## II. ICRs To Be Renewed

### A. For All ICRs

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are displayed in 40 CFR part 9.

These information collection requirements are mandatory. Furthermore, the records required by New Source Performance Standards (NSPS) must be retained by the owner or operator for at least two years and records required by the National Emission Standards for Hazardous Air Pollutants (NESHAP) must be retained by the owner or operator for at least five years. In general, the required information consists of emissions data and other information deemed not to be private.

In the absence of such information collection requirements, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

The EPA computed the burden for each of the recordkeeping and reporting requirements applicable to the industry for the currently approved Information Collection Requests (ICRs) listed in this notice. Where applicable, the EPA identified specific tasks and made assumptions, while being consistent with the concept of the Paperwork Reduction Act.
