

mandatory VMS will allow for better enforcement of fishing regulations and provide a more accurate database of fishing activity to better meet the conservation goals of the Pacific Groundfish FMP.

The proposed measure to require all trawl vessels to declare their intentions to fish is expected to have only a minimal impact on individual trawlers since the cost of a declaration is minimal.

Most vessels affected by this action have gross annual receipts of under \$3.5 million and are defined as small entities under Section 601 of the Regulatory Flexibility Act, however, there are approximately 10 vessels defined as large entities operating in the limited trawl fishery. There could be some disproportionate economic impacts on small entities versus large entities for the group of limited entry vessels that are less than 40 ft (12.192 m) in length and have relatively low gross annual receipts. These include 90 limited entry vessels, comprised of 5 trawl vessels and 85 longline and pot vessels. Depending upon the cost of the VMS, some of these smaller vessels would be forced to pay a relatively larger share of their annual expenditures for purchase of the VMS compared to the larger vessels. All vessels that fish in conservation areas would increase their gross receipts by being able to fish in more productive areas, having the effect of increasing profitability and mitigating the cost of the VMS. This mitigation would be less for smaller vessels, due to their smaller catches and, therefore, income from groundfish.

This proposed rule contains collection-of-information requirements subject to review and approval by OMB under the Paperwork Reduction Act (PRA). These requirements have been submitted to OMB for approval. Public reporting burden for these collections is estimated to average as follows: 4 minutes for a declaration report; 4 hours for installation of a VMS transceiver unit; 4 hours for annual maintenance of a VMS transceiver unit; 5 minutes for an installation/activation report; 5 seconds for each automated hourly position report; and 4 minutes for an exemption report. These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection information.

Public comment is sought regarding whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Send comments on these or any other aspects of the collection of information to NMFS (see **ADDRESSES**) and to OMB at the Office of Information and Regulatory Affairs, OMB, Washington, DC 20503 (Attn: NOAA Desk Officer).

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless the collection of information displays a currently valid OMB Control Number.

NMFS issued Biological Opinions (BOs) under the Endangered Species Act on August 10, 1990, November 26, 1991, August 28, 1992, September 27, 1993, May 14, 1996, and December 15, 1999, pertaining to the effects of the groundfish fishery on chinook salmon (Puget Sound, Snake River spring/summer, Snake River fall, upper Columbia River spring, lower Columbia River, upper Willamette River, Sacramento River winter, Central Valley, California coastal), coho salmon (Central California coastal, southern Oregon/northern California coastal, Oregon coastal), chum salmon (Hood Canal, Columbia River), sockeye salmon (Snake River, Odette Lake), and steelhead (upper, middle and lower Columbia River, Snake River Basin, upper Willamette River, central California coast, California Central Valley, south-central California, northern California, and southern California). During the 2000 Pacific whiting season, the whiting fisheries exceeded the chinook bycatch amount specified in the Pacific whiting fishery's Biological Opinion's (whiting BO) (December 19, 1999) incidental catch statement estimate of 11,000 fish, by approximately 500 fish. In the 2001 whiting season, however, the whiting fishery's chinook bycatch was about 7,000 fish, which approximates the long-term average. After reviewing data from, and management of, the 2000 and 2001 whiting fisheries (including industry bycatch minimization measures), the status of the affected listed chinook, environmental baseline information, and the incidental catch statement from the 1999 whiting BO, NMFS determined in a letter dated April 25, 2002, that a re-initiation of the 1999 whiting BO was not required. NMFS has concluded that

implementation of the FMP for the Pacific Coast groundfish fishery is not expected to jeopardize the continued existence of any endangered or threatened species under the jurisdiction of NMFS, or result in the destruction or adverse modification of critical habitat. This action is within the scope of these consultations.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

Dated: May 15, 2003.

Rebecca Lent,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 660 is proposed to be amended as follows:

PART 660—FISHERIES OFF THE WEST COAST STATES AND IN THE WESTERN PACIFIC

1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

Subpart G—West Coast Groundfish Fisheries

2. In § 660.302, add “ Address of record”, “Groundfish Conservation Area or GCA”, “Mobile transceiver unit”, “Office for Law Enforcement”, and “Vessel monitoring system or VMS”, in alphabetical order to read as follows:

§ 660.302 Definitions.

Address of record means the business address of a person, partnership, or corporation used by NMFS to provide notice of actions.

* * * * *

Groundfish Conservation Area or GCA means a geographic area defined by coordinates expressed in degrees latitude and longitude, created and enforced for the purpose of contributing to the rebuilding of overfished West Coast groundfish species. Specific GCAs are referred to or defined at § 660.304(c).

* * * * *

Mobile transceiver unit means a device installed on board a vessel that is used for monitoring a vessel and for transmitting the vessel's position as required by this subpart.

Office for Law Enforcement (OLE) refers to the National Marine Fisheries Service, Office for Law Enforcement, Northwest Division.

* * * * *

Vessel monitoring system or VMS means a vessel monitoring system or mobile transceiver unit as set forth in § 660.359 and approved by NMFS for use on vessels that take (directly or
