

of their recipients. This rule will not raise novel legal or policy issues. The Service has previously designated experimental populations of black-footed ferrets at seven other locations (in Colorado/Utah, Montana, South Dakota, Arizona, and Wyoming) and for other species at numerous locations throughout the nation.

Regulatory Flexibility Act

The Department of the Interior certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The area affected by this rule consists of the Rosebud Indian Reservation, and private, Federal, and State lands that fall within the south-central tier of counties in South Dakota (Mellette, Todd, Tripp, and Gregory Counties). Reintroduction of ferrets allowed by this rule will not have any significant effect on recreational activities in the Experimental Population Area. We do not expect any closures of roads, trails, or other recreational areas. Suspension of prairie dog shooting for ferret management purposes will be localized and prescribed by the Tribe. We do not expect ferret reintroduction activities to affect grazing operations, resource development actions, or the status of any other plant or animal species within the release area. Because participation in ferret reintroduction by private landowners is voluntary, this rulemaking is not expected to have any significant impact on private activities in the affected area. The designation of the NEP in this rule will significantly reduce the regulatory requirements regarding the reintroduction of these ferrets, will not create inconsistencies with other agency actions, and will not conflict with existing or proposed human activity, or Tribal and public use of the land.

Small Business Regulatory Enforcement Fairness Act

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule will not have an annual effect on the economy of \$100 million or more for reasons outlined above. It will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. The rule does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act

The NEP designation will not place any additional requirements on any city, county, or other local municipalities. The specific site designated for release of the experimental population of ferrets is predominantly Rosebud Sioux Tribal Trust land administered by the Rosebud Sioux Tribe, who support this project. The State of South Dakota has expressed support for accomplishing the reintroduction through a nonessential experimental designation. Accordingly, this rule will not “significantly or uniquely” affect small governments. A Small Government Agency Plan is not required. Since this rulemaking does not require that any action be taken by local or State government or private entities, we have determined and certify pursuant to the Unfunded Mandates Reform Act, 2 U.S.C. 1502 *et seq.*, that this rulemaking will not impose a cost of \$100 million or more in any given year on local or State governments or private entities (*i.e.*, it is not a “significant regulatory action” under the Act).

Takings (E.O. 12630)

In accordance with Executive Order 12630, the rule does not have significant takings implications. Designating reintroduced populations of federally listed species as NEPs significantly reduces the Act’s regulatory requirements with respect to the reintroduced listed species within the NEP. Under NEP designations, the Act requires a Federal agency to confer with the Service if the agency determines its action within the NEP is likely to jeopardize the continued existence of the reintroduced species. However, even if an agency action totally eliminated a reintroduced species from an NEP and jeopardized the species’ continued existence, the Act does not compel a Federal agency to stop a project, deny issuing a permit, or cease any activity. Additionally, regulatory relief can be provided regarding take of reintroduced species within NEPs, and a special rule has been developed stipulating that unintentional take (including killing or injuring) of the reintroduced black-footed ferrets will not be a violation of the Act, when such take is incidental to an otherwise legal activity (*e.g.*, livestock management, mineral development) that is in accordance with Federal, Tribal, State, and local laws and regulations.

Most of the lands within the primary reintroduction area are administered by the Rosebud Sioux Tribe. Multiple-use management of these lands by industry and recreation interests will not change

as a result of the experimental designation. Private landowners within the Experimental Population Area will still be allowed to conduct lawful control of prairie dogs, and may elect to have black-footed ferrets removed from their land should ferrets move to private lands. Because of the substantial regulatory relief provided by NEP designations, we do not believe the reintroduction of ferrets will conflict with existing human activities or hinder public use of the area. The South Dakota Department of Game, Fish, and Parks has previously endorsed ferret reintroductions under NEP designations and continues to do so for this effort. The NEP designation will not require the South Dakota Department of Game, Fish, and Parks to specifically manage for reintroduced ferrets. A takings implication assessment is not required.

Federalism (E.O. 13132)

In accordance with Executive Order 13132, the rule does not have significant Federalism implications to warrant the preparation of a Federalism Assessment. As stated above, most of the lands within the primary reintroduction area are Tribal Trust lands, and multiple-use management of these lands will not change to accommodate black-footed ferrets. The designation will not impose any new restrictions on the State of South Dakota. The Service has coordinated extensively with the Tribe and State of South Dakota, and they endorse the NEP designation as the only feasible way to pursue ferret recovery in the area. A Federalism Assessment is not required.

Civil Justice Reform (E.O. 12988)

In accordance with Executive Order 12988, the Department of the Interior has determined that this rule does not unduly burden the judicial system and meets the applicable standards provided in sections 3(a) and 3(b)(2) of the order.

Paperwork Reduction Act

This regulation contains information collection requirements under the Paperwork Reduction Act (and approval by the Office of Management and Budget (OMB)) under 44 U.S.C. 3501 *et seq.* The collected information covers general take or removal, depredation-related take, and specimen collection. Authorization for this information collection has been approved by OMB and has been assigned OMB control number 1018–0095, which expires October 31, 2004. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number.
