

(and the District of Columbia) and will gather information on the following six survey domains: Facility characteristics (for approximately five different types of group homes); Licensing and certification; Facility programs and treatment services; Seclusion and restraint; Facility monitoring and oversight; and, Financing.

The survey will identify and describe the types of residential facilities for persons with mental illness that are licensed, certified, and/or financed by State governments; the target population served by each facility type; the range of

services provided in each facility type; provisions for monitoring each facility type, including the use of seclusion and restraints; and, sources of financing for each facility type.

This information collection supports the New Freedom Initiative, one of SAMHSA's current priorities. The New Freedom Initiative is the President's comprehensive plan to reduce barriers to full community integration for people with disabilities. The national survey will provide new information to SAMHSA and to other policymakers regarding the ways in which group

homes and other types of residential facilities for adults, adolescents, and children with mental illness are established, regulated, and financed.

The questionnaire will be distributed to identified state health officials in electronic and/or paper formats. State health officials may either return the completed questionnaire via email or regular mail or request a telephone interview. In addition, respondents who do not return a completed paper questionnaire will be contacted and interviewed by telephone.
