

OMB Number: 0505-0015.

Expiration Date: 7/31/2003.

Type of request: Extension of a currently approved collection.

Proposed use of information: The information enables the agency to determine whether the departure of a key person from the contractor's staff may have a deleterious effect upon contract performance, and to determine what accommodations or remedies may be taken. If the agency could not obtain information about departing key personnel, it could not ensure that qualified personnel continue to perform contract work.

Respondents: State or local governments; businesses or other for-profit; small businesses or organizations.

Estimated Number of Respondents: 300.

Estimated Number of Responses per Respondent: One (1).

Estimate of Burden: The information collection is required only when a contractor proposes to make changes to key personnel assigned to performance of a contract. Consequently, information collection is occasional. Public reporting burden for this collection of information is estimated to average one hour per respondent.

Estimated Total Annual Burden on Respondents: 300 hours.

5. Title: Procurement: Progress Reporting Clause.

OMB Number: 0505-0016.

Expiration Date: 7/31/2003.

Type of request: Extension of a currently approved collection.

Proposed use of information: The information is requested monthly or quarterly from contractors performing research and development (R&D) or advisory and assistance services, including ADP system or software development. The information enables the contracting office to monitor actual progress and expenditures compared to anticipated performance and proposal representations upon which the contract award was made. The information alerts the contracting office to technical problems, to a need for additional staff resources or funding, and to the probability of timely completion within the contract cost or price. If the contracting office could not obtain a report of progress, it would have to physically monitor the contractor's operations on a day-to-day basis throughout the performance period.

Respondents: State or local government; businesses or other for-profit; small businesses or organizations.

Estimated Number of Respondents: 300.

Estimated Number of Responses per Respondent: The frequency of progress reports varies from monthly to quarterly depending on the complexity of the contract and the risk of successful completion. Based on monthly reporting, each respondent would submit 12 responses per year.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average one and one half hours per respondent.

Estimated Total Annual Burden on Respondents: 5,400 hours.

Comments: Comments received will be considered in order to: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of USDA contracting offices, including whether the information will have a practical utility; (b) evaluate the accuracy of OPPM's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who respond, including through the use of automated collection techniques or other forms of information technology. All responses to this notice will be summarized and included in the request for OMB approval, and will become a matter of public record.

Dated: May 21, 2003.

W.R. Ashworth,

Director, Office of Procurement and Property Management.

Food Safety and Inspection Service

[Docket No. 03-014N]

Notice of Request for Extension and Revision of a Currently Approved Information Collection

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and the Office of Management and Budget (OMB) regulations, this notice announces the Food Safety and Inspection Service's (FSIS) intention to request an extension for and revision to a currently approved information collection package (ICP) regarding

Pathogen Reduction and the Hazard Analysis and Critical Control Point (HACCP) System. In addition, FSIS plans to incorporate the currently approved *Escherichia coli* (*E. coli*) contamination in beef products information collection package into the revised and extended Pathogen Reduction/HACCP information collection package.

DATES: Comments on this notice must be received on or before July 28, 2003.

FOR FURTHER INFORMATION OR COMMENTS

CONTACT: John O'Connell, Paperwork Reduction Act Coordinator, Food Safety and Inspection Service, USDA, 300 12th Street, SW., Room 112, Washington, DC 20250-3700, (202) 720-0345.

SUPPLEMENTARY INFORMATION: Title: Pathogen Reduction/Hazard Analysis and Critical Control Point (HACCP) System.

OMB Number: 0583-0103.

Expiration Date of Approval: 2/29/2004.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: FSIS has been delegated the authority to exercise the functions of the Secretary as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*). These statutes mandate that FSIS protect the public by taking regulatory actions to provide that meat and poultry products are safe, wholesome, unadulterated, and properly labeled and packaged.

FSIS is requesting an extension and revision to the ICP addressing meat and poultry paperwork and recordkeeping requirements regarding Pathogen Reduction and the HACCP system.

FSIS has established requirements applicable to meat and poultry establishments designed to reduce the occurrence and numbers of pathogenic microorganisms on meat and poultry products, reduce the incidence of foodborne illness associated with the consumption of those products, and provide a new framework for modernization of the meat and poultry inspection system. The regulations (1) require that each establishment develop and implement written sanitation standard operating procedures (Sanitation SOPs); (2) require regular microbial testing for generic *E. coli* by slaughter establishments to verify the adequacy of the establishment's process controls for the prevention and removal of fecal contamination and associated bacteria; (3) establish pathogen reduction performance standards for *Salmonella* that slaughter
