

may not receive or retain CRP cost-share assistance if other Federal cost-share assistance is provided for such acreage under any law, as determined by the Deputy Administrator. Further, under no circumstances may the cost-share payments received under this part, or otherwise, exceed the cost of the practice, as determined by CCC.

§ 1410.4 Maximum county acreage.

(a) Except as provided in paragraph (b) of this section, the maximum acreage that may be placed in the CRP and the WRP may not exceed 25 percent of the total cropland in the county; further, no more than 10 percent of the cropland may be subject, in the aggregate, to a CRP or WRP easement.

(b) The restrictions in paragraph (a) of this section may be waived by CCC if CCC determines that such action would not adversely affect the local economy of the county and that operators in the county are having difficulties complying with conservation plans implemented under part 12 of this title.

(c) These restrictions on participation shall be in addition to any other restriction imposed by law.

§ 1410.5 Eligible persons.

(a) In order to be eligible to enter into a CRP contract in accordance with this part, a person must be an owner, operator, or tenant of eligible land and:

(1) If an operator of eligible land, seeking to participate without the owner, must have operated such land for at least 12 months prior to the close of the applicable signup period and must provide satisfactory evidence that such operator will be in control of such eligible land for the full term of the CRP contract period;

(2) If an owner of eligible land, must have owned such land for at least 12 months prior to the close of the applicable signup period, unless:

(i) The new owner acquired such land by will or succession as a result of the death of the previous owner;

(ii) The only ownership change in the 12-month period occurred due to foreclosure on the land and the owner of the land, immediately before the foreclosure, exercises a timely right of redemption from the mortgage holder in accordance with State law; or

(iii) As determined by the Deputy Administrator, the circumstances of the acquisition are such that present adequate assurance that the new owner of such eligible land did not acquire such land for the purpose of placing it in the CRP; or

(3) If a tenant, the tenant is a participant with an eligible owner or operator.

(b) Notwithstanding paragraph (a) of this section, under continuous signup provisions authorized by § 1410.30, an otherwise eligible person must have owned or operated, as appropriate, the eligible land for at least 12 months before submitting the offer.

§ 1410.6 Eligible land.

(a) In order to be eligible to be placed in the CRP, land must be one of the following:

(1) Cropland that is subject to a conservation plan and has been annually planted or considered planted, as defined in § 1410.2, to an agricultural commodity in 4 of the 6 crop years from 1996 through 2001, as determined by the Deputy Administrator, provided further that field margins that are incidental to the planting of crops may also be considered qualifying cropland to the extent determined appropriate by the Deputy Administrator; and is physically and legally capable of being planted in a normal manner to an agricultural commodity, as determined by the Deputy Administrator; or

(2) marginal pasture land, as determined by the Deputy Administrator, that:

(i) is enrolled in the crop year or has been enrolled during any of the 2 years preceding the crop year in the WBP; and

(A) The WBP contract of the owner or operator of the cropland expired or will expire in calendar year 2000, 2001, or 2002; and

(B) The acreage is not classified as naturally occurring type 3 through 7 wetlands, as determined by the Deputy Administrator, regardless of whether the acreage is or is not protected by a Federal agency easement or mortgage restriction (types 3 through 7 wetlands that are normally artificially flooded shall not be precluded from eligibility), and;

(C) Enrollment in CRP would enhance the environmental benefits of the site, as determined by Deputy Administrator; or

(ii) Is determined to be suitable for use as a riparian buffer. A field or portion of a field of marginal pasture land may be considered to be suitable for use as a riparian buffer only if, as determined by CCC, it:

(A) Is located adjacent to permanent stream corridors excluding corridors that are considered gullies or sod waterways; and

(B) Is capable, when permanent grass, forbs, shrubs, or trees, are grown, or when planted with appropriate vegetation for the area, including vegetation suitable for wetland restoration or wildlife habitat, as determined appropriate by the Deputy Administrator, of substantially reducing

sediment and/or nutrient runoff that otherwise would be delivered to the adjacent stream or waterbody or for water quality purposes; or

(3) Must be acreage enrolled in the CRP during the final year of the CRP contract provided the scheduled expiration date of the current CRP contract is before the effective date the new CRP contract, as determined by the Deputy Administrator.

(b) Land qualifying under paragraphs (a)(1) or (a) (2) of this section must also meet one of the following criteria, to be eligible for a contract:

(1) Be a field or portion of a field determined to be suitable for use, as determined by the Deputy Administrator, as a permanent wildlife habitat, filter strip, riparian buffer, contour grass strip, grass waterway, field windbreak, shelterbelt, living snowfence, other uses as determined by the Deputy Administrator, land devoted to vegetation on salinity producing areas, including any applicable recharge area, or any area determined eligible for CRP based on wetland or wellhead protection area criteria. A field or portion of a field may be considered to be suitable for use as a filter strip or riparian buffer only if it, as determined by CCC:

(i) Is located adjacent to a stream, other waterbody of a permanent nature (such as a lake, pond, or sinkhole), or wetland; excluding such areas as gullies or sod waterways; and

(ii) Is capable, when permanent grass, forbs, shrubs or trees are grown, of substantially reducing sediment or nutrient runoff that otherwise would be delivered to the adjacent stream or waterbody;

(2) Be a field that has evidence of scour erosion caused by out-of-bank flows of water, as determined by CCC:

(i) In addition, such land must:

(A) Be expected to flood a minimum of once every 10 years; and

(B) Have evidence of scour erosion as a result of such flooding.

(ii) To the extent practicable, be the actual affected cropland areas of a field; however, the entire cropland area of an eligible field may be enrolled if:

(A) The size of the field is 9 acres or less; or

(B) More than one third of the cropland in the field is land that lies between the water source and the inland limit of the scour erosion.

(iii) Or, if the full field is not eligible for enrollment under this paragraph, be the cropland between the waterbody and inland limit of the scour erosion together with, as determined by the Deputy Administrator, additional areas that would otherwise be unmanageable
