Final Determination

We determine that saccharin from the People's Republic of China (PRC) is being, or is likely to be, sold in the United States at less than fair value (LTFV), as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The estimated margins of sales at LTFV are shown in the "Suspension of Liquidation" section of this notice.

Background

The preliminary determination in this investigation was published on December 27, 2002. See *Notice of Preliminary Determination of Sales at Less Than Fair Value: Saccharin From the People's Republic of China*, 67 FR 79049 (December 27, 2002) (*Preliminary Determination*). Since the issuance of the preliminary determination, the following events have occurred.

On January 8, 2003, petitioner, PMC Specialties Group Inc., requested a hearing. On January 8, 2003, the Department received a timely factor value submission from Shanghai Fortune Chemical Co. (Shanghai Fortune) and Suzhou Fine Chemicals Group Co., Ltd. (Suzhou) (collectively, "respondents") and Kaifeng Xinghua Fine Chemical Factory (Kaifeng). On February 11, 2003, the Department extended the due date for the final determination of this investigation (68 FR 6885). On February 21, 2003, the Department received timely factor value submissions from petitioner, respondents and Kaifeng, and Procter & Gamble Co. On March 3, 2003, the Department received a supplemental factor value submission from petitioner. On April 10, 2003, the Department received timely written case briefs from petitioner, respondents, Procter & Gamble Co., and Colgate Palmolive Co. On April 15, 2003, the Department received timely rebuttal comments from petitioner and respondents. On April 22, 2003, a public hearing was held in this proceeding. We have now completed this investigation in accordance with section 735 of the Act.

Scope of the Investigation

The product covered by this investigation is saccharin. Saccharin is defined as a non-nutritive sweetener used in beverages and foods, personal care products such as toothpaste, table top sweeteners, and animal feeds. It is also used in metalworking fluids. There are four primary chemical compositions of saccharin: (1) sodium saccharin (American Chemical Society Chemical Abstract Service (CAS) Registry 1128-44-9); (2) calcium saccharin (CAS Registry 16485-34-3); (3) acid (or

insoluble) saccharin (CAS Registry 181-07-2); and (4) research grade saccharin. Most of the U.S.-produced and imported grades of saccharin from the PRC are sodium and calcium saccharin, which are available in granular, powder, spray-dried powder, and liquid forms.

The merchandise subject to this investigation is classifiable under subheading 2925.11.00 of the Harmonized Tariff Schedule of the United States (HTSUS) and includes all types of saccharin imported under this HTSUS subheading, including research and specialized grades. Although the HTSUS subheading is provided for convenience and Customs (as of March 1, 2003, renamed the U.S. Bureau of Customs and Border Protection) purposes, the Department's written description of the scope of this investigation remains dispositive.

Period of Investigation

The period of investigation (POI) is January 1, 2002 through June 30, 2002. This period corresponds to the two most recent fiscal quarters prior to the month of the filing of the Petition (*i.e.*, July 2002), and is in accordance with our regulations. See 19 CFR 351.204(b)(1).
