accomplishments of our Lead Hazard Control grantees and in sharing these with lead poisoning prevention advocates. If you have a particular "success story" which may reflect innovative approaches in implementing your program, or if you have overcome any obstacles that would be of interest or benefit to others, please submit the story with your quarterly report.
