

§ 412.610 Assessment schedule.

* * * * *

(c) * * *

(1) * * *

(i) * * *

(C) Must be completed by the calendar day that follows the admission assessment reference day.

* * * * *

11. In § 412.614, the following changes are made:

A. Redesignate paragraphs (a)(1) and (a)(2) as (a)(1)(i) and (a)(1)(ii), respectively.

B. Redesignate the introductory text to paragraph (a) as (a)(1) and add a heading to newly designated paragraph (a)(1).

C. Add a new paragraph (a)(2).

D. Add a new paragraph (e).

The revision and additions read as follows:

§ 412.614 Transmission of patient assessment data.

(a) *Data format.* (1) *General rule.* The inpatient rehabilitation facility must encode and transmit data for each Medicare Part A fee-for-service inpatient—

* * * * *

(2) *Exception to the general rule.* When the inpatient rehabilitation facility does not submit claim data to Medicare in order to be paid for any of the services it furnished to a Medicare Part A fee-for-service inpatient, the inpatient rehabilitation facility is not required to, but may, transmit to Medicare the inpatient rehabilitation facility patient assessment data associated with the services furnished to that same Medicare Part A fee-for-service inpatient.

* * * * *

(e) *Exemption to being assessed a penalty for transmitting the IRF-PAI data late.* CMS may waive the penalty specified in paragraph (d) of this section when, due to an extraordinary situation that is beyond the control of an inpatient rehabilitation facility, the inpatient rehabilitation facility is unable to transmit the patient assessment data in accordance with paragraph (c) of this section. Only CMS can determine if a situation encountered by an inpatient rehabilitation facility is extraordinary and qualifies as a situation for waiver of the penalty specified in paragraph (d)(2) of this section. An extraordinary situation may be due to, but is not limited to, fires, floods, earthquakes, or similar unusual events that inflict extensive damage to an inpatient rehabilitation facility. An extraordinary situation may be one that produces a data transmission problem that is beyond the control of the inpatient

rehabilitation facility, as well as other situations determined by CMS to be beyond the control of the inpatient rehabilitation facility. An extraordinary situation must be fully documented by the inpatient rehabilitation facility.

12. In § 412.624, the following changes are made:

A. Revise paragraph (c).

B. Revise paragraph (d).

C. Revise paragraph (e)(1).

D. Revise paragraph (e)(4).

The revisions read as follows:

§ 412.624 Methodology for calculating the Federal prospective payment rates.

* * * * *

(c) *Determining the Federal prospective payment rates.* (1) *General.* The Federal prospective payment rates will be established using a standard payment amount referred to as the standard payment conversion factor. The standard payment conversion factor is a standardized payment amount based on average costs from a base year that reflects the combined aggregate effects of the weighting factors, various facility and case level adjustments, and other adjustments.

(2) *Update the cost per discharge.* CMS applies the increase factor described in paragraph (a)(3) of this section to the facility's cost per discharge determined under paragraph (b) of this section to compute the cost per discharge for fiscal year 2002. Based on the updated cost per discharge, CMS estimates the payments that would have been made to the facility for fiscal year 2002 under part 413 of this chapter without regard to the prospective payment system implemented under this subpart.

(3) *Computation of the standard payment conversion factor.* The standard payment conversion factor is computed as follows:

(i) *For fiscal year 2002.* Based on the updated costs per discharge and estimated payments for fiscal year 2002 determined in paragraph (c)(2) of this section, CMS computes a standard payment conversion factor for fiscal year 2002, as specified by CMS, that reflects, as appropriate, the adjustments described in paragraph (d) of this section.

(ii) *For fiscal years after 2002.* The standard payment conversion factor for fiscal years after 2002 will be the standardized payments for the previous fiscal year updated by the increase factor described in paragraph (a)(3) of this section, including adjustments described in paragraph (d) of this section as appropriate.

(4) *Determining the Federal prospective payment rate for each case-*

mix group. The Federal prospective payment rates for each case-mix group is the product of the weighting factors described in § 412.620(b) and the standard payment conversion factor described in paragraph (c)(3) of this section.

(d) *Adjustments to the standard payment conversion factor.* The standard payment conversion factor described in paragraph (c)(3) of this section will be adjusted for the following:

(1) *Outlier payments.* CMS determines a reduction factor equal to the estimated proportion of additional outlier payments described in paragraph (e)(4) of this section.

(2) *Budget neutrality.* CMS adjusts the Federal prospective payment rates for fiscal year 2002 so that aggregate payments under the prospective payment system, excluding any additional payments associated with elections not to be paid under the transition period methodology under § 412.626(b), are estimated to equal the amount that would have been made to inpatient rehabilitation facilities under part 413 of this chapter without regard to the prospective payment system implemented under this subpart.

(3) *Coding and classification changes.* CMS adjusts the standard payment conversion factor for a given year if CMS determines that revisions in case-mix classifications or weighting factors for a previous fiscal year (or estimates that those revisions for a future fiscal year) did result in (or would otherwise result in) a change in aggregate payments that are a result of changes in the coding or classification of patients that do not reflect real changes in case-mix.

(e) * * *

(1) *Adjustment for area wage levels.* The labor portion of a facility's Federal prospective payment is adjusted to account for geographical differences in the area wage levels using an appropriate wage index. The application of the wage index is made on the basis of the location of the facility in an urban or rural area as defined in § 412.602. Adjustments or updates to the wage data used to adjust a facility's Federal prospective payment rate under this paragraph will be made in a budget neutral manner. CMS determines a budget neutral wage adjustment factor, based on any adjustment or update to the wage data, to apply to the standard payment conversion factor.

* * * * *

(4) *Adjustment for high-cost outliers.* CMS provides for an additional payment to an inpatient rehabilitation
