

TABLE 1.—NATIONAL PRIORITIES LIST FINAL RULE, GENERAL SUPERFUND SECTION—Continued

State	Site name	City/county
UT ..	Davenport and Flagstaff Smelters.	Sandy City.

Number of Sites Added to the General Superfund Section: 7.

B. Status of NPL

With the 7 new sites added to the NPL in today's final rule; the NPL now contains 1,237 final sites; 1,079 in the General Superfund Section and 158 in the Federal Facilities Section. With a separate rule (published elsewhere in today's **Federal Register**) proposing to add 13 new sites to the NPL, there are now 65 sites proposed and awaiting final agency action, 59 in the General Superfund Section and 6 in the Federal Facilities Section. Final and proposed sites now total 1,302. (These numbers reflect the status of sites as of April 1, 2003. Site deletions occurring after this date may affect these numbers at time of publication in the **Federal Register**.)

C. What Did EPA Do With the Public Comments It Received?

EPA reviewed all comments received on the sites in this rule. The Davenport and Flagstaff Smelters site was proposed on December 1, 2000 (65 FR 75215). The Woodbrook Road Dump site was proposed on September 13, 2001 (66 FR 47612). The Omaha Lead site was proposed on February 26, 2002 (67 FR 8836). The remaining sites were proposed on September 5, 2002 (67 FR 56794).

EPA responded to all relevant comments received on the following sites: Davenport and Flagstaff Smelters, Woodbrook Road Dump, and Omaha Lead. EPA's responses to site-specific public comments are addressed in the "Support Document for the Revised National Priorities List Final Rule—April 2003."

For the remaining sites, EPA received no comments or only comments supporting the listing of the sites to the NPL and therefore, EPA is placing them on the final NPL at this time.

IV. Executive Order 12866

A. What Is Executive Order 12866?

Under Executive Order 12866, (58 FR 51735 (October 4, 1993)) the Agency must determine whether a regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely

to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

B. Is This Final Rule Subject to Executive Order 12866 Review?

No. The listing of sites on the NPL does not impose any obligations on any entities. The listing does not set standards or a regulatory regime and imposes no liability or costs. Any liability under CERCLA exists irrespective of whether a site is listed. It has been determined that this action is not a "significant regulatory action" under the terms of Executive Order 12866 and is therefore not subject to OMB review.

V. Unfunded Mandates

A. What Is the Unfunded Mandates Reform Act (UMRA)?

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal Agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more in any one year. Before EPA promulgates a rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective, or least burdensome alternative if the

Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

B. Does UMRA Apply to This Final Rule?

No, EPA has determined that this rule does not contain a Federal mandate that may result in expenditures of \$100 million or more for State, local, and tribal governments in the aggregate, or by the private sector in any one year. This rule will not impose any Federal intergovernmental mandate because it imposes no enforceable duty upon State, tribal or local governments. Listing a site on the NPL does not itself impose any costs. Listing does not mean that EPA necessarily will undertake remedial action. Nor does listing require any action by a private party or determine liability for response costs. Costs that arise out of site responses result from site-specific decisions regarding what actions to take, not directly from the act of listing a site on the NPL.

For the same reasons, EPA also has determined that this rule contains no regulatory requirements that might significantly or uniquely affect small governments. In addition, as discussed above, the private sector is not expected to incur costs exceeding \$100 million. EPA has fulfilled the requirement for analysis under the Unfunded Mandates Reform Act.

VI. Effect on Small Businesses

A. What Is the Regulatory Flexibility Act?

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*, as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996) whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.*, small businesses, small
