

The proposed amounts included in the following table reflect the updated 110 percent of the national median target amounts of new excluded psychiatric hospitals and units for cost reporting periods beginning during FY 2004. These figures are updated with the most recent data available to reflect the projected market basket increase percentage of 3.5 percent. This projected percentage change in the market basket reflects the average change in the price of goods and services purchased by hospitals to furnish inpatient hospital services (as projected by the Office of the Actuary of CMS based on its historical experience with the IPPS). For a new provider, the labor-related share of the target amount is multiplied by the appropriate geographic area wage index, without regard to IPPS reclassifications, and added to the nonlabor-related share in order to determine the per case limit on payment under the statutory payment methodology for new providers.

Class of excluded hospital or unit	FY 2004 proposed labor-related share	FY 2004 proposed nonlabor-related share
Psychiatric	\$7,301	\$2,902

Effective for cost reporting periods beginning on or after October 1, 2002, this payment limitation is no longer applicable to new LTCHs because they are paid 100 percent of the Federal rate. Under the LTCH PPS, a new LTCH is defined as a provider of inpatient hospital services that meets the qualifying criteria for LTCHs specified under § 412.23(e)(1) and (e)(2) and whose first cost reporting period as a LTCH begins on or after October 1, 2002 (§ 412.23(e)(4)). (We note that this definition of new LTCHs should not be confused with those LTCHs first paid under the TEFRA payment system for discharges occurring on or after October 1, 1997, and before October 1, 2002.) New LTCHs are paid based on 100 percent of the fully Federal prospective rate (they may not participate in the 5-year transition from cost-based reimbursement to prospective payment). In contrast, those “new” LTCHs that meet the definition of “new” under § 413.40(f)(2)(ii) and that have their first cost reporting periods beginning on or after October 1, 1997, and before October 1, 2002, may be paid under the LTCH PPS transition methodology. Since those hospitals by definition would have been considered new before October 1, 2002, they would have been subject to the updated payment limitation on new hospitals that was

published in the FY 2003 IPPS final rule (67 FR 50103). Under existing regulations at § 413.40(f)(2)(ii), the “new” hospital would be subject to the same cap in its second cost reporting period; this cap would not be updated for the new hospital’s second cost reporting year. Thus, because the same cap is to be used for the new LTCH’s first two cost reporting periods, it is no longer necessary to publish an updated cap for new LTCHs.

Effective for cost reporting periods beginning on or after October 1, 2002, this payment limitation is no longer applicable to new rehabilitation hospitals and units because they are paid 100 percent of the Federal prospective rate under the IRF PPS. Therefore, it is also no longer necessary to update the payment limitation for new rehabilitation hospitals or units.

3. Implementation of a PPS for IRFs

Section 1886(j) of the Act, as added by section 4421(a) of Public Law 105–33, provided the phase-in of a case-mix adjusted PPS for inpatient hospital services furnished by a rehabilitation hospital or a rehabilitation hospital unit (referred to in the statute as rehabilitation facilities) for cost reporting periods beginning on or after October 1, 2000 and before October 1, 2002, with a fully implemented PPS for cost reporting periods beginning on or after October 1, 2002. Section 1886(j) of the Act was amended by section 125 of Public Law 106–113 to require the Secretary to use a discharge as the payment unit under the PPS for inpatient hospital services furnished by rehabilitation facilities and to establish classes of patient discharges by functional-related groups. Section 305 of Public Law 106–554 further amended section 1886(j) of the Act to allow rehabilitation facilities, subject to the blend methodology, to elect to be paid the full Federal prospective payment rather than the transitional period payments specified in the Act.

On August 7, 2001, we issued a final rule in the **Federal Register** (66 FR 41316) establishing the PPS for inpatient rehabilitation facilities, effective for cost reporting periods beginning on or after January 1, 2002. Under the IRF PPS, for cost reporting periods beginning on or after January 1, 2002, and before October 1, 2002, payment consisted of 33⅓ percent of the facility-specific payment amount (based on the reasonable cost-based reimbursement methodology) and 66⅔ percent of the adjusted Federal prospective payment. For cost reporting periods beginning on or after October 1, 2002, payments are based entirely on

the Federal prospective payment rate determined under the IRF PPS.

4. Implementation of a PPS for LTCHs

In accordance with the requirements of section 123 of Public Law 106–113, as modified by section 307(b) of Public Law 106–554, we established a per discharge, DRG-based PPS for LTCHs as described in section 1886(d)(1)(B)(iv) of the Act for cost reporting periods beginning on or after October 1, 2002, in a final rule issued on August 30, 2002 (67 FR 55954). The LTCH PPS uses information from LTCH hospital patient records to classify patients into distinct LTC–DRGs based on clinical characteristics and expected resource needs. Separate payments are calculated for each LTC–DRG with additional adjustments applied.

As part of the implementation of the system, we established a 5-year transition period from reasonable cost-based reimbursement to the fully Federal prospective rate. A blend of the reasonable cost-based reimbursement percentage and the prospective payment Federal rate percentage would be used to determine a LTCH’s total payment under the LTCH PPS during the transition period. Certain LTCHs may elect to be paid based on 100 percent of the Federal prospective rate. All LTCHs will be paid under the fully Federal prospective rate for cost reporting periods beginning on or after October 1, 2006.

B. Payment for Services Furnished at Hospitals-Within-Hospitals and Satellite Facilities

Existing regulations at § 412.22(e) define a hospital-within-a-hospital as a hospital that occupies space in the same building as another hospital, or in one or more entire buildings located on the same campus as buildings used by another hospital. Moreover, existing § 412.22(f) provides for the grandfathering of hospitals-within-hospitals that were in existence on or before September 30, 1995.

Sections 412.22(h) and 412.25(e), relating to satellites of hospitals and hospital units, respectively, excluded from the IPPS, define a satellite facility as a part of a hospital or unit that provides inpatient services in a building also used by another hospital, or in one or more entire buildings located on the same campus as buildings used by another hospital. Sections 412.22(h)(3) and 412.25(e)(3) provide for the grandfathering of excluded hospitals and units that were structured as satellite facilities on September 30, 1999, to the extent they operate under
