

TABLE 1.—FINAL SUBSTANCE—SPECIFIC PRIORITY DATA NEEDS (PDNs) FOR THIRD SET OF 10 PRIORITY HAZARDOUS SUBSTANCES—Continued

Substance	PDN ID	Priority data needs
Ethylbenzene*	42E	Reproductive toxicity studies assessing male and female end points following inhalation exposure.
	42F	Developmental toxicity studies following oral exposure.
	42G	Immunotoxicology battery of tests following oral exposure.
	42H	Battery of neurobehavioral tests following inhalation exposure.
	42I	Children's susceptibility.
	42J	Exposure levels in humans living near hazardous waste sites.
	42K	Exposure levels in children.
	42L	Potential candidate for subregistry of exposed persons.
	43A	Dose-response data for acute-duration exposure by the inhalation route.
	43B	Dose-response data for chronic-duration exposure by the inhalation route.
	43C	Dose-response data for acute- and intermediate-duration exposure by the oral route; the study of intermediate-duration exposure should include an evaluation of clinical signs of neurotoxicity and histopathology of reproductive organs, endocrine glands, and nervous system.
	43D	Multigeneration toxicity study examining reproductive end points and indicators of endocrine disruption following inhalation exposure.
	43E	Two-species developmental study with continued assessment of offspring during post-natal development following oral exposure.
Pentachlorophenol	43F	Studies for comparative toxicokinetics.
	43G	Exposure levels in humans living near hazardous waste sites.
	43H	Exposure levels in children.
	43I	Potential candidate for subregistry of exposed persons.
	44A	Comparative toxicokinetic studies.
1,1,2,2-Tetrachloroethane	44B	Exposure levels in humans living near hazardous waste sites.
	44C	Exposure levels in children through play activities near contaminated environmental media.
	44D	Potential candidate for subregistry of exposed persons.
	45A	Two-species developmental toxicity study by the oral route.
	45B	Immunotoxicity battery following oral exposure.
Total xylenes	45C	Mammalian <i>in vivo</i> genotoxicity assays.
	45D	Exposure levels in humans living near hazardous waste sites.
	45E	Exposure levels in children.
	45F	Potential candidate for subregistry of exposed persons.
	46A	Dose-response data for chronic-duration exposure by the oral route. This study should be done in conjunction with the neurotoxicology battery of tests.
	46B	Neurotoxicology battery of tests following oral exposure.
	46C	Two-generation reproductive study following oral exposure.
	46D	Developmental toxicity study that includes neurodevelopmental end points following oral exposure.
	46E	Exposure levels in humans living near hazardous waste sites.
	46F	Exposure levels in children.
	46G	Potential candidate for subregistry of exposed persons.

* Some of the toxicity priority data needs may potentially be filled by individual industry groups working under specific EPA programs.

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic

summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 498-1210.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information

technology. Send comments to Anne O'Connor, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Project

Data Collection, Management, Reporting, and Evaluation for the Minority AIDS Initiative (MAI)—New—Centers for Disease Control and Prevention (CDC). CDC is requesting OMB approval to collect data to assess the HIV prevention and capacity-building activities of community-based organizations (CBOs) and other not-for-profit organizations funded under the MAI. The essence of this initiative is to implement an approach to HIV Prevention for communities of color
