

Fisheries Act amendments, the Council will be required to reduce fishing mortality if overfishing is determined to be occurring, if the stock is determined to be overfished, or if the fishery is identified to be approaching an overfished condition. The degree to which fishing mortality by Council managed fisheries should be reduced is unclear given that these fisheries are a small percentage of Pacific-wide harvests. The Council will deliberate on the appropriate scale of response, and on the appropriate measures that it could adopt as a preferred alternative in an amendment to the Pelagics FMP, should this be required. The Council will take public comment on whether an amendment to the Pelagics FMP is necessary, and if so, what should be the preferred alternative in the amendment to the Pelagics FMP.

13. Bottomfish Fisheries

- A. 2002 Annual report modules
- B. Status of Main Hawaiian Island management program
- C. Overfishing control rule/MSY
- D. Report on NWHI bottomfish observer program
- E. New entry criteria for Mau Zone community development program bottomfish permits (Action item)
- F. Guam offshore bottomfish management (Action Item)
- G. Public hearing on final action for Mau Zone community development program bottomfish permits and Guam offshore bottomfish management.

The Council will consider alternatives to take final action on a process for issuing NWHI Mau Zone bottomfish

CDP permits. The three alternatives to be considered for selecting participants for the program include a random selection process (lottery), a weighted point system, and evaluation criteria. Each alternative will be used in concert with the Western Pacific community eligibility criteria as described in a **Federal Register** document published on April 16, 2002 (67 FR 18512). The Council's preferred alternative adopted by the Council at its 117th meeting in Saipan on February 12, 2003, was incorporated into the existing draft framework amendment "Measure to Establish Eligibility Criteria for New Entry into the Northwestern Hawaiian Islands Mau Zone Limited Access System". The revised framework regulatory amendment incorporates the CDP permit issuance process to be presented and considered for final action by the Council at this meeting.

The Council will also consider alternatives and intends to take final action to manage Guam's offshore bottomfish fishery. The Council considered management alternatives at its 117th Council meeting in February 2003, and selected, as its preferred alternative, the option to prohibit targeting of bottomfish management unit species (BMUS) using vessels longer than 50 ft (15.24 m) that fish in Federal waters within 50 nautical miles from shore. In addition the preferred alternative would require Federal permits and reports for all vessels over 50 ft (15.24 m) in length that land BMUS in Guam.

Recent entry of larger vessels into the Guam bottomfish fishery has raised concerns regarding data collection gaps and resource status. These vessels harvest deep-slope species on offshore seamounts (or "banks") in Federal waters, land the bottomfish at Guam's commercial port, and export the bottomfish to Japan. Neither the level of fishing effort nor the amount of bottomfish harvested, which is believed to have started in 2001, is known. Guam's creel survey does not cover fish landed at the commercial port and the exported fish are not sold through any establishments that participate in the voluntary sales ticket monitoring program. Onaga (*Etelis coruscans*) appears to be the primary species that is targeted.

The southern banks have been fished for many years by Guam-based bottomfish fishermen using smaller vessels that engage in a mix of subsistence, recreational, and small-scale commercial fishing, particularly in the summer months, when weather conditions tend to be calmer. Most of the vessels fishing on the southern

banks target the shallow-water bottomfish complex, but some target the deep-water complex.

It is unknown at this time whether the new component of the fishery is having significant impacts on marine resources. Initial discussions with fishery managers and Guam's fishing community (through a public scoping meeting held on Guam August 8, 2002 and February 8, 2003), indicate that the catch of fish by this new component may lead to localized overfishing of the bank area.

14. Program Planning

- A. Legislation updates
- B. Status of Pacific Islands Region
- C. Pacific fishery management coordinating consultation
- D. Social science research planning
- E. Exclusive Economic Zone data collection

F. Report on fishery data coordination committee meeting/WPacFIN

15. Administrative matters

- A. Financial reports
- B. Administrative reports
- C. Upcoming meetings and workshops including the 119th Council meeting
- D. AP, SSC, PT and Sea turtle working group appointments

16. Other business

Although non-emergency issues not contained in this agenda may come before the Council for discussion, those issues may not be the subject of formal Council action during this meeting. Council action will be restricted to those issues specifically listed in this document and any issue arising after publication of this document that requires emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, 808-522-8220 (voice) or 808-522-8226 (fax), at least 5 days prior to the meeting date.

Authority: 1801 *et seq.*

Dated: May 16, 2003.

Richard W. Surdi,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
